BUNTON'S LAWN SEEDS

Quality Above Par

B.-B. LAWN SEED

1 lb. sows 300 square feet; 80 lbs. to the acre

Our B.-B. Lawn Seed is a mixture of grass best adapted to making a permanent Lawn in this latitude. All seeds used are the highest in purity obtainable and strong germination, is truly super-quality and considerably above par. It does not contain any of the coarse Grasses or those that grow in clumps. Our Formula is the result of years of experimental work in proper selecting and blending of varieties that will give, in the shortest length of time, a lasting, smooth, velvety green lawn. When seed is properly sown it will be ready for the lawn mower in about 5 weeks. It will stand close cutting and stay green throughout the year. Some of the largest and best kept Estates and Cemeteries around this city now use and endorse our Super-Quality Lawn Seeds. There is none Better than **Bunton's Best**. 1 lb. 60c; 2 lbs. \$1.10; 5 lbs. \$2.50; 10 lbs. \$4.85; 20 lbs. \$9.50; 100 lbs. \$45.00.

B.-B. SHADY GREEN SEED

Solves the problem of growing fine grass in Shady locations which has always been a difficult one. We have found only a few grasses to grow satisfactorily under such conditions. These have been properly blended in our B.-B. Shady Green mixture and is well adapted for making a thick, velvety Turf. All seeds used in this mixture are of the highest purity obtainable. As Trees rapidly impoverish the soil of both Moisture and Plantfood, for best results with Grass in their shade, it is important to apply a Complete Fertilizer several times during season, also water according to season. B.-B. Lawn and Garden Grower is a Complete Fertilizer and we highly recommend it for this purpose. 1 lb. 65c; 2 lbs. \$1.20; 5 lbs. \$2.75; 10 lbs. \$5.25; 20 lbs. \$10.00; 100 lbs. \$48.00.

KENTUCO LAWN SEED

A splendid, well balanced mixture, composed of fancy Kentucky Blue Grass, Herds Grass, Fescue and White Dutch Clover, which will give a beautiful green growth at all seasons and makes a rich, velvety green Lawn in a short time. It is suitable for all open spaces. 1 lb. 40c; 2 lbs. 75c; 5 lbs. \$1.85; 10 lbs. \$3.65; 20 lbs. \$6.80; 100 lbs. \$32.00.

B.-B. TERRACE TURF SEED

To provide for an increasing demand for a grass that will give satisfactory results on terraces and steep embankments, we have combined in this mixture quick-growing and deep-rooting varieties that are best suited for that purpose. 1 lb. 65c; 2 lbs. \$1.20; 5 lbs. \$2.75.

Our Exhibit at "Better Homes Show" Armory, Louisville, February, 1929.

TO OUR CUSTOMERS AND FRIENDS

SINCE our establishment it has been our constant aim to continually keep well abreast of the times and to adapt our organization and methods of business to the everchanging needs of the Garden, Farm and Lawn. We pride ourselves on being pioneers in several instances. We have made successive improvements in our arrangements in order to cope with the rapidly increasing requirements of our customers. And in placing our services at their disposal do so with confidence in our ability to give them entire satisfaction.

On several of the first pages of this issue of our catalog we are illustrating and describing some of our outstanding specialties, most of which have already won popular favor with many growers. While it is our custom to thoroughly try out new and improved varieties before offering them for sale and are confident they will give entire satisfaction in most instances, we suggest that limited planting be made the first season, so as to be sure of their adaptability to your soil and growing conditions.

Due to very severe winter in some sections, the production of a great many seeds are somewhat below normal, especially biennial crops, such as cabbage, turnip, radish, and etc. Some varieties of beans are very short of full crop. However, we are hopeful of receiving sufficient quantities to take care of our customers requirements.

BUNTON SEED COMPANY

Formerly BUNTON & HUBER CO.

Information and Suggestions to Customers

All prices in this Catalog are those in effect January 1, 1930, and are f. o. b. Louisville, except where otherwise noted, and subject to change without notice.

TERMS. All Field Seeds, Potatoes and Onion Sets are net cash and all orders for the same will be shipped collect unless cash accompanies order or unless sent by a customer who has an approved credit or reference is supplied.

POSTAGE. We pay postage on all packets, ounces, quarter pounds and pounds of Garden and Flower Seeds at prices named in catalog. Postage charged on larger amounts according to zone in which you live relative to Louisville. Consult parcel post rates below. Five pounds of seed, when packed for mailing, requires postage for six pounds. If postage is not sent with cash orders, it is our custom to reduce amount of order to pay postage. It is more satisfactory to include postage in your remittance.

C. O. D. ORDERS will not be sent unless at least one-fourth the price is remitted in advance. This is to show good faith on part of sender and to pay for return charges if not accepted.

HOW TO ORDER. First write name and address plainly in proper place. State the kind and amount of remittance and how you want the order shipped (mail, express or freight) and give the name of railroad. Specify exactly what you want as per names in catalog and carry out prices.

REMITTANCE. Post office and express money orders are preferred and orders can be filled promptly. Personal checks are accepted and goods shipped after returns on same are received.

SEED NON-WARRANTY. We use every possible care to have and send out seeds, bulbs and plants that we firmly believe to be as represented in this catalog. True to name and strong germination. However, owing to the climatic, soil and other conditions beyond our control,

BUNTON SEED CO. give no warranty, express or implied, as to description, quality, productiveness, or any other matter, of any Seeds, Bulbs or other goods sent out, and will not be in any way responsible for the crop.

BUNTON'S SPECIALTIES

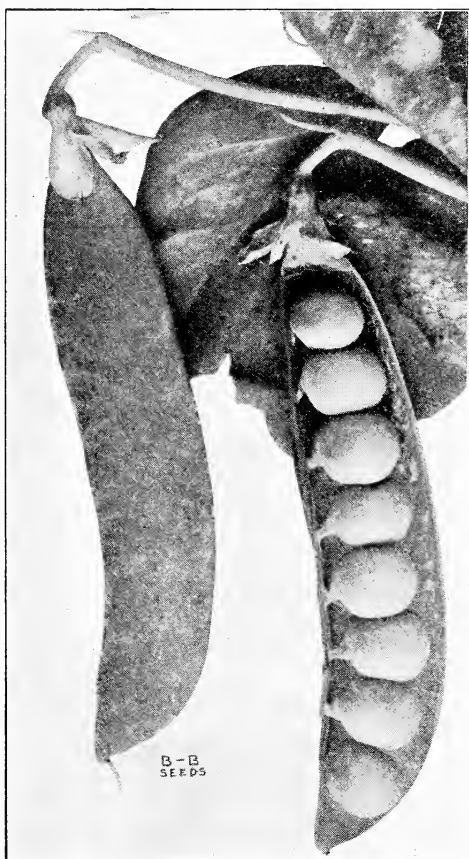

Pea—B.-B. Excelall (New)

(Outstandingly Good)

In our Pea Trials this past season Excelall proved far superior to all other Dwarf Medium Early varieties. It is an extra heavy producer of large, well filled Pods. It should be a very valuable pea for home planting as well as market gardening as when planted at the same time, will be about one week later than our Supreme and about one week earlier than B.-B. Telephone. The vine being only 2 to 2½ feet, very vigorous, strong and short jointed, does not require sticking. The pods are deep green, very large and 4 to 4½ inches long, usually containing 8 deep green, sweet and delicious peas. Our stock of this seed being limited, we desire that market growers purchase only a small quantity for this season's planting, which will enable us to make a wider distribution for Introduction purposes. Prices: Pkt. 15c; lb. 50c; 7 lbs. \$2.75; pk. \$4.00; bu. \$15.00.

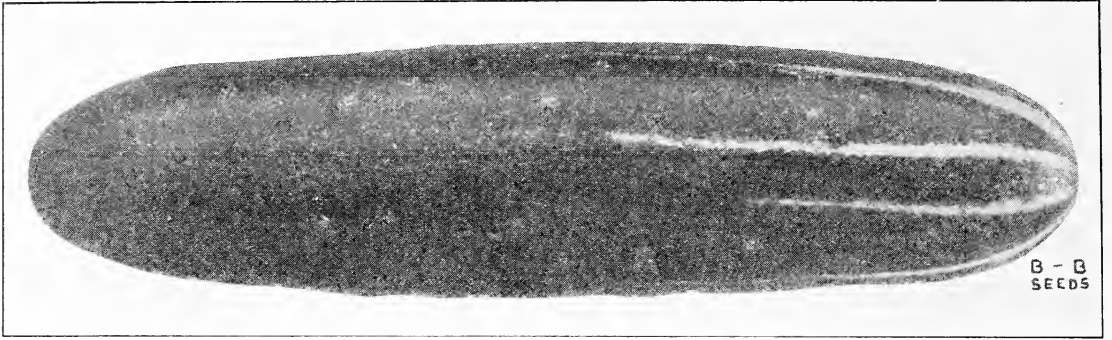

Pea—B.-B. Supreme

Since being introduced here by us in 1926, has become more popular each year. It is the **earliest large pod, Dwarf Pea** and is **very productive**. Vines are of a healthy deep green color, and about 18 inches high. The pods are 4 inches long, broad, **dark green** and well filled with 8 large, deep green peas of **exceptional high quality**. We have a number of customers who have regularly planted this pea since its introduction and praise it very highly. You can't go wrong on B.-B. SUPREME. Pkt. 10c; lb. 40c; 7 lbs. (gal.) \$1.75; pk. \$3.25; bu. \$12.50.

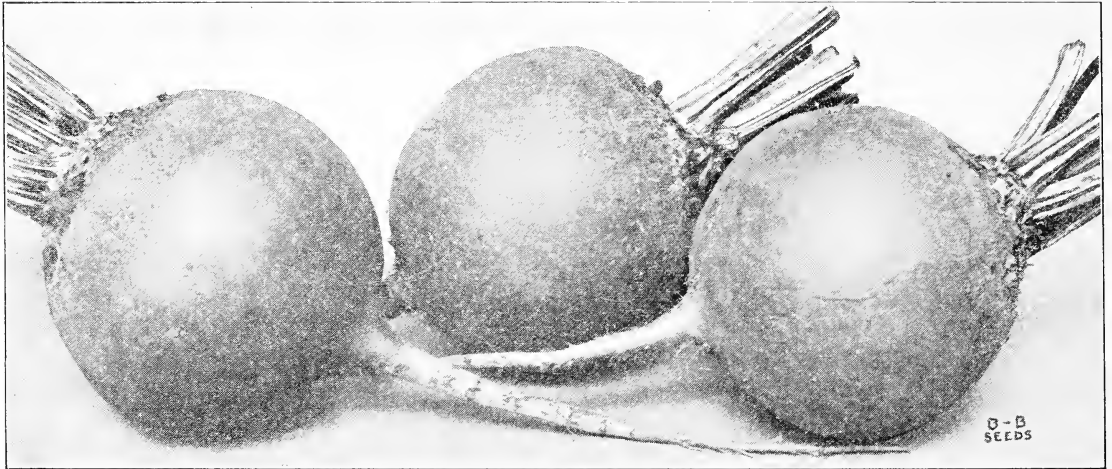

Pea B.-B. Supreme.

BUNTON'S SPECIALTIES

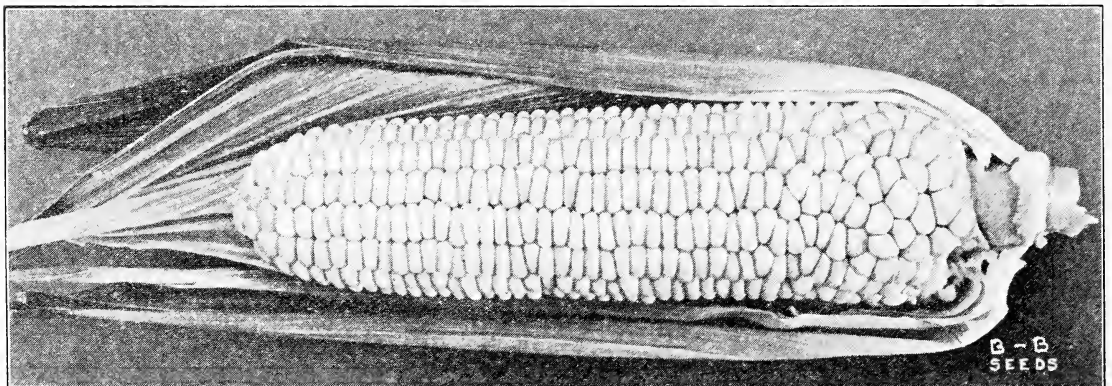

B-B Longfellow Cucumber

A very handsome, long, slender, dark green variety, equally desirable for green house forcing or out door culture, an ideal type for private garden or as a "straight pack" variety for market. It is 12 to 14 inches in length and retains its emerald green color well. A valuable variety for market growers. Pkt. 10c; oz. 30c; $\frac{1}{4}$ lb. 75c; lb. \$2.50.

B-B Bright Crosby Beet

A very early smooth skin, Globe shaped, bright red beet, that has a very pleasing appearance when bunched and washed. Tops small, flesh bright red, zoned pinkish white. Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 40c; lb. \$1.25.

Bantam Evergreen

Has become our most popular sweet corn both for market and home garden, it is a cross of Golden Bantam and Stowell's Evergreen and is possessed with the best qualities of both parents, being as delicious as Bantam and as large and about a week earlier than Evergreen. The ears are about 8 inches long with 12 to 14 rows of rather broad, deep rich golden yellow grains. Pkt. 10c; lb. 40c; 5 lbs. \$1.50; 25 lbs. \$5.00.

BUNTON'S SPECIALTIES

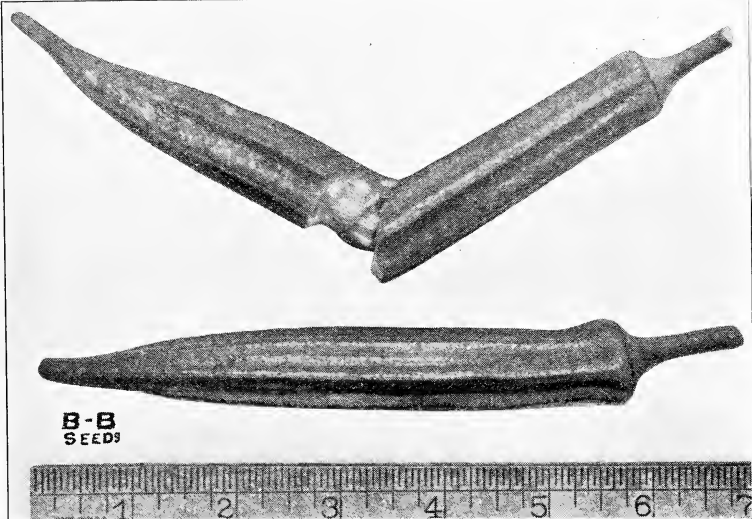

B-B Special Scotch Kale

A careful selection for hardiness, color, low spreading growth and dense curl. So hardy that it is seldom hurt by extreme cold weather, especially if planted early enough for root system to become well established. Retains its deep bluish green color and fresh appearance long after cutting, is very dwarf and if given sufficient space a single plant will easily spread two to two and a half feet. Leaves are most beautiful and densely curled. June, July and August is a splendid time for sowing this variety, however may be sown in the early spring. Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 35c; lb. \$1.25; 5 lbs. \$5.

Bunton's Brittle Pod Okra

Very early, dwarf and immensely productive, continuing to bear throughout the season, pods deep green, tender and of the very best quality, unlike most other varieties, retains its brittleness when

pods are 5 to 6 inches long as may be observed from photo illustration. Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 30c; lb. 75c.

Mr. Jacob Kurtz, a Louisville market gardener who purchased seed from us last spring says that it is the best okra he has ever grown or eaten and that when first put on the market, it was hard to sell on account of the long pods, the customer thinking they were tough. However since they tried it, he was unable to supply the demand the latter part of season at 75c per peck with pods averaging 3 to 4 inches long. He also says that it does not cook slimy like other varieties.

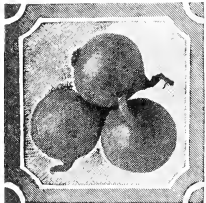

BUNTON

BUNTON

FOR

BEST

SEED CO.

Washington Asparagus.

ASPARAGUS

CULTURE—Sow seed in drills about 18 in. apart early in Spring or Fall after soaking in warm water 1 to 2 hours. Thin plants out to 3 inches apart and give frequent thorough cultivation, keeping plants clean from weeds. Roots can be transplanted either at one or two years old either in the Fall or Spring. The roots should be transplanted into a permanent bed in the richest soil that you have, harrow and work very deep. Open a trench about 15 inches deep and put in about 8 or 9 inches of well rotted manure, cover it with a few inches of soil and then place the root with the crowns facing one way about 12 inches apart and cover with 4 inches of soil, rows 5 feet apart. The growth should be cut in the Fall of the year and a top dressing of stable manure should be applied, this to be worked into the soil in the very early spring. It is also advisable to sprinkle a little salt over the bed. Only light cuttings should be made the second year. After the cutting season is over it is advisable to spray with a combination of Bordeaux and Arsenate of Lead which will prevent rust and also kill the Asparagus Beetle.

100 roots will set a row about 150 feet. An ounce of seed will plant a row about 50 feet long, 2 lbs. to the acre.

MARTHA WASHINGTON. A variety practically free from rust and other diseases, but is also larger and more vigorous. It grows large, straight shoots. It has a tight pointed bud and does not branch out until well beyond the time for cutting. This variety is especially adapted for market purposes, also very fine for home gardens.

PALMETTO. An old standard variety for all purpose. It is a vigorous growing dark green variety with pointed tips and very early.

BROCCOLI

CULTURE—Same as Cauliflower or Cabbage.

WHITE CAPE. An excellent variety forming rather loose heads of a creamy white color and of a good flavor.

EARLY GREEN CALABRESE. A comparatively new variety of Broccoli, rapidly becoming popular, both for market and home gardens. This variety produces a bluish green head at center of plant in about 90 days. After this center head is removed the plant produces many branches, each bearing small heads that are as desirable as the first head and usually continues to bear until frost. The heads with 3 to 4 inches of stem are used and served like either asparagus or cauliflower.

BRUSSELS SPROUTS

CULTURE—Sow seeds in cold frames or open ground. Transplant the same as cabbage in the early Spring and up to July. Make rows 3 feet apart, having the plants standing 15 to 18 inches apart in the row. Cultivate the same as Cabbage. An ounce will produce about 2,500 plants. Matures in about 125 days.

PERFECTION. Stems grow about two feet in height and are thickly set with sprouts forming small cabbage-like heads.

BUNTON FOR BEST SEED CO.

Burpee Stringless Green Pod.

BEANS

DWARF GREEN POD VARIETIES

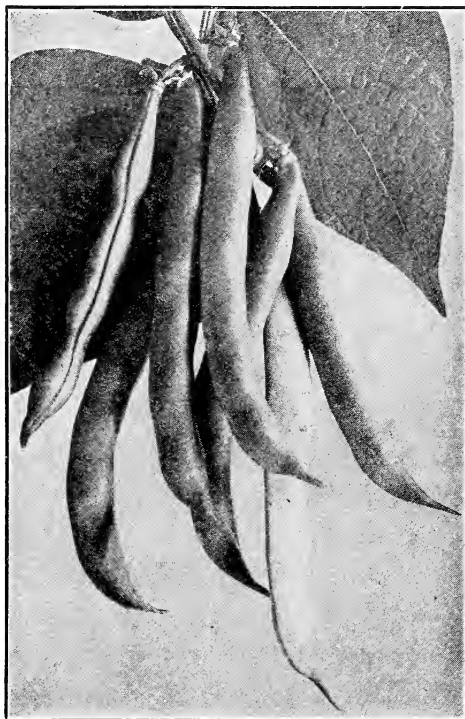

CULTURE—1 lb. will plant 200 feet of drill, 1 bu. to the acre. Bean foliage is very tender and should not be planted until after danger of frost. The first of May is usually a safe time to plant, most any soil will bear a good crop. A rich sandy loam will give biggest returns. Sow seeds in rows 18 inches to 2½ feet apart, dropping the beans 3 inches apart in the row, cover about 2 inches deep. Hoe as soon as seedlings appear. When they begin to form a second or third pair of leaves, hill the rows slightly toward the plant, repeat the hilling process as the plants grow larger. Bear in mind, however, that beans should never be cultivated while the bushes are wet with either dew or rain. For succession of young tender pods, sow every other week up to August 15th. A frequent picking of pods will keep the plants bearing. If the soil is not fertile, use B.-B. Lawn and Garden Grower which should be drilled in the rows before seeds are dropped.

B.-B. IMPROVED RED VALENTINE. Our B.-B. strain of this popular variety is without doubt the heaviest yielding of any of the early Dwarf Green Pod Beans. The pods are long, tender and almost straight, nearly round, smooth and of a healthy green color and have only a few strings when young. Can be picked in about 45 days from time of planting. The plant is a strong and vigorous grower, holding the pods well up off of the ground. In recent years this strain has become immensely popular with the market growers for early and medium early planting. See page 8 for prices.

BURPEE STRINGLESS. The pods of this variety are absolutely stringless in all stages of

growth from the time the first pod forms until full grown and ready to dry up. They are very crisp, tender and of fine flavor. The pods are also thick and meaty, round and slightly crease-back; comes into bearing in about 45 days. It is a very profitable bean for the market gardener and we strongly recommend it for home gardens.

BOUNTIFUL. Considered the most productive flat green podded stringless bush bean. The plants are very vigorous and disease resistant. Pods average 6 inches long by ¾ inch wide, are thick through and of a light green color. They are very brittle and absolutely stringless at all stages. Under favorable conditions the first picking can be made in 45 to 50 days from time of planting. Prices page 8

B.-B. Improved Early Red Valentine.

EXTRA EARLY BLACK VALENTINE. The seed of this variety are black, the pod dark green and about six inches long, slender, round and nearly straight, stringy, fibrous and fine grained. It gets tough very quickly, however it has the following good virtues: Being very hardy, it will stand early planting and shipment to a long distance.

FULL MEASURE. A very fine, early, stringless variety. The pods are medium green, round, straight, and about six inches long and of a very good quality. It is a very heavy producer and a profitable bean for the market gardener.

FRENCH'S DWARF HORTICULTURAL. The most attractive of the horticultural class. Vines very erect, straight and compact with a tendency to throw short runners. Pods 7 to 8 inches long, broad, stringy, fibrous and distinctly marked with crimson. We are sure that this will become a leading variety as a shell-out bean for the Louisville market.

Tennessee Green Pod.

If troubled with rust and similar diseases on your Beans, try planting two year old seeds.

BUNTON**B****F****B****SEED CO.**

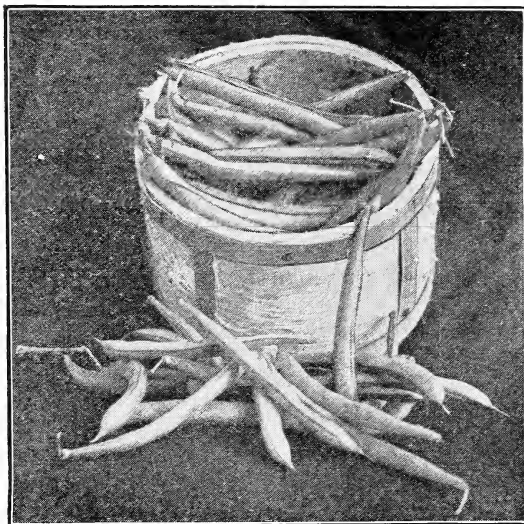

GIANT STRINGLESS. Pods of this variety are a little longer, straighter and more slender than Burpee Stringless and are very prolific. While it is a favorite variety for canning, it is highly recommended for market gardeners.

DWARF HORTICULTURAL, or ITALIAN. The pods of this variety are about five inches long and used extensively on this market as a shell-out bean. In the young stages it can be used as a snap bean; however, as pods begin to mature, they color up a greenish yellow splashed bright crimson.

TENNESSEE GREEN POD. One of the very earliest and most productive of the green pods, known in some sections as Dwarf Kentucky Wonder, pods 6 to 7 inches long, broad and flat, nearly stringless and of an exceptionally fine flavor. The plants are large and will continue to bear much longer than any other variety. The flavor of the bean is somewhat similar to that of the Kentucky Wonder. It is therefore highly recommended for home gardens and to those who want a dwarf green pod bean of an exceptionally fine quality and one that will bear over a long period of time.

DWARF, or BUSH BEANS
Wax or Yellow Podded

CULTURE—Same as Dwarf Green Pod varieties.

PENCIL POD BLACK WAX. An improved prolific black wax, having beautiful yellow straight pods of from 6 to 7 inches long, well rounded, meaty and deeply saddle-back. They are always solid, brittle and entirely stringless and of excellent quality.

IMPROVED GOLDEN WAX. The pods average five inches long and are quite fleshy, straight, broad, flat, and of a rich golden yellow color. Absolutely stringless at all stages. Vines grow erect and bear the pods well off the ground, thus preventing rust and rot.

SOUP, or SHELLED BEANS

DWARF WHITE NAVY BEANS. The most popular of all varieties used as a shelled bean. They are snowy white and very uniform in size. Our stock of this variety is carefully selected. They should not be planted before 1st of July on account of bean weevil.

DWARF RED KIDNEY BEANS. A very large Kidney shaped deep red bean. Distinctly flavored, and a heavy producer.

DWARF WHITE KIDNEY BEAN. Very similar to Red Kidney, differing mostly in color and flavor.

BUNTON

FOR

BEST

SEED CO.

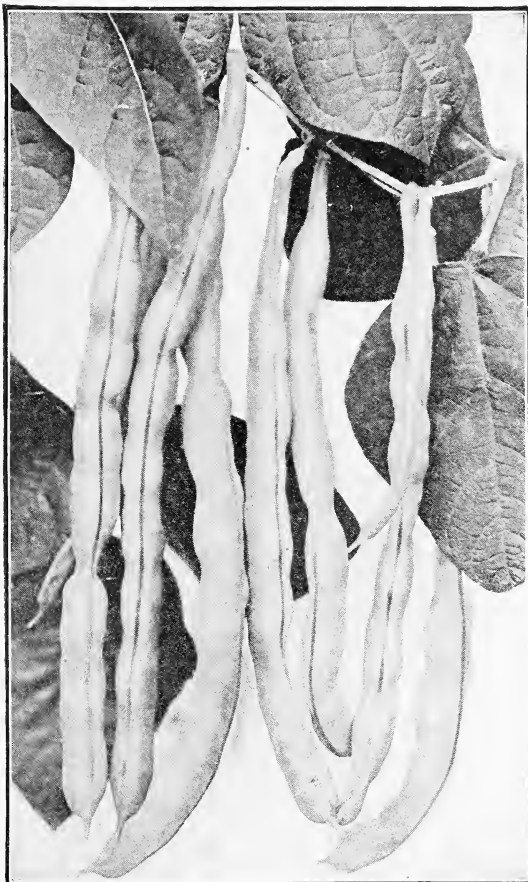

POLE or RUNNING SNAP BEANS

CULTURE—These should be planted about the same time as the dwarf varieties in hills 4 feet each way. If not convenient to secure poles, a trellis can be made by placing a good strong wire 6 feet high between two rows and as beans begin to start a runner, tie small twine to the wire and run down and tie loosely to the bean stalk just above the ground. If well rotted manure is not convenient, enrich the hill with a liberal supply of B-B Lawn & Garden Grower. If planted in corn, wait until the corn gets 4 or 5 inches high before planting the beans as the bean is a faster grower than corn. Plant 2 beans to each hill of corn, thin out to one. 1 lb. will plant 150 hills.

MCCASLAN POLE. A very prolific white-seeded Pole bean. The pods are about 8 inches long, deep green, meaty, stringless and of excellent quality. It is a wonderfully fine bean for use in green stage or as a winter shelled bean.

WHITE KENTUCKY WONDER. The very earliest white seeded variety, pods 6 to 7 inches long, round, nearly straight, tender, fleshy and stringless, and of excellent quality. While this is an excellent snap bean, it also makes a very fine dried bean for winter use.

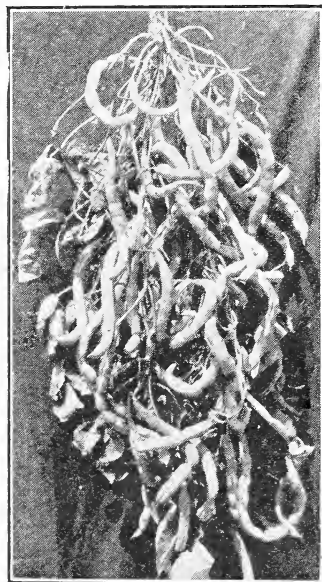

LAZY WIFE. A late productive sort having medium green pods 6 inches in length, broad, flat, stringless, fleshy, brittle and of excellent quality. Dry beans, round and white.

Kentucky Wonder or Old Homestead.

IMPROVED KENTUCKY WONDER, or OLD HOMESTEAD.

Without question the best flavored of all beans in cultivation. Kentucky Wonder combines size, quality, and productiveness. The long pods are generally borne in clusters of two or four individual pods averaging 7 to 8 inches long. They are deeply saddle-back, very fleshy and perfectly stringless at all stages of development. It is the custom of a great many growers to plant this variety in corn, however the yield will be much heavier if planted alone and vines supported by poles or some other trellis.

Striped Creaseback

RED SPECKLED CUT-SHORT. A very popular variety for planting with corn, producing an abundance of straight, flat, light green pods 3½ to 4 inches long, the pods being produced in clusters, making it a very easy bean to pick.

NANCY DAVIS or STRIPED CREASEBACK. A vigorous and productive bean that bears quantities of fleshy pods nearly 8 inches long and so round and fat as to be distinctly crease-backed. A fine bean for either the home garden or market, and particularly fine for growing in corn.

WHITE CREASEBACK. Very early and moderately productive, pods 5 to 6 inches long, light green, uniform, round and slender, slightly stringy; beans small, oblong and white. Is used quite extensively as a dried bean for winter use.

HORTICULTURAL, or SPECKLED CRANBERRY. Is grown exclusively for shell bean unless used while quite young, pods straight, flat and are about 5 inches long, pale green becoming streaked with red when matured. The beans may be used either green or dried.

BUNTON

BUNTON

FOR

BEST

SEED CO.

BUSH LIMA BEANS

CULTURE—These should not be planted until the ground has become thoroughly warm, should be sown in well enriched land with the rows 2½ feet apart, dropping the beans 10 inches apart in the row, eyes down. The beans should be well hilled to hold the pods off the ground. B.-E. Lawn and Garden Grower supplied at the rate of 10 lbs. to every 100 feet of row will materially increase the yield. This can be done before or after planting. 1 lb. will plant about 150 feet of row, ¼ of a bushel to the acre.

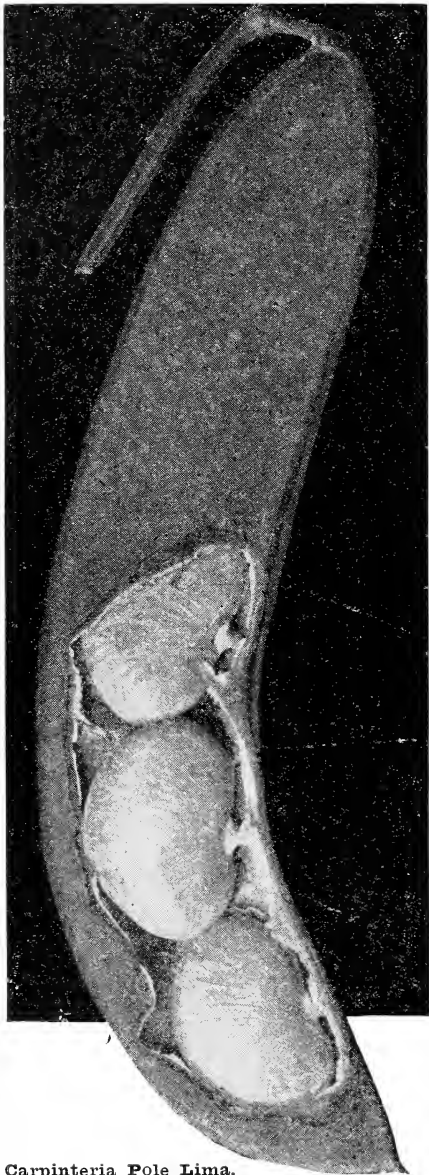

BURPEE'S BUSH LIMA. Plants large, sturdy, hardy and productive; pods 4 to 4½ inches long containing 3 to 4 beans which are as large as any pole sort, flat and white.

FORDHOOK BUSH LIMA. Generally considered the best of the large seeded bush lima varieties. Bushes of strictly erect habit, branching freely with all the branches held upright. From 4 to 6 days earlier than other varieties of this class. Pods about 5 to 6 inches long, are found in clusters of 4 to 8, and are well filled with 4 to 5 delicious large beans that are rather thick and of a greenish color.

BURPEE'S IMPROVED BUSH LIMA. A true and improved bush form of the large white lima pole bean with an extra large seed. The plants are vigorous and productive with very large pods 5 inches long and usually contain 4 large thick beans of excellent quality. Seeds show a greenish white tint, making it a very desirable bean for market purposes, also for the home garden.

WOOD'S PROLIFIC BUSH LIMA. This is a small seeded variety, very early and productive; plants grow about 20 inches high and bear continuously throughout season. Seeds are white and used extensively in some sections as a winter dried bean.

HENDERSON'S BUSH LIMA. Possibly the earliest of the bush lima beans. Seeds are a little smaller than the Wood's Prolific. It is very productive, and a very popular variety with the home garden as it is a sure cropper.

Carpinteria Pole Lima.

Fordhook Bush Lima.

POLE LIMA BEANS

CULTURE—Sow when the soil becomes warm and dry. They are more tender than the snap beans. They should be planted with the eyes down, about 3 to the hill, the hills about 3½ by 3½ feet each way. These should be trellised the same as the Snap Pole Beans. Unless the ground is very fertile, each hill should be supplied with at least a half gallon of well-rotted manure. 1 lb. will plant about 100 hills, allowing about 6 beans to the hill, which should be thinned down to 3 plants, after 6 ins. high.

CARPINTERIA GREEN-SEEDED. Vines of strong, vigorous growth, setting many pods, which are closely filled with large, flat beans, much thicker than those of the ordinary Pole Lima. Pods contain 4 to 5 beans, which retain the green tint in the dry stage.

EARLY LEVIATHAN. The earliest of the large-podded sorts. The pods are 5 to 6 inches in length and often contain 5 to 6 large, flat, pale green beans of excellent quality. It is a very early producing variety.

KING OF THE GARDEN. An old standby of vigorous growth, bearing large dark green pods with 4 to 5 large white beans, excellent quality.

EXTRA EARLY JERSEY. Early and very productive. Pods contain from 3 to 4 large beans.

SMALL LIMA, or SIEVA. Early, small, but fine flavor. Makes an excellent dried lima bean for winter use.

"Cheap Fertilizer, is most expensive."

Garden Beets

CULTURE—One of the earliest vegetables the garden yields and one of the first to be sown or planted in the garden. Beets should be drilled in rows and covered about ½ inch deep, soil should be packed firmly after seed is covered. After plants are up about 3 inches high, thin out to 3 inches apart. The rows should be about 14 inches apart. The soil should be loamy and fertile, and well pulverized before seeding. For an extra early supply, sow seeds in hotbeds or cold frames about the middle to the last of February and transplant to open ground about the first of April. In order to have a fresh supply of young tender beets, they should be sown every two weeks up to the middle of July. 1 oz. to 50 feet. of drill; 5 to 6 lbs. to the acre.

EARLY WONDER. A selection from the Crosby's Egyptian, very early, uniform and nearly globed-shaped with small top and tap root. Skin dark red, flesh deep blood red with little zoning.

IMPROVED CROSBY'S EGYPTIAN. A favorite variety with most market gardeners. Our improved strain of this variety makes it desirable for that purpose as it is practically a globe shape, being a little deeper from top to base. Color is a dark red. It is extremely early and has a medium size top. The skin is very smooth, flesh dark, very sweet and tender.

B.-B. BRIGHT CROSBY. This newly developed strain of the Crosby Egyptian is meeting with much favor with market gardeners who like a beet that is bright blood red, and one that shows up well after being bunched and washed. In some markets it sells much better than the dark skin varieties. It is very smooth and handsomely shaped.

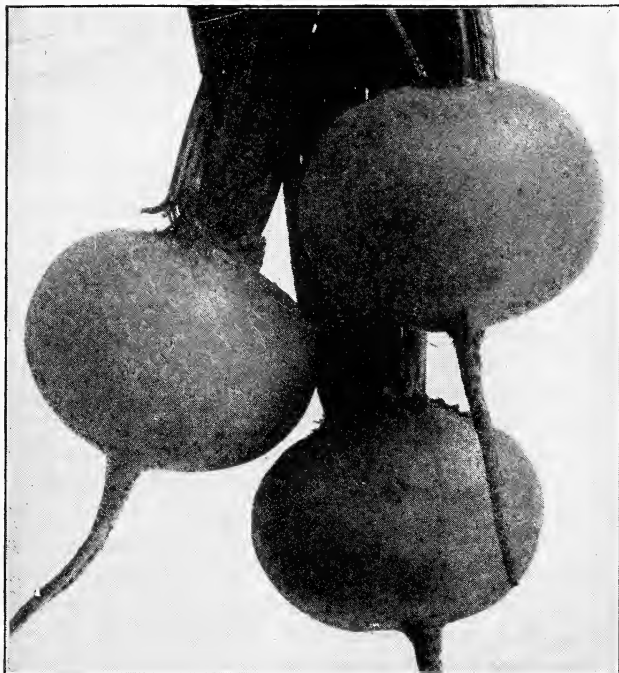

Detroit Dark Red.

EXTRA EARLY DARK RED. A fine selection of blood red beet, extremely smooth and of symmetrical growth, fine rich color, and of desirable shape. Shape is nearly round and color of flesh a rich blood red. The tops are small and erect. It is very early, being ready for market a few days ahead of the Crosby's Egyptian.

IMPROVED EXTRA EARLY ECLIPSE. Not quite as early as Crosby's Egyptian, however a very desirable variety for home or market garden. The roots are somewhat top shape and are brighter in color than the Crosby's. The flesh is a bright red and slightly zoned with pink, very sweet, crisp and tender, has a medium size top and makes a splendid variety for bunching.

DETROIT DARK RED. One of the most popular red turnip beets for market gardeners or home use. Being a second early, is used extensively as the main crop variety. The tops are of medium size, fruits very uniform in shape, flesh deep red, very crisp, tender and sweet.

EARLY BLOOD TURNIP. Very uniform, roots always smooth, round and handsome, tops small, of good marketable size and among the best for table use. Color dark, flesh crisp, tender and sweet; good keeper.

Early Wonder Beet.

BUNTON **B** FOR **B** SEED CO.

MANGELS, or STOCK BEETS

Mammoth Prize Long Red Mangel.

CULTURE—All mangels require a rich soil, in order to grow well should be thoroughly cultivated, the seed should be covered about 1 inch. Sow in May or June in rows 2 to 3 feet apart, thin out so plant will stand 8 inches apart in the row. Harvest before freezing weather.

MAMMOTH PRIZE LONG RED. A favorite with the farmer and dairyman. It grows to an enormous size and gives 30 to 50 tons to the acre. Roots nearly cylindrical in shape, light red, growing well above ground; flesh white and rose colored.

GOLDEN TANKARD. Very productive and sweet, flesh yellow, top and neck very small, easily pulled and especially relished by sheep and cows.

SWISS CHARD

CULTURE—Sow 14 inches apart and 1 inch deep early as ground can be worked. When large enough thin out to 10 or 15 inches apart. To assure prompt and even germination, the soil should be pressed firmly on top of seed.

LUCULLUS. Plants grow about 2 to 2½ feet tall and consist, when fully developed, of about a dozen creamy white beautifully curled leaves. These leaves are carried on broad thick stalks. The stalks are almost white and after trimming, can be cooked and served like asparagus. The leaf part can be cooked like Spinach or Kale Greens, however if desired the stalk and leaves can be boiled and served in the same manner as Spinach or Greens. Chard is becoming more popular each year.

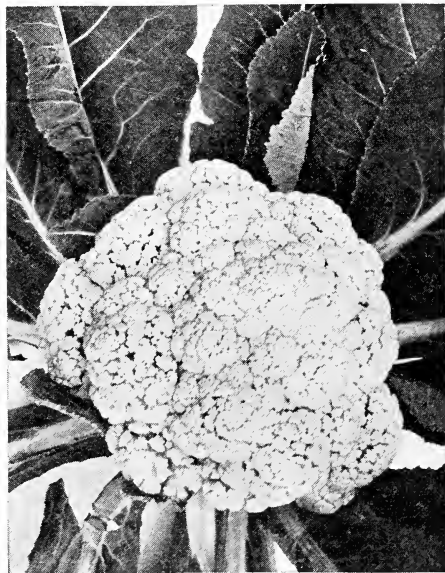

Lucullus Swiss Chard.

CAULIFLOWER

CULTURE—Raise plants by sowing in hotbed or greenhouse during January or February. Transplant in cold frame 2 or 3 inches apart each way, set in open ground as soon in Spring as ground can be put in good order. It requires a rich soil, well supplied with humus and moisture. During dry weather, especially when the plants are heading, a light side dressing of Nitrate of Soda will be of much help. Set plants 18 inches apart in rows 2 feet apart. When the heads are formed, they should be bleached by drawing the leaves together and tying with soft string or rubber band. 1 oz. of seed produces about 2,000 plants.

B.-B. EARLY SNOWBALL. We consider our strain of this variety second to none which comes direct to us from one of the very best growers in Denmark. The heads are very early, of medium size, firm, compact, solid and very white; plant compact in growth with few short upright leaves.

B.-B. Early Snowball Cauliflower.

CHINESE CABBAGE

CULTURE—For spring crop sow seed in beds, transplant and cultivate the same as early cabbage. For fall crops sow seeds about 15th of July.

PE-TSAI. This produces long, slender, very solid head often measuring 20 inches in height and closely resembles in the habit of growth the Cos Lettuce. The outer leaves are light green, inside is of a beautiful cream yellow which are very tender and of a delicious flavor.

BUNTON**BUNTON****FOR****BEST****SEED CO.**

CABBAGE, B-B. Select Stock

CULTURE—For early crop the seed should be sown in hotbeds or in boxes in the house in December or January. Summer crops can be sown outside and then transplanted where they are to remain. Plants should be transplanted in good, rich, clean, light soil in rows 2½ to 3 feet apart, plants 14 to 18 inches apart in the row, according to the variety of cabbage. Early Cabbage should be planted close together, the later ones farther apart. 1 oz. of seed will produce from 1500 to 2000 plants.

EXTRA EARLY JERSEY WAKEFIELD. A well known and extra early popular variety. Heads cone shaped and very solid and extremely uniform in both green color and size. It is usually the first cabbage on the early market.

B-B SPECIAL CHARLESTON WAKEFIELD. It is not quite as large as the regular Charleston Wakefield, but will mature several days earlier.

CHARLESTON WAKEFIELD. This variety is about one week later than Jersey Wakefield, but the conical heads are fully one-half larger. Its exceeding hardiness, earliness and size of head have made it very popular with market gardeners. Also a splendid early variety for home garden.

B-B. GOLDEN ACRE. Is the big money-maker for the early market grower, and without question the earliest and most uniform in maturity of all cabbages. **B-B. Golden Acre** heads are round, very firm with few outer leaves, which permits close setting in the rows. The growth is rather dwarf and compact.

EARLY FLAT DUTCH. This is an old standard variety that needs little introduction. It is a medium early variety, growing a large flat head on a short stem.

B-B. Golden Acre.

GLORY OF ENKHUIZEN. One of the best for second early or main crop. The heads are large, round and solid, usually weighing 8 to 10 pounds. It is an excellent summer crop variety.

SOLID SOUTH. A very desirable cabbage of intermediate season, adapted for autumn as well as late summer use. The heads are nearly round, are somewhat flat, very solid and of excellent quality.

LOUISVILLE DRUMHEAD. Our seed of this splendid and popular variety is grown by one of the best growers in this vicinity from carefully selected heads of true type. It is the most popular of all varieties with the local market gardeners for late or main crop. Stands summer heat splendidly and produces large, firm, broad, flat heads, fine grained and sweet.

MAMMOTH RED ROCK. This variety is the most popular of the Red variety. It produces a very solid head weighing about 10 pounds, of intense dark red color. Is used very largely for pickling on account of its excellent flavor and attractive color.

LATE FLAT DUTCH. A justly popular and esteemed variety; heads large, round, flat, and very firm; has medium stem and is very hardy.

Glory of Enkhuizen.

SUCCESSION. This is a very popular, sure-heading, second early variety. The heads are very large, firm and nearly round. It is used very extensively as a summer variety.

LARGE LATE SUREHEAD. An exceptionally fine late variety, heads are large, round and slightly flattened, very hardy and fine grained, a splendid keeper.

COPENHAGEN MARKET. A splendid extra early round-headed sort which matures as early as the Charleston Wakefield. The heads are large and round and unusually firm, averaging 5 to 8 pounds in weight; stems short; it has few leaves and is of an upright growth. It can be planted as close as Charleston Wakefield.

BUNTON

BUNTON

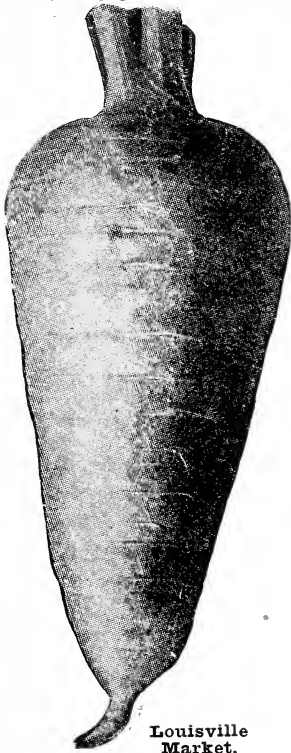

FOR

BEST

SEED CO.

CARROT

CULTURE—For early crop sow as soon as the ground can be worked and for later crop from the beginning of May until the latter part of July, rows 12 to 14 inches apart and $\frac{1}{2}$ inch deep, thin out the young plants to 3 inches. Carrots will do well in almost any soil; however, the better the soil, the better the carrot crop. One ounce will sow 100 feet of drill.

Louisville Market.

LOUISVILLE MARKET. A most excellent medium early, half-long variety; is one of the best in quality for market. Tops are medium size with small necks. The mature roots are thick, 5 to 6 inches in length, uniformly half-long, stump-rooted and taper slightly, smooth, deep orange-red in color. This variety is used extensively for bunching.

NANTES. This is a very popular medium-early variety for home gardens and market; the roots are 5 to 7 inches long, nearly cylindrical, with remarkably small neck, blunt-ended, smooth and of bright orange color; almost coreless and tender throughout. You will like the distinct flavor of this Carrot.

IMPROVED DANVER HALF-LONG. It is stump-rooted and succeeds well on most all classes of soil. Tops of medium size, roots deep orange, large, but of medium length, tapering uniformly to a blunt point, smooth and handsome. Flesh sweet, crisp and tender. It is a very heavy yielder and while it is one of the leading table sorts it is also used a great deal for stock feed.

IMPROVED LONG ORANGE. An intermediate season standard sort, roots 12 inches long, about 3 inches broad at the crown, tapering rapidly to a point, deep orange color. It is a very heavy yielder and requires a deep soil. While a good table variety, it is also recommended for stock feed.

CHANTENAY. An excellent medium early half-long stump rooted variety, root about 6 inches long tapering toward base and running suddenly to a point, very smooth and of a deep orange red color highly recommended for market or home garden.

OXHEART. A rapid growing, short thick carrot. The mature roots are $4\frac{1}{2}$ to 5 inches long; very thick at shoulder and gradually tapering, ending abruptly to a small tap root. The orange colored flesh is very sweet and tender. The short length of the Oxheart makes it more desirable for stiff hard soils than the longer rooted varieties.

CELERY

CULTURE—It requires rich, loamy, moist soil. In early Spring, drill the seed in rows about 12 inches apart. As the seed is rather hard to germinate, the soil should be firmly packed after a very light covering and watered frequently. They should then be transplanted from the 1st to the middle of July in rows 3 feet apart, and set 6 inches apart in the rows. At the time of planting, care should be taken that the roots are firm in the ground. In home gardens, celery is often planted in double rows, that is, 2 rows 10 inches apart, then 3 feet to the next 2 rows, which provides ample soil for hilling which is necessary for blanching and whitening. In hilling, care should be taken not to cover the crown of the plants. 1 oz. will produce about 3,000 plants.

GOLDEN PLUME, or WONDERFUL. A comparatively new variety closely resembling the Golden Self-Blanching in crispness and flavor. It is larger and a more rapid grower. The plants are semi-dwarf and resist blight and other celery diseases much better than other varieties. It is unequalled in quality, it has a very pleasing appearance and commands ready sale. We highly recommend this variety for market or home garden.

GOLDEN SELF-BLANCHING. We consider this variety second to the Golden Plume. It is very early, plants compact and stocky, very thick, fine flavored; when blanched is of an excellent golden yellow color.

WHITE PLUME. A very early maturing variety, easily blanched and of a beautiful silvery white color.

GIANT PASCAL. A compact, vigorous and productive variety and one of the best for winter use. Leaves upright and dark green. Stalks short, thick and very broad, blanching a beautiful yellowish white.

BUNTON

BUNTON

FOR

BEST

SEED CO.

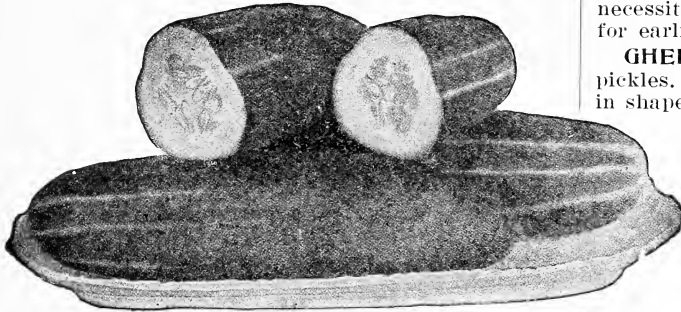

CUCUMBER

CULTURE—For very early cucumbers, sow seed March 15th in a hotbed. If paper bands are used, they can be transplanted without disturbing the root system. When weather has become settled and warm, sow seed in hills 4 to 6 feet apart each way. Thin out, leaving 4 of the strongest plants in each hill. They do best in rich loamy soil. For succession of this crop make plantings at intervals until July 10th. F-2 Dust is an effective remedy against insect enemies of this crop. This should be applied frequently with a duster.

B.-B. LONGFELLOW. Those desiring an extremely long, dark green cucumber should plant our Longfellow; it grows 12 to 14 inches long, handsomely shaped, and a beautiful dark green color, 2 to 2½ inches in diameter, making a splendid slicing variety.

B.-B. LONG WHITE SPINE. About one-fourth longer than the Improved White Spine and holds its dark bluish green color well, remaining edible for a long period after picked. It is fairly prolific and edible in about 60 to 62 days. We highly recommend this as a main crop variety.

B.-B. IMPROVED EARLY WHITE SPINE. No doubt the very best Cucumber for early mar-

B.-B. Improved Early White Spine.

ket. Will hold its intense dark green color better and remain edible longer than almost any other strain of White Spine. Ends taper, skin smooth, and its fruits are uniform and symmetrical, 8 to 9 inches long, very firm and crisp.

IMPROVED LONG GREEN. A standard cucumber for either slicing or pickling. It is extremely prolific, medium size, and for hardiness and disease-resistance it is the very best. The ends taper somewhat and it is slightly warted. The small pickles are well shaped, and in the slicing stage the fruits are very attractive.

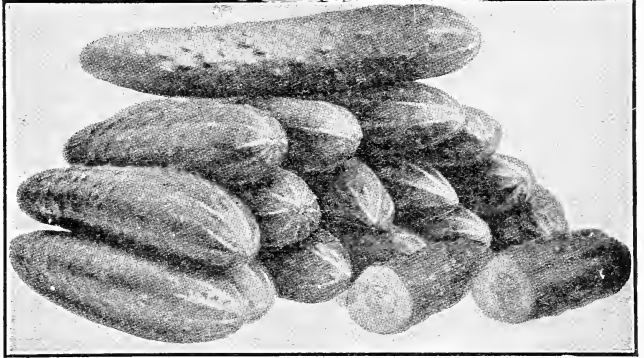

SNOW'S PERFECTION PICKLE. Somewhat like the Chicago Pickle except that it is smaller. It is one of the most smooth, symmetrical pickle kind we know of, and is highly recommended for its uniform early pickles. It is enormously productive and the square-ended pickles are very attractive.

Work Wonder Grower into hills before planting Cucumbers, it destroys soil insects and supplies Plant Food. See Page 59.

B.-B. Longfellow.

DAVIS PERFECT. A long smooth cucumber with pointed ends with excellent edible qualities. It is a deep green color when in slicing stage, medium late in maturing.

STAY GREEN. An early medium sized cucumber growing about 6½x2¼ inches. It is noted for its intensely dark green color which it retains for a long period of time. It is an enormous yielder and is highly recommended chiefly for early market where length is not a necessity. It is very doubtful if it is excelled for earliness, color and heavy yielding.

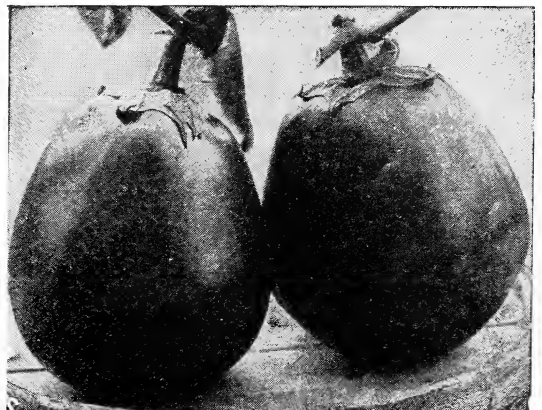

GHERKIN (Small). Grown exclusively for pickles. The fruit is very small, somewhat oval in shape, light green and covered with spines.

EGG PLANT

CULTURE—Thrives well in any good garden soil, seeds should be grown in hotbeds about middle of March and transplanted, when plants are sufficiently large, in cold frames. If paper bands are used, they can be transplanted to open ground when soil becomes warm without disturbing root system. They should be set about 2 ft. apart in 3½-ft. rows. 1 oz. will produce about 1,000 plants. Two-way Spray keeps bugs away.

BLACK BEAUTY. About one week earlier than the New York Purple and of a rich lustrous purplish black color. It is a distinct sort and a favorite where known. The plants are remarkably healthy in their growth and yield an abundance of large fruit. The fruits are entirely spineless and very attractive in appearance.

NEW YORK IMPROVED PURPLE. The strong bushes are larger than Black Beauty, keeping the eggs off the ground better. The large dark purplish fruit is heavy at the base, narrowing at the top.

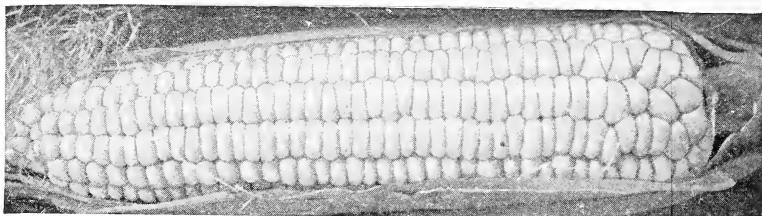

Black Beauty Egg Plant.

SWEET or SUGAR CORN

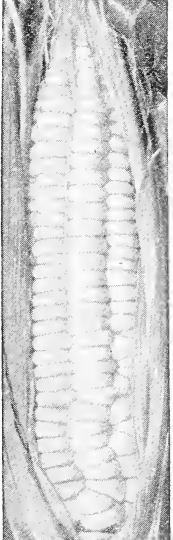

Home gardens are not complete without sugar corn. If possible, successive plantings should be made from beginning to end of season. The market gardeners should plant more sugar corn, as the demand for it is commanding a higher price than other roasting ears.

CULTURE—It is well to take chances in the home garden by planting a small quantity of Extra Early and Early Adams, early in Spring, however, if ground is too cold and remains so, the seed is liable to rot. Sweet Corn should not be planted until the ground is warm. Corn is mostly planted in drills, dropping one kernel every 6 inches and thinning out to 12 inches after the corn gets a good start. The rows should be from 3 to 3½ feet apart. Corn will succeed well on most any soil, however, will make more rapid growth by using a small quantity of a good commercial fertilizer. For succession of fresh roasting ears, a planting should be made every 10 days or 2 weeks throughout the season up until the middle of July.

E.-B. Bantam Evergreen.

GOLDEN SUNSHINE. The earliest of the Golden Bantam type, maturing a week to ten days earlier than that variety. More dwarf in habit than Bantam, with ears 6½ inches long, containing 12 rows of broad, yellow sweet grains, especially desirable for its extreme earliness and fine flavor.

Golden Bantam.

WHIPPLE'S EARLY. An extra early variety with deep grains of the Evergreen type, stalks usually from 5 to 6 feet high and of a vigorous growth. The ears are produced about 1½ to 2 feet from the ground, often 2 to the stalk, and are about 8 inches long, rather blocky in form, 16 to 18 and often 20 rows, filled to the end with rather narrow, deep grains of pearly whiteness and very sweet.

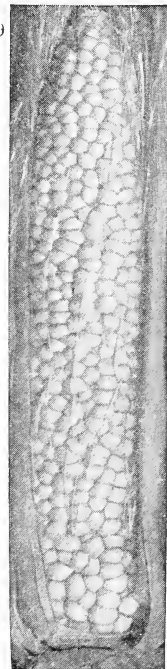

GOLDEN BANTAM. A very popular golden yellow color and of high quality, ears 6 to 7 inches long, 8 rows, and are filled from butt to tip with deep broad grains of attractive color and a most delightful flavor.

BLACK MEXICAN. One of the sweetest and best, ears 8 inches long and 8 rows, grains bluish black when ripe.

BANTAM EVERGREEN. This is a cross between the Golden Bantam and Stowell's Evergreen. A most excellent sort of fine quality. The ears are about 8 inches long, 12 to 14 rows; the grain is rather broad and deep and of a rich golden yellow color.

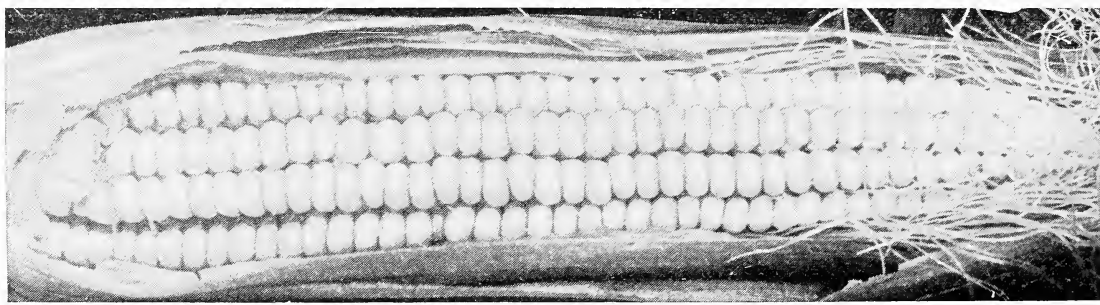

COUNTRY GENTLEMAN. An old standard second early variety, ears about 7 to 8 inches long, cobs small white and densely covered with long slender white grains without row formation.

STOWELL'S EVERGREEN. The standard and best known sweet corn, ears 8 to 9 inches long, 16 to 18 rows, with a very deep sweet grain. On account of its size and productiveness, no doubt the most profitable for the market gardener.

Country Gentleman.

Increase the demand by growing and marketing high quality Sweet Corn, in proper roasting ear stage.

CORN

Early Roasting Ear Varieties, Northern Grown

Seed Ear—B.-B. Select Extra Early Adams.

Early varieties, the stocks of which are carefully selected and grown especially for roasting ear purposes. The following five varieties are not sugar corn, however they are more hardy than sweet corn and can be planted earlier and come into the market before the sugar corn matures, therefore commanding the highest price.

B.-B. SELECT EXTRA EARLY ADAMS.

This variety is the first locally grown corn known to reach market. Our special

strain of this variety is the earliest that we know of, ears 5 to 6 inches long, stalks very dwarf; it is very hardy, standing early planting exceedingly well.

IMPROVED EARLY ADAMS. About one-third larger and one week later than the Extra Early Adams, stalk ordinarily grows about 6 feet high, ears 6 to 7 inches long.

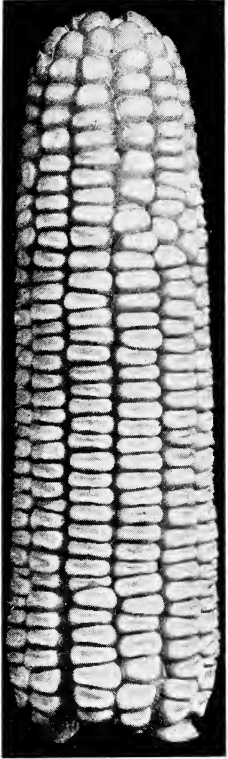

B.-B. TRUCKERS FAVORITE. This variety is very early, coming in pretty much the same time as the Early Adams. The ears are considerably longer and not quite as large in diameter. The husks have blades similar to sugar corn. The flavor is delicious and a ready seller on the market.

EARLY NORTHERN WHITE FIELD. This is a variety that has been grown in this section for a long time and needs very little introduction. It often has two ears from 9 to 10 inches and is ready for market a week or ten days after the Trucker's Favorite. This is not only a very valuable variety for market purposes, but is now being grown by a number of farmers

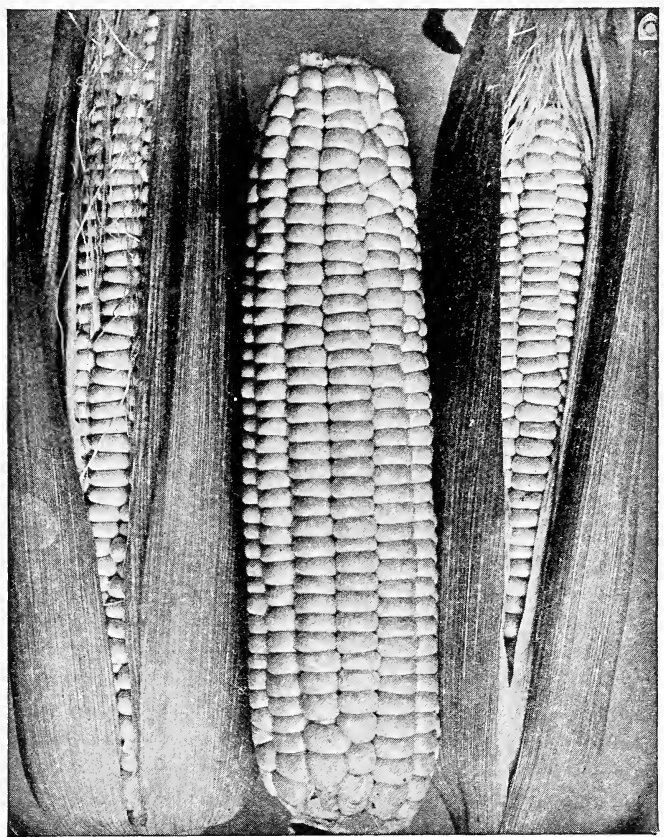

as an early feed variety. Our stock of this splendid variety is Northern grown.

EARLY SNOWFLAKE.

Unquestionably one of the best roasting ear corns to follow our B.-B. Truckers' Favorite or Early Northern Field. It is only a few days later than the Early Northern Field, maturing in 90

Improved Early Adams.

B.-B. Trucker's Favorite.

to 95 days. The ears are larger, well filled with pearly white grains that are fairly deep. The ear being large, the grower has the advantage of a profitable feed crop, if prices do not justify cutting for roasting ears.

BUNTON**BUNTON****FOR****BEST****SEED CO.**

ENDIVE

CULTURE—For early use, sow about the 1st of April; for late or Fall use, sow in June or July. This should be drilled in rows 14 inches apart and covered very shallow. When 2 or 3 inches high, thin out to 1 foot apart. To bleach draw the leaves together and tie with soft twine or use rubber bands. This should be done when plants are dry. It requires about 3 weeks for the plants to be properly blanched. 1 oz. of seed will drill about 100 feet row.

Green Curled Endive.

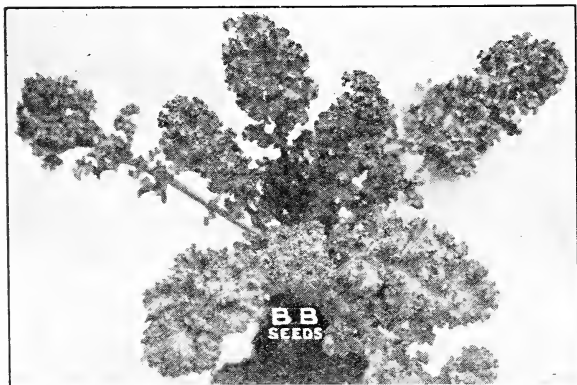

KALE

CULTURE—The large majority of Kale seed is sown during July and August for winter greens. The Siberian while not nearly so curly as the Scotch, is hardier and is seldom winter killed. The seeds are usually sown broadcast 3 lbs. to the acre. Some are very successful growing Scotch Kale in 18-inch drills. One-quarter to one-half pound is sufficient for the average family garden.

B.-B. SPECIAL DWARF CURLED SCOTCH.

This is a carefully selected strain of Scotch Kale which is very dwarf and spreading close to the ground. It is of a very deep green color and the leaves are more finely curled after light freezing weather. Our Special Scotch Kale is very hardy and will stand more winter weather than the Dwarf Green Curled Scotch. If seeds are sown in June or July, a strong growth will be made, enabling it to stand better during freezing weather. See page 5.

B.-B. DWARF CURLED SIBERIAN. A most vigorous and spreading variety. Leaves are large and rather plain in the center, with cuts and frills at the edges, color bluish green, very hardy, usually stands through winter in this latitude.

Kale, B.-B. Curled Siberian.

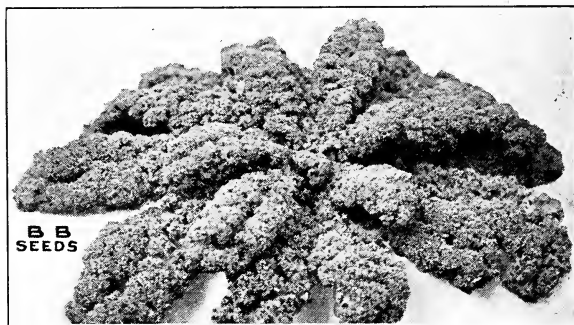

LARGE GREEN CURLED. The most hardy and vigorous sort, leaves bright deep green, readily blanches creamy white. A favorite variety with the market gardener.

FRENCH ENDIVE, or WITLOOF CHICORY.

The plant may be blanched in same manner as other Endives, however, it is mostly grown for use in salads. Sow seeds in early spring in same manner as parsnips, pull roots in the fall and store away until ready to replant. It is the sprouts from these roots that are used in salads, and they may be had all during the winter by planting the roots at intervals in sand or rich loam in warm cellar or under greenhouse benches. Set roots vertical 3 inches apart and cover 6 to 8 inches. It requires about 4 weeks for shoots to appear.

DWARF GREEN CURLED SCOTCH.

This strain of Scotch Kale is recommended for spring sowing when wanted for early summer or fall market. It is very dwarf, spreading close to the ground.

Kale, Dwarf Green Curled Scotch.

TALL GREEN CURLED SCOTCH. Has finely curled, long plume like leaves, borne near top of strong stalk.

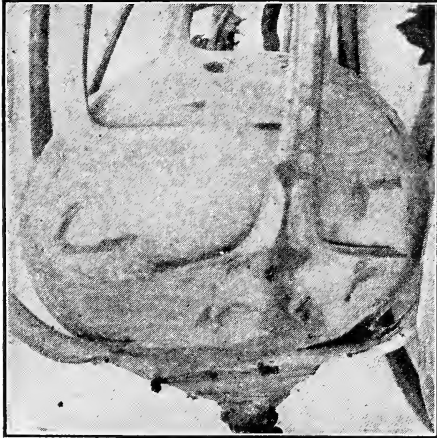

PLAIN, or SMOOTH. Smooth leaves, very early, used extensively for early spring sowing. It is a very rapid grower and usually the first on the spring market.

BUNTON **B** FOR **B** SEED CO.

Early White Vienna Kohl Rabi.

MUSTARD

The Curled Mustards are used extensively for greens. They grow very rapidly.

CULTURE—Sow in early Spring, June or July, in rows 1 foot apart or broadcast. Plants should stand about 4 inches apart. 1 oz. will sow 100 feet of row, 1½ lbs. to the acre.

SOUTHERN GIANT CURLED. Plant vigorous and hardy, of upright, sturdy growth; leaves large, light green, tinged yellow, much crumpled and frilled at edges. Very profitable variety for market gardeners.

FORDHOOK FANCY. A comparatively new variety that has long, slender, upright, finely curled leaves of a deep green color with edges deeply cut. The plant makes vigorous growth, stands a long time before going to seed.

WHITE LONDON. Plants of rapid, upright growth, rather small and smooth leaves; color deep green. Seeds large, cream color, often used as seasoning.

KOHL RABI

CULTURE—This vegetable combines the flavor of Turnip and Cabbage. It excels both in nutrition. It is very hardy and productive. Sow as early in the Spring as the ground can be put in good gardening condition. Drill in rows like Radishes or Beets. Thin out so they will stand about 4 inches apart in the row, having the rows about 18 inches apart. They are ready when bulbs average from 2½ to 3 inches in diameter. The thick outer skin should be removed before boiling. Serve like Turnips. One ounce of seed will sow a drill of about 100 feet.

American Flag Leek.

EARLY WHITE VIENNA. Extremely early, with few leaves and small top; bulbs are medium size, very light green, nearly white, and the best quality.

EARLY PURPLE VIENNA. Early and with small top. Bulbs medium size and purple in color. Flesh white.

LEEK

CULTURE—Sow about 1st of April in drills 1 foot apart ½ inch deep. When 6 or 8 inches high, transplant into deep rich soil in rows 12 inches apart and 4 inches apart in the row. Set as deep as possible so the plants may be covered and blanched. Draw the earth up to them gradually as they grow. Plant 1 oz. to 100 feet of drill.

AMERICAN FLAG. Produces a large thick stem, and is of mild flavor; the leaves are short and the plant is very hardy; suitable for planting either in the spring or fall.

B.-B. LETTUCE

CULTURE—For very early crop, seed should be sown in hotbeds and transplanted in open ground fairly early in the season. They are hardy and will stand quite a bit of cold weather. The loose heading varieties do well very often when sown broadcast. One habit is to sow in 1 foot rows and thin out when the plants begin to spread to 3 inches apart. Heading varieties should be sown very early in the Spring in drills 12 inches apart. After well up thin out to 8 inches apart in the row. Cultivate often and if ground is not very fertile, use Nitrate of Soda or High Grade Fertilizer which will add to the crispness of the Lettuce, by giving a rapid growth. 1 oz. will make about 600 plants or sow about 300 feet of row.

B.-B. GRAND RAPIDS. The favorite loose leaf for forcing under glass, does well for early planting outside, leaves exceptionally crumpled, border finely frilled, color very light green with no trace of brown. Our B.-B. Strain of Grand Rapids is unexcelled for greenhouse planting and is a money maker for those who plant it.

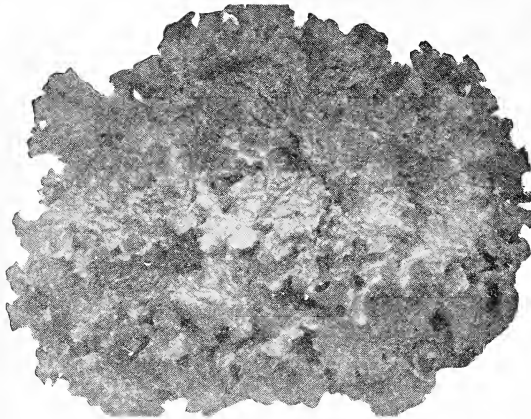

LOUISVILLE MARKET. A variety that is very popular, especially in this vicinity. The general appearance of this lettuce is very similar to Black Seeded Simpson. The texture of the leaves is somewhat thicker, consequently making a heavier lettuce, and does not seem to rot off as easily in hotbeds as the Simpson.

“Procrastination is a thief of time.”

Do it today, tomorrow may be too late.

B.-B. LETTUCE—Continued.

Grand Rapids. B.-B. Greenhouse Strain.

B.-B. NEW YORK HEAD. A very large, late, globular heading variety, leaves broad, of thick texture, fairly blistered and crumpled; border frilled; color clear dark green.

MAY KING. A handsome, small, extremely early, compact heading variety; leaves light yellowish green; the heart blanches rich golden yellow. It is a very sure-heading variety.

UNRIVALLED SUMMER. Very similar to Big Boston in form and habit of growth, differing in being of a slightly lighter shade of green and without the brownish tinge at the border. It is a very desirable variety for summer sowing.

BLACK SEEDED SIMPSON. One of the most popular loose leaf varieties, always reliable, leaves broad and crumpled and frilled at border, color light yellowish green.

IMPROVED HANSON. One of the most reliable, sure-heading sorts; heads globular, large and late; leaves large and very broad, fairly blistered and crumpled, borders finely frilled. Color clear light green, quality good. A fine variety for midsummer planting outside, as it stands the hot season better than most sorts and is a slow seeder.

BIBB LETTUCE. A waxy head variety with very deep green outer leaves, bleaching to a rich yellowish green inside; heads medium size and of distinct flavor. Very popular for family gardens and exclusive hotel trade.

CALIFORNIA CREAM BUTTER. Plant compact, head large and very firm; color deep green, outer leaves splashed with brown. The heads blanch a beautiful golden yellow.

B.-B. New York Head.

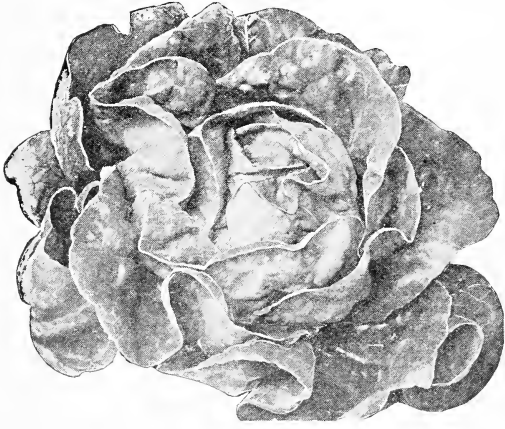

BIG BOSTON. Very popular for outside culture as well as cold frame; heads large and compact, leaves broad, almost smooth with waves at the edge; color a light green slightly tinged reddish brown; heart greenish white tinged yellow.

ICEBERG. A large, late, crisp, cabbage-heading variety; heads very firm, hard and well balanced.

SALAMANDER. Very reliable early sort; heads globular, firm and well blanched; leaves broad and crumpled; color medium green.

TRIANON COS. A medium large, strictly self-closing lettuce, making a well formed and firm, cone-shaped head; quality excellent.

CHICKEN LETTUCE. Affords an enormous amount of tender green food for poultry. The plant grows three to four feet high, loaded with leaves that may be pulled, or plant will continue to grow if not cut too close to ground.

If you have trouble getting lettuce to head try two or three year old seeds.

BUNTON FOR BEST SEED CO.

CANTALOUPEs, B.-B. Selected Stock

CULTURE—For early melons, seeds can be planted in plant bands and set in cold frames until after the danger of frost and then transplanted into the open ground in hills 4 to 6 feet apart each way. If possible, use well rotted manure in each hill. If seeds are planted in open ground, plant about 10 seeds in different parts of the hill just under the surface of the soil. When well up, thin out to 3 or 4 to the hill. It requires about 1 oz. of seed to 60 hills, or 2 lbs. to the acre. F-2 Dust is a very effective remedy against enemies of the Cantaloupe crop.

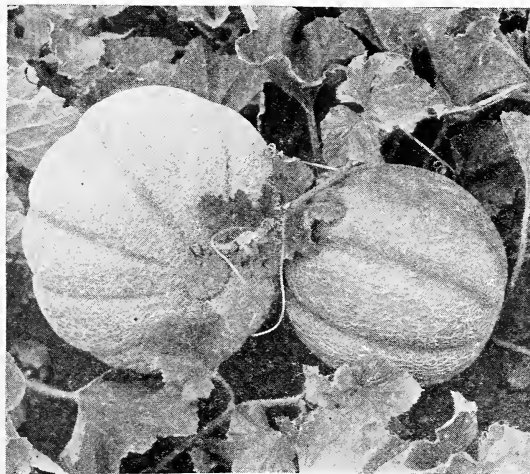

Haile's Best.

EDWARDS PERFECTO. A very Superior type of the Rocky Ford Melon, having a deep tinted Salmon flesh and exceedingly small seed cell, a firm hard gray netting and excellent shipping qualities.

POLLOCK'S 10-25. A salmon-tinted Rocky Ford. The flesh is light salmon in color at center, shading into a light green midway to the rind; fruit very uniform in size, nearly round and densely covered with a hard gray netting. This melon shows little or no rib.

GOLD-LINED ROCKY FORD. The fruit is small, almost round, smooth, showing no rib, densely covered with a hard gray netting; flesh thick deep green, showing a faint lining of pink or gold lining at the center. It has proven a very popular melon for the market gardener.

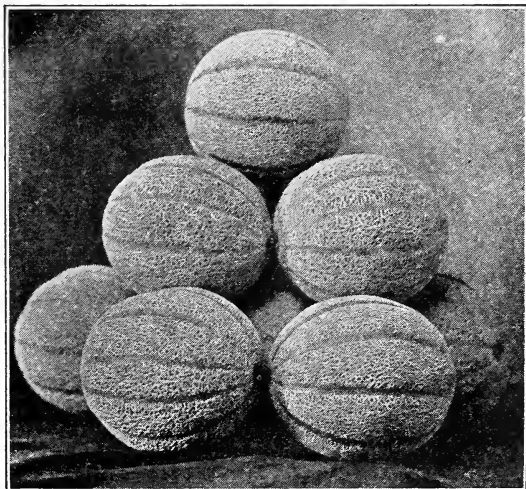

Netted Tip Top Cantaloupe.

B.-B. GEM. An extremely early, medium sized melon; fruit oblong, skin deep green, turning to a golden color at maturity. Densely covered with close gray netting; distinctly ribbed; flesh fairly thick and very sweet; color medium green, blending to a light pink near the center.

HEARTS OF GOLD. A splendid, small market or shipping variety; fruit round with tendency to heart-shape slightly ribbed and covered with a fine netting; flesh very thick, deep salmon color and of high quality.

NETTED TIP-TOP. Smooth, large, gray-green in color, round flattened at the ends, distinct rib, and well netted, flesh very thick, deep salmon in color and of the highest quality. Being netted and a very large melon, it is rapidly replacing the old Tip-Top.

B.-B. Gem "Selected."

BENDER'S SURPRISE. Closely related to the Netted Tip-Top, different from that variety in being more oblong, more full and rounded at the ends, not quite as well netted.

ACME. A fine, medium early, oblong, green-flesh variety of good size, closely netted and prominently ribbed.

HAILE'S BEST. A remarkably early variety. Melons are oval in shape, about 8 inches long by 4½ inches in diameter, with heavy netting and fairly distinct ribbing. Flesh exceptionally thick and deep salmon in color. A very profitable melon for the market grower.

MAKE MORE PROFIT ON MELONS BY USING HOTKAPS.

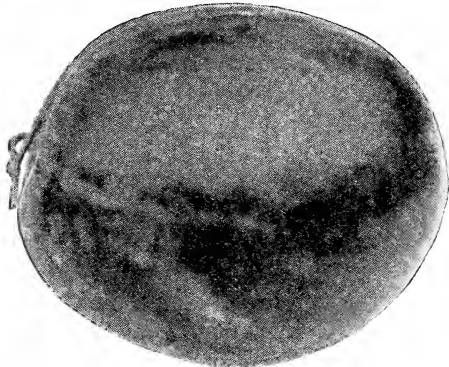

BUNTON FOR BEST SEED CO.

WATERMELONS, B.-B. Carefully Selected

CULTURE—When the ground becomes warm, plant in hills 6 to 8 feet apart each way. If possible, use a good shovel full of well-rotted manure in each hill, this should be 4 or 5 inches under the top soil. Plant 10 seeds to the hill and when plants are well up, thin out to three. Cultivate until vines cover ground, pinch ends of the growing shoots to induce early fruiting. 1 oz. will plant about 40 hills or $\frac{7}{2}$ lbs. to the acre.

B.-B. TOM WATSON. One of the best main crop sorts, being very highly recommended for market purposes, as it is a handsome, oblong, dark green melon and always demands the highest market price. The rind is very thick and tough; flesh rich red and of a very good quality.

IRISH GREY. A comparatively new melon, very popular for market or home garden. It is an oblong melon, growing to a large size. The flesh is red and crisp and free from strings, the rind is a mottled light gray green entirely distinct. It has a very tough thin rind.

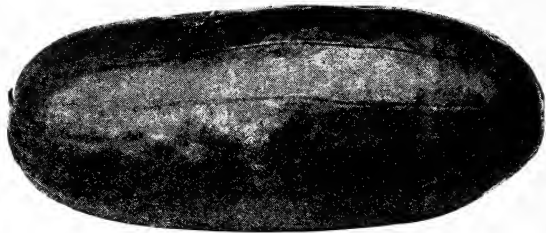

STONE MOUNTAIN. In just a few years it has reached first place with growers for both shipping and local markets. It has a medium green rind and a deep pink flesh. The flesh is very sweet and tender. It grows to a large size; almost round or square shaped.

B.-B. EXCEL. In recent years this has become the most popular melon with the local growers for market purposes. Very large, oblong shape, dark green rind, slightly mottled with a lighter shade, the rind is thick, flesh red, very crisp, tender, juicy. The seeds that we offer of this variety come from the very choicest of melons carefully selected and hand cut.

GEORGIA RATTLESNAKE. One of the old-timers that still remains good and is always a ready seller. This melon is oblong and grows to a very large size. In color it is light green, irregular, striped a dark green; flesh red, sweet, juicy.

B.-B. IMPROVED KLECKLEY'S SWEET is a much improved type of the Kleckley's Sweet, containing all the good virtues of the old melon in eating qualities; however more regular in size and shape, larger, more productive, and in every way a much better melon than the old Kleckley's Sweet. It is oblong and has an even dark green skin, rather thin rind and rich, bright colored flesh. It is a very profitable melon for market and especially highly recommended for the home garden.

FLORIDA FAVORITE. Early and oblong in shape and grows to a fair size, rind light green with an irregular stripe of a dark green; flesh red and of a fine quality. It has a rather tough rind of medium thickness.

HALBERT'S HONEY. A most excellent melon for the home garden. It is very early and one of the sweetest melons grown; it is claimed by a great many to be even sweeter than Kleckley's Sweet. Its delicious crimson red flesh extends nearly to the skin, the rind being very thin and brittle. The melon is long and its dark green skin gives a handsome appearance.

Okra, Onion, Parsley and Parsnips

OKRA

CULTURE—A vegetable that is very easy to grow in any garden. Is a very tender plant and seeds should not be sown until ground is warm. Sow in rows 3 feet apart, 3 to 4 seed per foot. Thin out when plants get a good start to 10 inches. 1 oz. to about 30 feet of drill, 4 lbs. to an acre.

WHITE VELVET. Plants about 3½ feet high, pods white, long, smooth and tender; early and productive. Very popular for market and home garden.

DWARF PROLIFIC. One of the earliest and most dwarf varieties; pods short, deep green, slightly corrugated; quality very good.

PERKINS MAMMOTH POD. Early and productive, the pods are deep green, very long, slender, slightly corrugated, very tender and of good quality.

BUNTON'S BRITTLE POD. For illustration and description see page 5

ONION SEEDS AND SETS

CULTURE—Seed should be planted very early in the Spring, in fact, one of the very first to sow in the garden. It is well to have the soil prepared the previous autumn. When sowing for sets, plant in drills 12 inches apart, 10 seeds to the inch, cover with about ½ inch of fine soil. If large onions are wanted from the seed, drop in drill about 1 inch apart and thin out to 2 after plants are about 4 inches high. If onion sets are used to grow large onions, plant in rows 12 to 14 inches apart and 4 inches apart in a row.

WHITE PORTUGAL, or SILVER SKIN. The bulbs are flat in shape and are very largely used for growing sets on account of their fine shape when small, and good keeping quality. It is grown very extensively for use in the green state as a bunching onion and is well liked for pickling.

LOUISVILLE YELLOW DANVER. This is a standard and extensively used yellow variety in this section for growing of sets. Skin is light yellow in color, bulbs medium large, slightly flattened, quite thick with small neck. Our seed of this variety is grown locally and preferred by many of the growers on account of its producing sets with better keeping quality.

JAPANESE, or EBENEZER. A recent introduction that is becoming very popular. The onions are very large, somewhat flattened, has attractive yellow skin and firm white flesh of delicate flavor. Sets grown from this variety have good keeping qualities.

RED WETHERSFIELD. A fine large flat sort of deep purplish red color, noted for its productiveness.

PRIZE TAKER. One of the largest Onions grown and the mildest, the bulbs are of globe shape and a light straw color.

YELLOW GLOBE DANVER. This Onion is much more popular and commands a higher market price than the flat varieties, its globe shape and being a heavy yielder, it is a very profitable Onion to grow, has excellent color, cures well.

Hollow Crown Parsnips.

PARSLEY

CULTURE—Sow in early spring in rows 12 inches apart, covering seeds about ¼ inch, pressing down the soil after covering. The seed is very slow to germinate, often requiring 4 or 5 weeks. It is advisable to soak the seeds a couple of days before sowing, which will hasten germination. The moisture can be retained by covering rows with boards or old bags. One ounce will sow about 150 feet.

CHAMPION MOSS CURLED. A strong, compact plant of a rich dark green, closely curled and one of the best both for decorative and flavoring purposes.

PLAIN. The leaves are flat, deeply cut, but not curled and very dark green in color.

PARSNIPS

CULTURE—Plant seed in early spring as soon as the soil has become warm. The rows should be from 14 to 18 inches apart, the plants 5 inches apart in the row. Cover seeds about ¼ inch. A rich loamy soil is best and should be loosened 10 inches deep. They are very hardy, the flavor being much improved by frost, and may be left in ground during winter and dug as wanted. One ounce will sow a 100 foot row.

LOUISVILLE SPECIAL. A favorite with the market gardener. Has a very deep hollow crown, rather top-shaped with small tap root, early, productive and excellent quality. This variety always commands the highest market price.

SUGAR, or HOLLOW CROWN. This is a long smooth variety growing from 10 to 12 inches long, very tender and sweet, and of an excellent flavor; color of a creamy white. We recommend this for home garden.

BUNTON

FOR

BEST

SEED CO.

B.-B. GARDEN PEAS

CULTURE—If weather conditions are favorable, smooth varieties are often sown in February. Any of the varieties can be successfully grown if planted during any of the early Spring months, March and April being preferred. By planting early, medium early and late varieties at the same time, a succession of fresh peas may be had over several weeks. Peas may be had in the Fall months by planting from July up until the middle of August. Plant in drills 2 inches deep and about 20 peas to the foot in rows from 24 to 36 inches apart, depending on the variety. 1 lb. will plant 30 feet of drill, 2 bus. to the acre.

Supreme
Peas

Single Plant of B.-B. Supreme.

B.-B. SUPREME. Has proven to many market growers that it is the **big money-maker** in the Large Dwarf Pea class. Remember three or four days often makes a difference in market prices. **B.-B. Supreme** gets there before Laxtonians, and is more prolific, pods as large and darker green; vines about same height. To our knowledge this pea has no equal in size, earliness, productiveness, evenness of maturing and eating qualities in the dwarf pea class. It is very sweet and tender. The large dark green pods are well filled and command the highest market prices.

B.-B. EXCELALL. This is one of our new specialties, being introduced this year, it is very productive and comes into bearing several days before the well-known Telephone. Vine 2 feet high, strong and vigorous; pods dark green, large, and well filled. We are confident that this pea will be among the most popular varieties in a few years. For prices, illustration and further description see page 3.

B.-B. IMPROVED CLAUDIT. The most popular of the smooth blue seeded varieties for market gardeners' use. The seed is about one-third larger than the old Claudit, and will stand planting as early as the Alaska. The vine grows about 20 inches high; pods deep green, 4 inches long, broad and saddled backed. It will mature from 3 to 5 days earlier than our B.-B. Supreme. It is a money-maker for the early pea grower.

THOMAS LAXTON. A very popular gardener's variety; height 2½ feet; vine and foliage moderately stout, medium green; pods medium green; 3½ inches long, straight, nearly round and square ended, containing 7 to 9 medium dark green peas of superior quality. Compared with Gradus, is a little earlier, more productive, but with a smaller less broad pod.

LITTLE MARVEL. An extra fine, dwarf, sweet pea. Grows about 12 to 16 inches tall. It is among the earliest of the wrinkled peas. It is very productive, pod dark green, about 3 inches long, round, with square end and often contains 7 dark green peas of high quality.

You can keep abreast of the times by watching for the newer and better kinds.

BUNTON FOR BEST SEED CO.

GARDEN PEAS—Continued

EXTRA EARLY ALASKA. The very earliest, smooth, green pea, height about 2½ feet; the pods are round, straight and square ended, containing six light green peas, very uniform in maturity. It is a very popular variety for home garden as well as for market garden purpose.

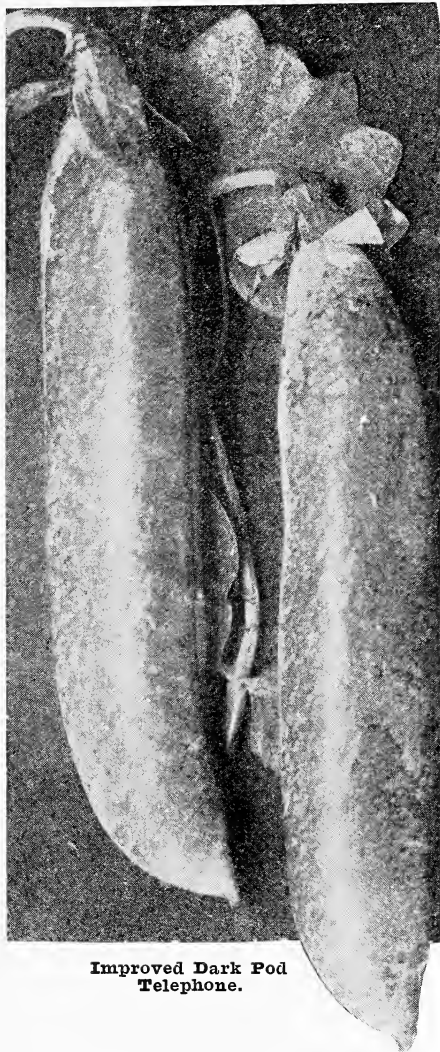

IMPROVED GRADUS. This is an improvement over the old type of Gradus, being slightly earlier, more dwarf, true to type and productive. The vines are moderately stout, medium green, pods medium green, 4 inches long, fairly broad, pointed and well filled with 7 to 9 very large, dark green peas of exceptional quality; only grows 2 feet high. This should become a very popular variety with the market gardener as second early. We especially recommend this for home gardens.

LAXTONIAN. A giant podded, early dwarf wrinkled variety. It is a real money-maker for the market gardener, being a few days earlier than Gradus and more dwarf. The pods are 3¼ to 4 inches long, dark green, containing 6 to 8 large peas of excellent quality. Our strain of this variety is unsurpassed. Height 16 inches.

LITTLE GEM. A very popular early dwarf wrinkled pea for the home garden; pods light green, 3 inches long, round, square ended and well filled with 6 to 8 peas of good quality; very productive; height about 18 inches.

SUTTON'S EXCELSIOR. An improvement on Nott's Excelsior with larger pods and greater productiveness: pods light green, 3½ inches long, straight, round, and square ended, containing 7 to 8 large light green peas of very fine quality; height 16 inches

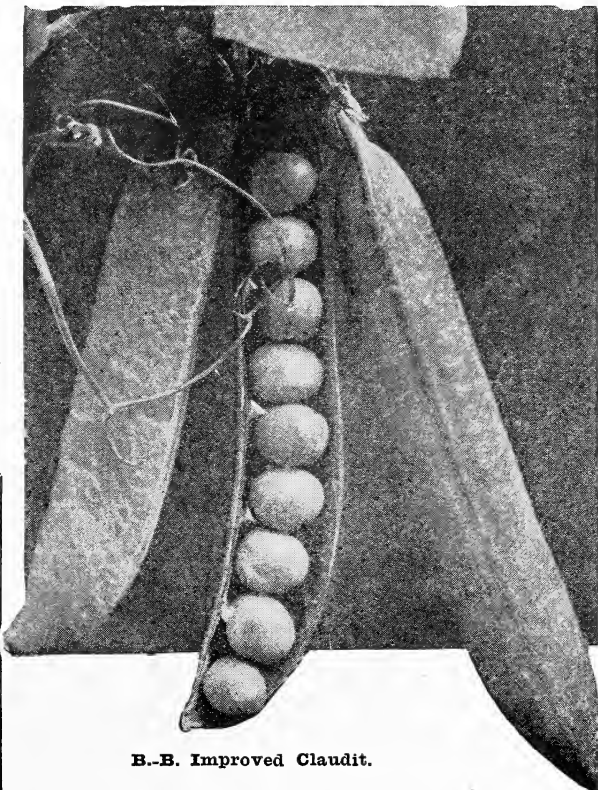

SUMMER QUEEN. A late wrinkled variety, strong and vigorous grower; pods a dark green, about 4 inches long, broad and pointed, containing 8 to 9 peas of good quality. It is a very heavy producer and a splendid variety for both home and market garden; grows about 3½ feet high.

Improved Dark Pod Telephone.

IMPROVED DARK POD TELEPHONE.

The pods are much darker than the old variety, the vines very strong and stout, growing about 4 feet high; pods 4¾ inches long, very broad, dark green, pods straight and slightly curved at the point; contains 9 large medium green peas of the finest quality. It is classed as a late variety, although is one of the heaviest yielding. It is a very profitable pea to plant as a second or third early, to come into bearing after Gradus, Thos. Laxton and such other varieties.

BUNTON FOR BEST SEED CO.

PEPPER

CULTURE—Sow in hotbeds in February or March and transplant outside in May 18 inches apart in 3-foot rows. When the ground becomes warm the seed can be sown outside and transplanted as above. A good garden fertilizer, if worked into the soil when plants are 6 ins. high, will materially increase the yield. 1 oz. will produce about 1,200 plants.

CRIMSON GIANT. One of the earliest of the very large sweet varieties; fruits oblong, three lobed, 5 inches long by 3½ inches in diameter; very mild, thick flesh.

ROYAL KING. Vigorous and productive, ripening large attractive fruits early in season; fruits deep green when young; flesh sweet, very thick, mild and fine flavored.

RUBY GIANT. A cross between Chinese Giant and Ruby King; fruits 4 lobed, 5 inches long by 3½ inches in diameter; flesh thick and mild.

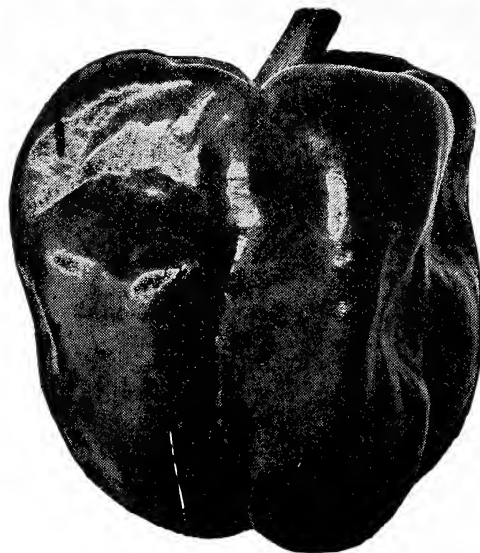

CHINESE GIANT. One of the very largest of the mild varieties.

OSHKOSH. A very distinct, large variety, during the growth pods are a rich deep glossy green, making an attractive sort to market as green peppers, the fruits are smooth and about 4½ inches long and 3½ in diameter, it is very productive and exceptionally sweet. Pods yellow when matured.

PIMENTO. A very thick flesh, heart-shaped, smooth, mild variety.

LONG RED CAYENNE. Fruits often curved and twisted; bright red, hot and pungent.

WORLD BEATER. A splendid variety for market gardening. The fruits are very large, flesh unusually thick, sweet and of a mild flavor, the color deep green when young, bright scarlet when ripe.

Harris Early Giant Pepper.

HARRIS EARLY GIANT. The earliest large sweet pepper and also very prolific. The plants are of vigorous growth, the peppers deep green turning to bright red and are 4½ to 5 inches long and about 3½ inches in diameter. Flesh thick and sweet.

RED CHILI. A rather small, bright red variety, pods about 2 inches long, cone shaped, very hot and exceedingly prolific.

RED CHERRY. Fruits erect, small, round or cherry-shaped, rich scarlet and very hot.

PUMPKIN

CULTURE—Sow in good soil in May when the ground has become warm in hills 10 feet apart each way or in fields of corn about every third or fourth hill, very often planted at the same time with the corn. 1 oz. for 25 hills, about 1 lb. to acre.

KENTUCKY FIELD. The most popular of all varieties for stock feeding and canning. Deep yellow in color, meat thick and grows to large size.

KING OF MAMMOTH. A very fine flavored pumpkin, being well adapted to this climate; very large meat, thick, outside deeply ribbed.

STRIPED CASHAW. Very large with solid crooked neck, very delicious for table when cooked and served like sweet potatoes. Flesh light yellow, very thick and sweet.

JAPANESE PIE. Shaped somewhat like the cushaws and grows to a large size, skin deep green with dark stripes, flesh deep yellow and of high quality.

SALSIFY, or OYSTER PLANT

CULTURE—Treat about the same as carrots except that Salsify is hardier and may be left in the ground all Winter. Sow in the early Spring after the ground has become warm in drills 14 inches apart and thin out to 4 inches in the row. Cover seed about 1 inch. 1 oz. to 75 feet; 5 lbs. to the acre.

MAMMOTH SANDWICH ISLAND. This variety is large and strong, growing with smooth, almost white tapering roots, has a mild and delicate flavor. The best sort for market gardener.

Mammoth Sandwich Island Salsify.

SEED CO.

B.-B. RADISHES

CULTURE—Sow in drills as soon as the frost is out of the ground. They should be thinned out to stand 2 inches apart in the row, rows about 12 inches apart. They may be sown successively until the last of August. 1 oz. of seed to 100 feet of drill.

White Tip Sparkler.

B.-B. EARLY SCARLET FORCING. The earliest of the forcing radishes. Is almost perfectly round, bright scarlet and with smallest possible top. We highly recommend this variety for forcing under glass.

EX. ELY. SCARLET GLOBE. This is a very popular variety with market gardeners in many sections. It is a little longer than round, bright scarlet in color with a very small top and root. It is highly recommended both for forcing and outdoor planting. The flesh is firm, crisp and tender.

LONG BLACK SPANISH. Is especially adapted for winter use, it is late maturing and very hardy. The roots are almost black, long and thick. Flesh white and very firm.

PHILADELPHIA WHITE BOX. One of the best of the White varieties either for forcing or out-door culture. More round than turnip-shaped; always crisp, fine grained and tender.

CRIMSON GIANT. Very large, but never pithy. Globe shaped and one of the best red radishes for outdoor culture.

NON PLUS ULTRA. Round, rather turnip shape, of medium size with a moderate top, bright scarlet, very early, one of the best forcing varieties, coming in 3 to 4 days after B. & H. Early Scarlet Forcing.

CINCINNATI MARKET. Improved strain of Long Scarlet, being slightly larger and with a very small top, roots 6 to 7 inches long, scarlet color, flesh white, almost transparent, brittle and crisp.

CHARTIER LONG SCARLET. Roots 6 to 7 inches long and rather thick, deep scarlet at top shading off to pure white at tip.

GOLDEN GLOBE SUMMER. A special variety for late spring or summer planting. Roots are uniformly globe shaped with skin of a golden yellow color.

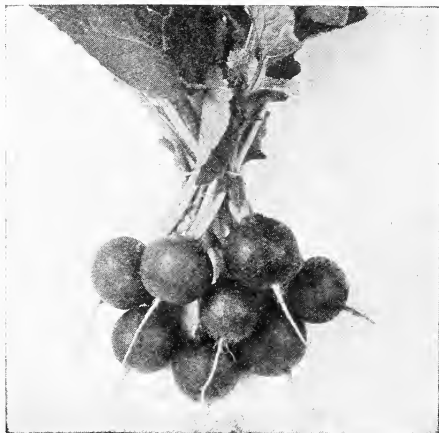

SPARKLER WHITE TIP. Quite similar to Scarlet Turnip White Tip as to size and time of maturity, the root however is more round or ball shape. The white extends further upon the radish and on this account is more popular in many markets.

ROUND SCARLET CHINA. A very large, all season radish, skin is bright scarlet, flesh white and solid and does not get pithy.

WHITE ICICLE. The leading long white radish and one of the earliest. The roots are about 6 inches long, white, slender and smooth.

WHITE STRASBURG. Roots are about 5 inches long, thick at the shoulder and abruptly tapering, skin and flesh are pure white, remains firm and brittle longer than most varieties.

WOOD'S EARLY FRAME. Very early, roots smooth, tender, uniform in shape, about 6 inches long and of a bright carmine red color.

B.-B. Early Scarlet Forcing.

RHUBARB

CULTURE—Plants can be easily grown in any good garden soil. Sow seeds thinly in drills 18 inches apart, thin to 4 or 5 inches. Two-year-old roots are generally preferred for the home garden. A dozen good plants is usually sufficient for the average family. The roots should be set 4 feet each way in deep, warm and very rich soil. The more manure the better stalk.

MYATT'S VICTORIA. Regarded as the best variety for market and home garden. Stalks are red and of immense size.

SEED CO.

B.-B. Late Seeding Bloomsdale Spinach.

SPINACH

CULTURE—For Spring and Summer use, sow in drills 1 foot apart and 1 inch deep as early as the ground can be worked and every two weeks up to the middle of May.

B. - B. LATE SEEDING BLOOMSDALE.

One of the advantages is that the inferior early shooting male plants are entirely lacking. It is intensely crumpled and blistered and very uniform. The color is a deep glossy green. Wherever Bloomsdale is grown, this improved strain will give far more satisfactory results.

B.-B. SELECTED BLOOMSDALE. Very early and hardy. Color glossy deep green, favorite variety for both home and market garden.

NEW ZEALAND. A distinct type of spinach, the plants grow in branching form, with thick, succulent leaves. The leaves and stems can be gathered at any time after they are well grown and plant will start out into new growth.

PRINCESS JULIANA. In form it is a dense, compact rosette with very short petioles. The leaves are large and rounded. Thick in texture; very much blistered and crumpled and of an intense very dark green color.

NOBLE'S GIANT. A very large, thick leaved variety, somewhat wrinkled and arrow-shaped; dark green in color; exceedingly slow to shoot to seed.

BLIGHT-RESISTANT BLOOMSDALE. A very rapid growing variety of Bloomsdale and bred for disease resistance.

SQUASH

Summer Varieties

CULTURE—Sow after the danger of frost when the ground has become warm, plant 5 or 6 seeds in hill 4 feet each way. This applies to bush varieties. For Winter or vine varieties, hills should be 8 ft. each way. When well up they should be thinned out to two plants. 1 oz. for about 40 hills, 1 lb. to acre.

B.-B. SUPERIOR WHITE BUSH. This is a carefully bred strain of the Early White Bush that runs uniform in size, shape and color, which is not true of the regular stock of this variety.

GOLDEN SUMMER CROOKNECK. A standard and early productive summer sort, fruits moderately warted and of a bright yellow color.

SUMMER STRAIGHTNECK. A carefully bred selection from the Golden Summer Crookneck, having all the good qualities of its parent, plus a straight and more meaty neck that does not break so easily when packed for shipment or market.

Winter Varieties

TABLE QUEEN. A small winter squash, with excellent qualities, about the size of a coconut, dark green in color, changing to a bright golden after picking and storing. The meat is dry and mealy, and requires only about 20 minutes to bake.

WARTED HUBBARD. Fruits are large size, rough, skin dark green in color, flesh is bright orange, fine grained, rich and dry, the vines are strong and make a robust growth. A splendid keeping variety.

BUNTON

FOR

BEST

SEED CO.

B.-B. TOMATOES

CULTURE—For early tomatoes sow seed in hot beds during the latter part of February or the 1st of March. When plants are about 3 inches high, transplant into cold frames, setting plants about 4 inches each way. Paper plant bands can be used to advantage for this purpose, and when transplanted to the open ground after danger of frost, the root system would not be disturbed. If the tap root is not broken, will continue to bear much longer. For main or Fall crop, seed can be sown in the open ground from the 10th of May until the 1st of June and transplanted where they are to remain, 3 to 4 feet apart each way. More perfect and better fruits can be had if plants are well staked. 1 oz. will produce about 1,500 plants; requires 4,000 plants to the acre.

New Marglobe—(Disease Resistant).

MARGLOBE (NEW). A second early disease resistant, red fruited variety introduced by the U. S. Department of Agriculture. The fruits are large, smooth and globular, meaty and almost coreless; the plants are medium large and erect. Its foliage shading the fruit and preventing sun scald. It is very productive and well adapted to truck growing, shipping and as a canning sort.

BONNY BEST. A very popular extra early variety, smooth, solid and uniform, producing in clusters in center of plant. Fruits ripen uniformly and very productive of medium sized fruit of bright red color.

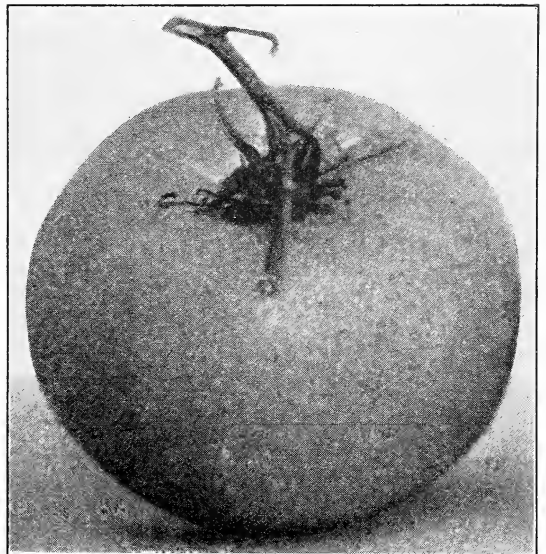

EARLIANA. The earliest and best of the very early tomatoes, fruit of fair size, round, very smooth and solid and produced in clusters in center of plant, color a bright scarlet.

FLORIDA SPECIAL. A second early scarlet fruited variety, it is very similar to Bonny Best. Fruits are round, high crowned and small to medium size, set in clusters of from three to five, the fruit have from 3 to 4 seed cells, the vine does not make a heavy growth.

EARLY DETROIT. A very fine, early, large fruited, pink variety, a little larger than Beauty and somewhat earlier, fruits nearly globe shape and very uniform in size, free from crack and does not blight easily, smooth and solid.

GULF STATE MARKET. An early globe fruited variety, high crowned medium size and perfectly smooth, also solid and meaty and have a thick skin and set in clusters of from 5 to 7, vines make good growth, and have rather heavy set foliage.

BEAUTY. A productive main crop variety, fruits large and exceptionally smooth, of excellent quality, color purplish pink.

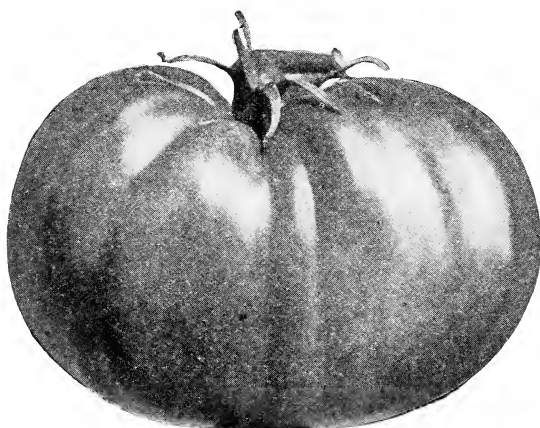

Bonny Best.

B.-B. TOMATOES—Continued.

Ponderosa.

CHALK'S JEWEL. A fine early variety, about a week later than Earliana, fruits smooth, round and solid, color crimson.

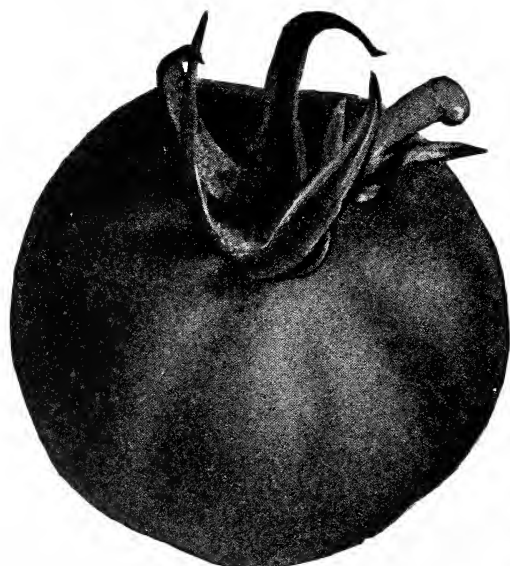

JOHN BAER. An extra early, red fruited variety, fruits are large and nearly round, smooth and of good quality. It is now one of the most popular varieties with the market gardeners.

DWARF CHAMPION. Of a distinctly dwarf, compact upright growth, fruits smooth, solid and of medium size, color, pink, quite early.

NORTON. This is wilt-resistant variety, scarlet fruited and very similar to Stone, being a selection from that strain, the fruits are smooth and solid, bears well and gives a good crop, vines make a medium to heavy growth.

MATCHLESS. A very dependable, large, smooth, second early sort, makes a good canning variety, color cardinal red.

TRUCKER'S FAVORITE. A main crop pink fruited variety, fruits medium size and rather flattened in shape and very solid, the vines make a strong heavy growth.

Stone.

GREATER BALTIMORE. A main crop, productive, red fruited variety of the Matchless type. A splendid canning variety.

PONDEROSA. An exceptionally large but perfect pink tomato and for home use one of the best, fruits very solid with few seeds, ripens early and bears well until very late. This variety is often referred to as Beefsteak Tomato.

STONE. A standard and general favorite with truckers and canners, very vigorous and productive, fruits round, large, solid, smooth and deep red in color.

BRIMMER. A very large tomato somewhat similar to the well known Ponderosa but larger. Its fruit is solid, meaty, well flavored, with few seed. Is rich red in color and unusually smooth for a large tomato.

John Baer.

JUNE PINK. The earliest of the pink or purple fruited tomatoes. It is very similar in productiveness and habit of growth to the well-known Earliana.

YELLOW PEAR. About same size as Yellow Plum, differing only in shape.

YELLOW PLUM. A small fruited variety. Splendid for preserving.

GOLDEN PONDEROSA. Equal in size to purple Ponderosa.

BUNTON FOR BEST SEED CO.

TURNIP PURPLE TOP WHITE GLOBE

TURNIPS

CULTURE—For Spring crop sow in drills 12 to 18 inches apart, cover seed $\frac{1}{2}$ inch and thin out 4 inches in the row. For Fall and Winter crop, sow in July or August in drills or broadcast, 1 oz. will drill about 250 feet. 1 lb. to the acre.

EXTRA EARLY PURPLE TOP MILAN. Extremely early and of splendid quality, bulbs of medium size, flat and white with a bright purple top. Favorite variety with market gardeners for early spring bunching.

B. & H. PURPLE TOP WHITE GLOBE. The most widely cultivated and best known variety; almost a perfect globe in form; flesh and skin white, colored purple or red above ground; very fine grained and sweet.

PURPLE-TOP STRAP LEAVED. A very early, productive sort; roots flat, large size; purple or dark red above ground, white below; flesh white, tender and fine grained.

SEVEN TOP. Grown exclusively for the tops, which are used like Kale for Greens.

IMPROVED PURPLE - TOP YELLOW RUTABAGA. The most desirable sort for table use or stock feeding. Roots are somewhat of a globe shape and grow to large size.

TOBACCO

The Kentucky Experimental station has been very successful in developing a strain of Burley Tobacco that is resistant to the Root-Rot disease and as this disease is prevalent in most of the Burley growing sections it is highly advisable to sow your plant beds with seeds that are carefully selected and grown for this disease control.

Our supply of Burley seeds are grown from Root-Rot resistant seed stock by reliable growers and we do not believe there is a better stock to be had.

BURLEY. We offer several strains of this old popular variety all of which are strong, vigorous growers, developing a large, brightly colored leaf with fine texture that particularly adapts it for cigarettes.

Burley is a natural limestone soil Tobacco and of course does better on that type of soil. It is highly advisable to sow only seed that have been treated for damping of and certain rots of seeds and seedlings. We offer both treated and untreated seeds.

STAND UP BURLEY. Root rot resistant. A very popular type that holds the leaves well up from the ground. A strong grower and a good market strain. It is practically immune to root rot. The stalks are rather tall tapering to a blunt point. Pkt. 25c; oz. \$1.50; $\frac{1}{4}$ lb. \$4.00. Treated, pkt. 35c; oz. \$1.75, $\frac{1}{4}$ lb. \$4.50.

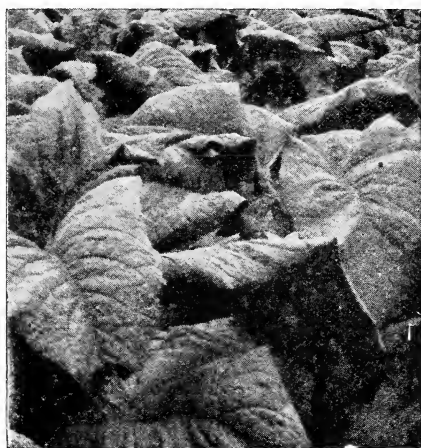

JUDY'S PRIDE WHITE BURLEY. A carefully selected strain of light Burley especially adapted for cigarette tobacco. The leaf is broad, long and tapering. Pkt. 20c; oz. \$1.00; $\frac{1}{4}$ lb. \$3.50. Treated, pkt. 25c; oz. \$1.25; $\frac{1}{4}$ lb. \$4.00.

IMPROVED WHITE BURLEY. A heavy yielder of rich, bright leaf, large, long and broad. Pkt. 20c; oz. \$1.00; $\frac{1}{4}$ lb. \$3.50. Treated, pkt. 25c; oz. \$1.25; $\frac{1}{4}$ lb. \$4.00.

Following varieties: Pkt. 20c; oz. \$1.00; $\frac{1}{4}$ lb. \$3.50. Treated, pkt. 25c; oz. \$1.25; $\frac{1}{4}$ lb. \$4.00.

IMPROVED ONE SUCKER. A very heavy dark Tobacco. The leaves have good breadth, long and of rich quality.

TURNIP—	Oz.	$\frac{1}{4}$ lb.	Lb.
Purple-Top Milan	10c	30c	1.00
Purple-Top Strap Leaf	10c	25c	.60

Burley Tobacco.

BIG ORONOKO. The largest and heaviest of all the Oronoko varieties. Makes a wide, long leaf of dark color. Best adapted to rich, heavy soil.

SWEET ORONOKO. Popular as a natural chewing leaf. Cures a rich red. Long and narrow leaf; tough and waxy.

YELLOW PRYOR. Makes a fine wrapper, filler or smoker. Has good body, fine grain and silky appearance.

CHOICE HAVANA. Used for cigar and pipe smoking. Has long, fine quality leaf. Very early.

BLUE PRYOR. A very popular variety in the dark tobacco district of Kentucky, grows large broad leaves, makes enormous yields.

BUNTON

BUNTON

FOR

BEST

SEED CO.

FLOWER SEEDS

This list will be found to contain only sorts that have real merit and can be grown in any garden, and is mostly composed of annuals, biennials and perennials. Annuals bloom and ripen their seeds the first year, biennials bloom the second year, perennials bloom several years in succession. Many will bloom the first year if seeds are started early in the spring.

AGERATUM

Grows quickly and flowers freely. Is fine for large beds and useful as a cut flower.

AGERATUM MEXICANUM BLUE. Is very showy, growing about 2 feet tall, filled all during the summer and fall with clusters of bright Azure Blue Flowers. Pkt. 10c; $\frac{1}{4}$ oz. 25c.

AMARANTHUS

CAUDATUS (Love Lies Bleeding). Grows about 3 feet high, with drooping red spikes. Pkt. 10c.

TRICOLOR (Joseph's Coat). 2 $\frac{1}{2}$ ft. A color combination of dark bronze, green, scarlet and gold. Pkt. 10c.

ALYSSUM

Easily grown annual, fine for beds, edging or for cutting. Pure white flowers and noted for their exquisite fragrance, this continuing from early spring until hard frost.

SWEET SCENTED. Pkt. 5c; $\frac{1}{2}$ oz. 25c.

LITTLE GEM. Very dwarf and completely covered with snow-white blossoms. Pkt. 10c; $\frac{1}{4}$ oz. 25c.

Antirrhinum (Snapdragon)

Aquilegia (Columbine).

ANTIRRHINUM (Snapdragon)

In recent years this flower has become immensely popular, both for cutting or for show in the garden; the beautifully colored flowers are borne on long stems and continue blooming from July until killed by frost.

Tall Maximum Giant Flowering Blossoms
2 to 2 $\frac{1}{2}$ inches across.

Separate varieties:

APPLE BLOSSOM. Rosy pink, yellow lip.
CANARY BIRD. Canary yellow, golden yellow center.
COPPER KING. Velvety copper scarlet.
OLD GOLD. Deep golden yellow.
SNOWFLAKE. Pure white, yellow tube.
THE ROSE. Rose pink.
BUNCH OF LILAC. Lilac purple.
GIANT FLOWERING. Finest mixed.
Each of above: Pkt. 15c; $\frac{1}{8}$ oz. 75c.
FINEST MIXED. Pkt. 10c; $\frac{1}{2}$ oz. 60c; oz. \$1.00.

Medium Tall Large Flowered, 18 to 20 inches.

PHILADELPHIA PINK. Pure pink. Pkt. 15c; $\frac{1}{8}$ oz. 75c.
GLORIA. Rich deep rose pink. Pkt. 15c; $\frac{1}{4}$ oz. 80c.
PEERLESS PINK. Cameo pink. Pkt. 15c; $\frac{1}{8}$ oz. 75c.
GOLDEN QUEEN. Clear yellow. Pkt. 15c; $\frac{1}{4}$ oz. 50c.
FIREBRAND. Bright scarlet. Pkt. 10c; $\frac{1}{4}$ oz. 50c.
PURITY. Pure white. Pkt. 15c; $\frac{1}{4}$ oz. 75c.
MAUVE QUEEN. Lilac mauve. Pkt. 10c; $\frac{1}{4}$ oz. 50c.
MEDIUM TALL FINEST MIXED. Pkt. 10c; $\frac{1}{4}$ oz. 50c.

AQUILEGIA (Columbine)

The Columbine is one of the most beautiful hardy perennials, producing graceful spurred flowers on stems rising about 2 feet above the beautiful foliage. They are highly prized for cut-flower purposes as well as brightening up the flower garden. The period of flowering covers the late spring and early summer months.

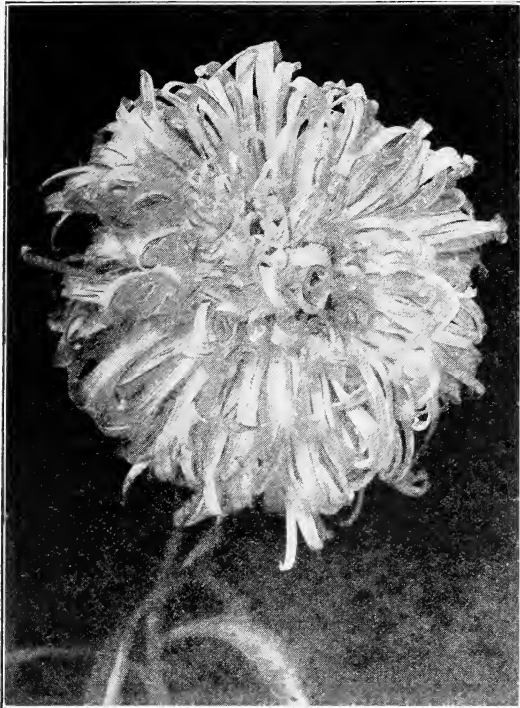

ROCKY MOUNTAIN COERULA. One of the most beautiful of our native American flowers. Blossoms blue. Pkt. 10c.

CHRYSANTHA. Yellow. Pkt. 10c.
Double Mixed. Pkt. 10c.

LONG SPURRED COLUMBINES

HYBRIDS OF PINK SHADES. Pkt. 25c.
MRS. SCOTT ELLIOTT'S STRAIN. Pkt. 25c.
DOBBIE'S IMPERIAL HYBRIDS. Finest mixed. Pkt. 25c.

IMPROVED LONG SPURRED VARIETIES. Mixed. Pkt. 15c.

BUNTON**BUNTON****FOR****BEST****SEED CO.**

Aster (California Giants).

ASTERS

Possibly the most popular annual flower grown. It is an annual that is easy to grow, has wonderful lasting qualities, both in the garden and as a cut-flower.

AMERICAN BRANCHING

Azure Blue, Crimson, Lavender,
Peerless Pink, Deep Rose, and Pure White.
Any of above: Pkt. 15c; large pkt. 35c.
Finest Mixed. Pkt. 15c; large pkt. 25c.

IMPROVED CALIFORNIA GIANTS. A comparatively new Aster of Crego or Ostrich Feather type. Flowers much larger and more substantial than Improved Crego. They measure 5 to 6 inches in diameter, and stand up well when shipped as cut flowers. Their immense size and beauty, as well as their long and sturdy stem, make them very attractive when arranged in floral work.

White Peach Blossom Light Blue
Light Purple Deep Rose Dark Purple
Mixed All Colors

Each of above: Pkt. 25c; large pkt. 50c.
One pkt. each above, 6 colors, \$1.00.

BALSAM

CAMELIA FLOWERED. A quick growing annual producing large, brilliantly colored flowers. Plants grow 15 to 20 inches high, blossoms are borne along the stem. This mixture is composed of the choicest assortment of all the best varieties and colors. **Double mixed.** Pkt. 10c; large pkt. 50c.

White. Pkt. 15c.
Scarlet. Pkt. 15c.
Light Pink. Pkt. 15c.

BALSAM PEAR

A very handsome climbing annual, grown mostly for the ornamental colored fruit which when ripe opens, showing crimson interior. Pkt. 10c.

BEGONIA**Everblooming Bedding Varieties**

A splendid annual for bedding. The flowers, though small, are of brilliant colors, and borne in great profusion from summer to autumn.

GRACILIS LUMINOSA. Large bright scarlet flowers. Dark leaf. Pkt. 25c; 1/32 oz. \$3.50.

PRIMA DONNA. Brilliant clear pink, shading to carmine rose. Pkt. 25c; 1/32 oz. \$3.50.

CALENDULA

Free flowering, hardy annual, growing about 12 to 18 inches high. It is a very fine flower for cutting, also for border. Begins blooming early in the summer, continues until killed by frost.

ALL COLORS MIXED. Pkt. 5c; 1/2 oz. 25c.

BALL'S ORANGE. Dark orange blossoms measuring 3 inches across, stems about 18 inches high. Pkt. 15c.

BALL'S GOLD IMPROVED. Golden yellow. Pkt. 15c.

METEOR. Creamy white, striped orange. Pkt. 10c.

CAMPFIRE. Brilliant orange with a scarlet sheen and full yellow center. Pkt. 25c.

BELLIS (Double)

English Daisy. A very beautiful early blooming perennial.

Ranunculiflora Alba. Double, pure white flowers. Pkt. 15c.

Ranunculiflora Rosea. Double, bright rosy pink. Pkt. 15c.

Double Mixed. Pkt. 10c.

Corn Flower (Centaurea Cyanus).

BUNTON**B****F****B****SEED CO.****CALLIOPSIS**

A very hardy and easily grown annual. Its blossoms vary in color from a pale yellow to a rich orange and velvety brown, grows on thin wiry stems a foot to 18 inches high. Blooms throughout the summer and is excellent for cutting.

GOLDEN YELLOW. Pkt. 10c.

DWARF VARIETIES Mixed. Pkt. 5c.

DOUBLE MIXED. Pkt. 10c.

CAMPANULA (Medium)

A very beautiful and showy perennial, growing about three feet tall, and covered with large bell shaped flowers. **Single Mixed—Pkt. 10c.**

GYMNOCARPA (Dusty Miller). Silvery foliage. Pkt. 10c.

SUAVEOLENS (Sweet Sultan). Yellow. Pkt. 10c; $\frac{1}{4}$ oz. 40c.

CENTAUREA IMPERIALIS

(Royal Sweet Sultan)

Brilliant Rose. Pkt. 10c; $\frac{1}{2}$ oz. 65c.

Deep Lavender. Pkt. 10c; $\frac{1}{2}$ oz. 65c.

Purple. Pkt. 10c; $\frac{1}{2}$ oz. 65c.

White. Pkt. 10c; $\frac{1}{2}$ oz. 65c.

Amaranth Red. Pkt. 15c; $\frac{1}{2}$ oz. \$1.00.

CELOSIA CRISTATA

(Cockscomb)

A very attractive annual, producing flowers resembling a cock's comb. These may be started under glass or sown directly in the garden.

GLASGOW PRIZE. Brilliant crimson, growing about 9 inches high. Pkt. 10c; $\frac{1}{8}$ oz. 85c.

GOLDEN YELLOW. Pkt. 10c.

DWARF MIXED. Pkt. 10c.

CELOSIA PLUMOSA

(Feathered Cockscomb)

CHILDSI CRIMSON (Chinese Woolflower). Grows about 2 feet high, bearing on long stems crimson flowers that look like balls of silky wool. Pkt. 10c.

CHILDSI PINK. Pretty shade of salmon pink. Pkt. 10c.

GOLDEN PLUME. Bright golden yellow. Pkt. 10c.

CHOICEST MIXED. Pkt. 10.

SHASTA DAISIES

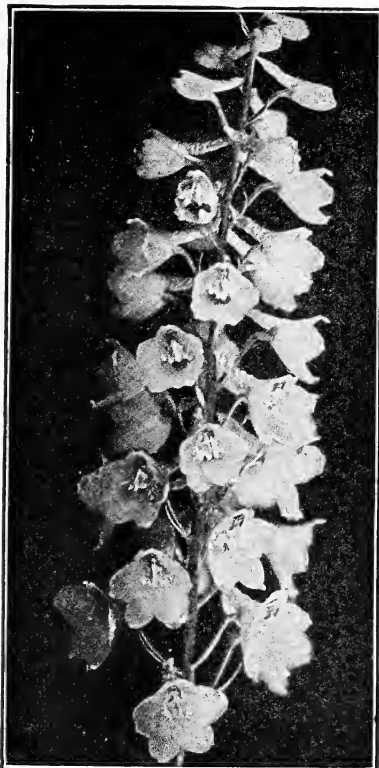

(Chrysanthemum Leucanthemum)

ALASKA. A splendid hardy perennial, producing extra large flowers of pure glistening white, with broad overlapping petals. Pkt. 10c; large pkt. 50c.

CLARKIA

A very popular hardy annual with delicate but very brilliant shades of rose, white and purple flowers, borne profusely on plants 18 to 24 inches high.

DOUBLE MIXED. Pkt. 10c.

BUNTON**BUNTON****FOR****BEST****SEED CO.**

Delphinium (Perennial Larkspur).

COLEUS

Possibly the most handsome foliage plant obtained from seed. Large heart-shaped leaves, in varied color combinations.

LARGE LEAVED MIXED. Pkt. 15c.

COREOPSIS

A showy perennial, growing in clumps, spreading each year; blossoms through summer and fall months profusely.

CALIFORNIA SUNBEAMS. Pkt. 10c; ½ oz. 25c.

GRANDIFLORA SEMI-DOUBLE. A new semi-double flowering variety. Pkt. 15c.

COSMOS

A very satisfactory tall growing hardy annual. Elegant plant for background or along fences. Plants grow about 6 feet high and come in bloom in midsummer and autumn. The double crested is a new type that develops the crown or crest in center. Its petals are much the same as in the old type.

EARLY FLOWERING MAMMOTH.

CRIMSON. Pkt. 10c.

PINK. Pkt. 10c.

WHITE. Pkt. 10c.

MIXED. Pkt. 10.

EARLY DOUBLE CRESTED or ANEMONE FLOWERED. Finest Mixed. Pkt. 15c; ½ oz. 60c.

PEACH BLOSSOM, Pink. Pkt. 20c.

CARNELIA, Rosy Crimson. Pkt. 20c.

WHIRLWIND, White. Pkt. 20c.

CYPRESS VINE

A beautiful rapid growing annual climber, with dark green finely cut fern-like foliage and star-shaped scarlet and white flowers.

PURE WHITE. Pkt. 10c; ½ oz. 25c.

MIXED. Pkt. 10c; ½ oz. 25c.

DELPHINIUM (Perennial Larkspur)

Recent improvement in size and color of this flower has made it one of the most brilliant and effective of hardy garden plants. The large flowering spikes that are raised freely over their decorative foliage often reach up 2 feet or more.

BELLADONNA. Sky blue flowers with light centers. Pkt. 15c; ½ oz. 70c.

BELLAMOSA. Very similar in growth to the Belladonna, differing only in having dark blue flowers. Pkt. 15c; ½ oz. 70c.

CARDINALE. Brilliant scarlet. Pkt. 15c; ½ oz. 70c.

B.-B. Hybrids. Deep blue shades. Pkt. 15c.

B.-B. Hybrids. Light blue shades. Pkt. 15c.

B.-B. Hybrids. Mixed. Pkt. 15c.

WREXHAM STRAIN (Hollyhock Delphinium). Pkt. 25c; 1/16 oz. 75c.

DIANTHUS or PINKS

A free blooming hardy annual, flowers somewhat resemble carnations. Very easily grown and has a place in most every garden.

HEDDEWIGI (Double Japan Pink). Finest mixed. Pkt. 10c.

FIREBALL. Double scarlet. Pkt. 10c.

SNOWBALL. Double white. Pkt. 10c.

CHINA or INDIAN PINK. All colors mixed. Pkt. 10c.

LARGE SINGLE FLOWERS MIXED. Pkt. 10c.

DIGITALIS (Foxglove)

A hardy perennial, producing species of beautiful tubular shaped blossoms. The plants grow 3 to 4 ft. high, and are splendid for shrubbery borders.

GLOXINIFLORA, White. Pkt. 10c.

Rose. Pkt. 10c.

Purple. Pkt. 10c.

New Giant, Mixed. Pkt. 15c.

Lutzii, Salmon. Pkt. 15c.

DOLICHOS or HYACINTH BEAN

Fine annual climber, is a rapid grower and stands the summer heat well. The purple and white flowers are borne in clusters something like the Hyacinth. Plant the seed in the open ground as soon as weather is warm. Pkt. 10c; ½ oz. 40c.

FOUR O'CLOCK or MIRABILIS

A well known, old fashioned, free blooming flower. Grows about 2 feet high, opening in the late afternoon and through the night. Flowers are very showy and fragrant.

ALL COLORS MIXED. Pkt. 5c; oz. 20c.

BUNTON**B****F****B****EST****SEED CO.****GAILLARDIA**

A hardy perennial that blooms the first year. Splendid for beds and borders. Produces gaily colored flowers of scarlet and orange from early summer until fall. Flowers will often measure three inches or more across. Plant about 18 inches high.

GRANDIFLORA MIXED. Pkt. 10c; $\frac{1}{8}$ oz. 35c.

Annual Varieties

Splendid showy annuals for beds or borders, also excellent for cutting. Blooms throughout season from early spring.

PICTA. Single, finest mixed. Pkt. 10c.

PICTA LORENZIANA. Double mixed. Pkt. 10c.

Hardy Perennial Varieties

Among the showiest and most effective hardy perennial.

GRANDIFLORA Portola Hybrids. Shades of bronzy red, golden tipped. Very robust. Pkt. 20c.

TANGERINE (New). Orange, overlaid red. Pkt. 25c.

SUPERBA. Finest mixed. Pkt. 10c.

GODETIA

A very attractive hardy annual, growing about 18 inches high. The plants bloom profusely and bear showy flowers of satiny texture in many rich and varied colors.

TALL MIXED. Pkt. 10c; $\frac{1}{8}$ oz. 25c.

GOMPHRENA (Globe Amaranth)

A showy annual everlasting. The clover like heads when dried make a very beautiful winter bouquet. **MIXED COLORS.** Pkt. 10c.

GOURDS, ORNAMENTAL

Where a very heavy quickly grown vine is wanted, these are very often desirable.

MIXED. Pkt. 10c.

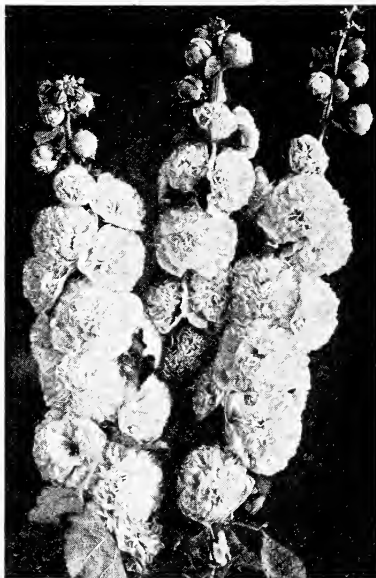

HELIOTROPE

A very popular flower on account of its delightful fragrance. The plant grows about 2 ft. tall. Seeds should be started for summer blooming indoors. It is a very desirable pot plant for the house during winter.

B.-B. MIXED. Pkt. 10c.

Helichrysum or Strawflower.

Hollyhocks (Double Mixed).

GYPSOPHILA (Baby's Breath)

A graceful free flowering plant, covered with white blossoms, valuable for use in trimming in bouquets, also hanging baskets, or edgings.

COVENT GARDEN STRAIN. An improved large flowering pure white form of the annual Baby's Breath. Pkt. 10c; $\frac{1}{8}$ oz. 25c.

PERENNIAL (Single White). Pkt. 10c; $\frac{1}{8}$ oz. 35c.

HELICHRYSUM MONSTROSUM (Strawflower)

The most attractive of the everlasting flowers, they are very desirable to use in bouquets of dried flowers. If picked before they are entirely open and hung heads down in a cool place until thoroughly dry, makes admirable bouquet for basket or vase. They grow 2 to 3 feet high and bloom latter part of Summer.

BUTTERCUP. Canary yellow. Pkt. 10c.

FIREBALL. Crimson. Pkt. 10c.

ROSE CARMINE. Pkt. 10c.

ROSE QUEEN. Pkt. 15c.

SALMON. Pkt. 10c.

SILVERY PINK. Pkt. 15c.

WHITE. Pkt. 10c.

MIXED. Extra fine. Pkt. 10c.

HOLLYHOCK

A very popular hardy perennial grown everywhere and valuable as a background or for border. Requires a rich and well drained soil.

CHATERS DOUBLE, Deep Rose. Pkt. 10c.

Maroon. Pkt. 10c. **Newport Pink.** Pkt. 10c.

Scarlet. Pkt. 10c. **Salmon Rose.** Pkt. 10c.

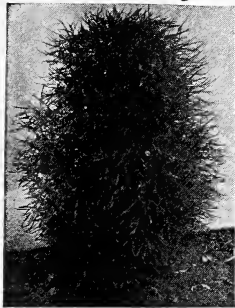

White. Pkt. 10c. **Sulphur Yellow.** Pkt. 10c.

CHATER'S DOUBLE MIXED. Pkt. 10c; $\frac{1}{8}$ oz. 50c.

HYBRIDS, SINGLE MIXED. Pkt. 10c; $\frac{1}{8}$ oz. 35c.

KOCHIA (Mexican Fire Bush; Summer Cypress)

An annual, growing in bush form from 2 to 2½ feet. Light green in spring, deepening in color as the summer advances until the whole plant is of a crimson hue. Pkt. 5c; $\frac{1}{2}$ oz. 20c.

BUNTON**BUNTON****FOR****BEST****SEED CO.****Kochia.****Mignonette.****LANTANA**

A tender perennial about two feet high, having somewhat of a small shrub appearance, with verbena-like flowers in shades of white, red and yellow during late summer and autumn.

Start seeds under glass and transplant into pots or open ground after danger of frost.

BRUANT'S DWARF HYBRIDS MIXED. Pkt. 10c; $\frac{1}{2}$ oz. 60c.

LARKSPUR, ANNUAL

An old-fashioned flower having long, slender spikes. Excellent for border or to be used as cut flowers. Does well in most any garden.

DOUBLE TALL MIXED. Pkt. 5c; $\frac{1}{4}$ oz. 20c.

DOUBLE STOCK FLOWERED. Exquisite pink. Pkt. 15c; $\frac{1}{8}$ oz. 35c.

Dark Blue. Pkt. 10c.

Light Blue. Pkt. 10c.

White. Pkt. 10c.

LOBELIA

A very dwarf, half hardy annual plant forming compact little bushes about 6 inches high and fairly covered with blooms throughout the season, being well adapted for bedding, pots, edgings or rockeries.

GRACILIS. The flowers are bright blue with small white centers. Pkt. 10c; $\frac{1}{4}$ oz. 50c.

EMPEROR WILLIAM. Clear sky-blue with green foliage. Pkt. 10c; $\frac{1}{8}$ oz. 50c.

LUPINUS

A very attractive free flowering annual with graceful spikes of fragrant pea-shaped blossoms of rich and various colors. Is suitable for beds, borders and for cutting.

EXTRA DWARF MIXED. Pkt. 10c; $\frac{1}{4}$ oz. 50c.

TALL ANNUAL MIXED. Pkt. 5c; $\frac{1}{4}$ oz. 25c.

MARIGOLD

A free flowering annual, blooming profusely all summer in pleasing shades of yellow and orange and with striking striped color combination. Can be sown directly in the garden. Very popular for beds and borders.

TALL DOUBLE AFRICAN

Orange Prince. Large, quilled flowers, deep golden orange color. Pkt. 10c; $\frac{1}{8}$ oz. 30c.

Lemon Queen. Large double flowers, soft lemon color. Pkt. 10c; $\frac{1}{8}$ oz. 30c.

Eldorado. Large flower in all shades of yellow. Pkt. 10c; $\frac{1}{8}$ oz. 30c.

Double Mixed. Pkt. 10c; $\frac{1}{8}$ oz. 25c.

FRENCH DWARF DOUBLE

Gold striped. Pkt. 10c.

Brown Spotted Yellow. Pkt. 10c.

Golden Ball. Pkt. 10c.

Finest Mixed. Pkt. 10c.

French Tall Double Mixed. Pkt. 10c.

MIGNONETTE

Hardy annual of delightful fragrance. Plant seed in open ground in spring. For succession until frost sow seed again in July. Thin out about 6 inches.

ODORATA GRANDIFLORA (Sweet). Large flowered, very sweet. Light yellowish white. Pkt. 5c; $\frac{1}{4}$ oz. 15c.

MACHET. Dwarf, vigorous plants of pyramidal growth. Large spikes of red flowers. Pkt. 10c; $\frac{1}{4}$ oz. 40c.

MOON FLOWER

A popular and rapidly growing annual climber.

LARGE WHITE. Pkt. 10c; $\frac{1}{2}$ oz. 50c.

LARGE BLUE. Pkt. 10c; $\frac{1}{2}$ oz. 25c.

MORNING GLORY

A very popular annual climber; grows rapidly and will attain a height of 15 feet. The flowers are of immense size and a gorgeous array of varied colors.

JAPANESE MIXED. Pkt. 10c; $\frac{1}{4}$ oz. 25c.

MYOSOTIS (Forget-Me-Not)

An old-fashioned half hardy perennial, bearing in profusion clusters of dainty blue blossoms, especially in fall and spring. It thrives well in the shade or open border, but flourishes best in a moist, shady place. Seed should be sown under glass in February or March for blossoms the first year.

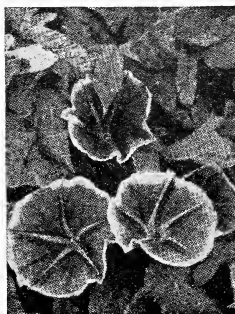

ALPESTRIS BLUE. Trailing habit. Pkt. 10c; $\frac{1}{8}$ oz. 25c.

NASTURTIUM

A very popular annual; can be found in most every garden in the dwarf or climbing varieties. Profuse bloomers from the early summer until late fall. Our mixtures contain all the best varieties; affords a striking combination of colors.

DWARF MIXED. Pkt. 5c; $\frac{1}{2}$ oz. 10c; oz. 15c; $\frac{1}{4}$ lb. 40c; lb. 85c.

TALL MIXED. Pkt. 5c; $\frac{1}{2}$ oz. 10c; oz. 15c; $\frac{1}{4}$ lb. 40c; lb. 85c.

BEST

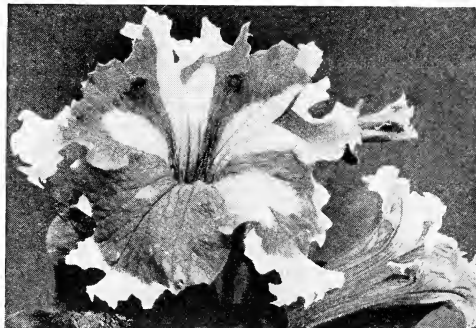

SEED CO.

Shirley Poppies.

Phlox.

Giants of California Petunia.

NICOTIANA

An easy annual to grow and one of the most effective. The blossoms resemble petunias very much in shape, but with longer tube. The flowers become fully expanded only in the morning or evening or on cloudy days. Plants 2 to 3 feet.

AFFINIS HYBRIDS. Pkt. 10c; $\frac{1}{8}$ oz. 25c.

PANSIES

These thrive best in a rich soil, especially where it is partially shaded. For early spring blossoms, the seeds should be sown from July to September and transplanted into cold-frames for the winter.

GIANT TRIMARDEAU MIXED. One of the most popular, with large sized blossoms containing every color and combination of colors known to the Pansy family. Pkt. 10c; $\frac{1}{8}$ oz. 40c; oz. \$3.00.

MAMMOTH EXHIBITION MIXTURE. A wonderful mixture of mammoth pansies especially recommended to the commercial grower. Pkt. 25c; $\frac{1}{8}$ oz. \$1.25; oz. \$8.00.

ROGGI GIANT MIXTURE. We consider this the most gorgeous mixture of all Pansies. All of the flowers are of the giant type with a wonderful color combination. Pkt. 40c; $\frac{1}{8}$ oz. \$2; oz. \$14.00.

SINGLE FLOWERED PETUNIAS

GIANTS OF CALIFORNIA. This is a very wonderful strain. The flowers are very large, often 5 to 7 inches across. The edges are beautifully frilled. The brilliancy of colors cannot be surpassed. All colors. Pkt. 25c.

DWARF CALIFORNIA GIANTS. Pkt. 50c.

LARGE FLOWERING DOUBLE (Plain). A fancy mixture which produces a large percentage of doubles. Pkt. 75c.

Oriental Poppy.

Single Flowering Petunias—Continued

ROSE OF HEAVEN. Brilliant rose. Pkt. 20c; $\frac{1}{8}$ oz. 75c.

SNOWBALL. Pure satiny white. Pkt. 15c.

ROSY MORN. Clear pink. Pkt. 20c; $\frac{1}{8}$ oz. 75c.

ALDERMAN. Deep violet. Pkt. 25c; 1/16 oz. 75c.

NORMA. Blue with white star. Pkt. 20c.

CHOICE MIXTURE. Pkt. 15c.

BALCONY PETUNIAS

A splendid large flowering type, suitable for window boxes, hanging baskets, etc. The flowers average about 3 inches across.

Balcony White. Pure white. Pkt. 15c.

Crimson. Velvety crimson. Pkt. 15c.

Rose. Rose pink. Pkt. 15c.

Blue. Indigo Blue. Pkt. 15c.

Mixed. Pkt. 15c.

PHLOX DRUMMONDI

This is an annual that makes a magnificent show in beds and masses, where their brilliant and varied colors produce a gorgeous effect from a few weeks after sowing throughout the summer. They are very easily grown. The seeds should not be sown until danger of frost is over.

MIXED COLORS. Pkt. 10c; $\frac{1}{4}$ oz. 40c; 1 oz. \$1.00.

PERENNIAL NEW HYBRIDS. Mixed. Pkt. 15c; $\frac{1}{8}$ oz. 50c.

POPPIES

No flower affords a more pleasing display of gorgeously brilliant coloring during the blooming season. They are very hardy and can be sown as early in the spring as the ground can be worked.

CALIFORNIA or ESCHSCHOLTZIA. A very hardy free flowering annual, growing about 15 inches high, producing quantities of beautiful blooms in shades of yellow, orange and red. Pkt. 5c; $\frac{1}{4}$ oz. 15c; oz. 50c.

PEONY FLOWERED. Enormous size, perfectly double, resembling a peony. Mixed all colors. Pkt. 5c; oz. 35c.

SHIRLEY. A magnificent variety producing through a long season large flowers of charmingly delicate colors, most all with white centers.

Fordhook Hybrids. Single mixed. Pkt. 10c; $\frac{1}{8}$ oz. 30c.

Semi-Double. Mixed. Pkt. 10c; $\frac{1}{4}$ oz. 25c.

ROYAL SCOT. Brilliant scarlet. Pkt. 10c; 1 oz. 35c; ¼ lb. \$1.00.

PEAT MOSS Finely Granulated

Every Grower should use it for mulching flower and vegetable beds, evergreens, Roses, shrubs, etc.

It retains moisture and furnishes the needed organic matter which all soils require. Lawns will not dry out so quickly if covered with a light layer in the spring with Peat Moss. For the flower garden spread a layer about 3 inches deep and work into the soil. For porch and window boxes mix a good proportion of Peat Moss with rich compost or soil. Peat Moss is dry and compressed into bales containing about 13 cubic feet and weighing between 150 and 175 lbs. Price per bale \$4.50; 5 bales at \$4.25; ½ bale \$2.75; ¼ bale \$1.50.

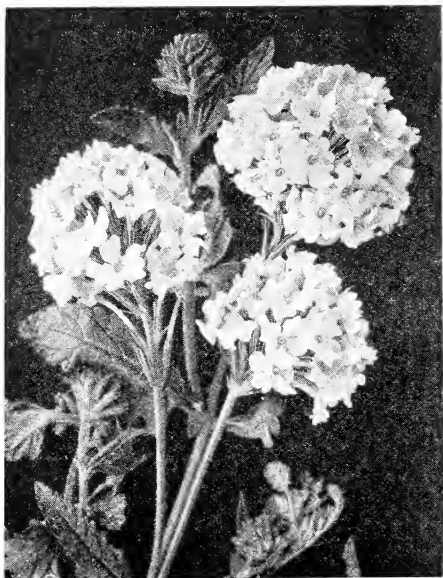

BUNTON

BUNTON

FOR

BEST

SEED CO.

Giant Verbena.

THUNBERGIA (Blackeyed Susan)

A beautiful climbing or trailing annual. It will trail over the ground forming a dense mat of foliage and flowers. Used extensively in hanging baskets, vases, on fences, etc. The colors range through all shades of yellow, orange, buff to pure white, mostly with black centers. (About 5 feet.)

ALL COLORS MIXED. Pkt. 10c; $\frac{1}{8}$ oz. 25c.

B.-B. Dahlia-Flowered Zinnias

An old time annual becoming immensely popular in recent years since the introduction of the new Dahlia Flowered, an improvement in color, size and form. Easily grown and makes a wonderful display in beautiful array of various colors in the garden; very fine for cut-flowers. Our strains of this wonderful flower are the very best that can be produced.

The Dahlia Flowered is a comparatively new Zinnia producing mammoth flowers measuring from 4 to 6 inches across; wonderful range of colors. Plants are strong and grow from 3 to 4 feet high. A bed of this new flower should be in every garden.

B.-B. SPECIAL MIXTURE (Dahlia Flowered). Pkt. 15c; $\frac{1}{4}$ oz. 60c; oz. \$2.00.

SEPARATE COLORS

Any of the following varieties: Pkt. 20c; $\frac{1}{8}$ oz. 50c; $\frac{1}{4}$ oz. 85c.

EXQUISITE. Light rose with centers deep rose.

OLD ROSE. A real old rose shade, very large, beautiful.

DREAM. A fine, deep lavender, turning to purple, a new and desirable shade in Zinnias.

GOLDEN STATE. A very rich orange yellow, turning to an attractive orange when in full bloom.

ILLUMINATION. Deep rose (Tyrian Rose), similar to Exquisite.

METEOR. A rich, glowing deep red.

PURPLE PRINCE. A fine, deep purple.

CRIMSON MONARCH. By far the largest and best of the red shades. Flowers often 8 inches in diameter.

POLAR BEAR. A very large pure white of true Dahlia form.

VERBENA

A hardy annual very valuable for bedding purposes, borders and window boxes.

HYBRIDA GRANDIFLORA GIANTS. A new strain of verbenas, of robust, compact habit and free blooming.

Lucifer. Brilliant scarlet. Pkt. 15c.

Luminosa. Flowers pink, shading to salmon. Pkt. 15c.

Rosea Stellata. Rose pink, white eye. Pkt. 15c.

Violacea Stellata. Rich violet, white eye. Pkt. 15c.

White. Pure white. Pkt. 15c.

Finest Mixed. Pkt. 10c.

MAMMOTH MIXED. All colors. Pkt. 10c; $\frac{1}{8}$ oz. 20c.

VINCA (Periwinkle, or Old Maid)

Ornamental free blooming plant, with bright green shiny foliage with handsome pink and white flowers. One of the most satisfactory plants for bedding purposes. They may be potted and kept in bloom through the winter. Seeds should be sown early and then the plants will bloom the first year. (Seeds germinate slowly.)

MIXED. Pkt. 10c; $\frac{1}{8}$ oz. 25c.

WILD GARDEN ANNUAL FLOWERING SEEDS

A general mixture of the easiest and surest growing annual kinds, that may be sown broadcast, and with little care will produce a bright effect in places that would otherwise be nothing but a collection of unsightly weeds. Pkt. 10c; oz. 85c; $\frac{1}{4}$ lb. \$3.00.

BUTTERCUP. Immense, deep creamy yellow.

CANARY BIRD. A delicate shade of primrose; very large and holds color well until out of bloom.

LILLIPUT DOUBLE. A dwarf Zinnia, growing only about 12 inches high, and of a rather bushy habit, fairly covered with small short-stemmed very double flowers. They are very pretty plants, being in blossom throughout the summer and fall season.

Mixed Colors. Pkt. 10c; $\frac{1}{8}$ oz. 35c.

CALIFORNIA GIANTS. A special strain of Zinnias which produce flowers of colossal size, often measuring 5 to 6 inches across. They have a small flat center, with loosely placed petals. Plants are of robust habit, attaining a height of 3 to 4 feet. Finest mixed. All colors. Pkt. 15c, $\frac{1}{4}$ oz. 50c.

BUNTON**BUNTON****FOR****BEST****SEED CO.**

Gladiolus All First Size Bulbs

50 at 100 Rate

CULTURE—For best results Gladiolus should be planted in a sunny location in rows 18 inches apart and about 6 inches in the row. They require a great deal of plant food and unless your soil is very fertile you should scatter and work into the soil **B.-B. Lawn and Garden Grower** before planting, at the rate of 10 lbs. for each 100 sq. ft. This will not only produce rapid growth, but will give color and size to the blossom. See page 58 for Fertilizer.

AMERICA. Soft lavender pink with lighter throat, strong spike; the most popular variety. Each 5c; doz. 45c; 100, \$3.00.

ANNA EBERIUS. Deep purple with dark bordeaux center, the whole a vivid velvety color; a novelty. Each 5c; doz. 50c; 100, \$3.60.

CARMEN SYLVA. Snow white; large flowers well placed on always perfectly straight, tall stems. Each 8c; doz. 75c; 100, \$5.00.

CRIMSON GLOW. Glowing velvety crimson shaded a little deeper in the center; tall strong grower; extra large flowers. Each 6c; doz. 60c; 100, 4.00.

EVELYN KIRTLAND. Very warm rose pink, deeper at the edges of petals; brilliant scarlet blotches on the lower petals. Tall straight spike. Each 6c; doz. 60c; 100, \$4.00.

GIANT NYMPH. Light rose pink, with creamy yellow throat; very large flowers well arranged on long stems. Each 8c; doz. 75c; 100, \$5.25.

GOLDEN MEASURE. The best of all yellows, very large flowers of excellent substance; robust grower. Each 15c; doz. \$1.15; 100, \$9.00.

HALLEY. Salmon rose with creamy yellow blotch, very early flowering. Each 5c; doz. 45c; 100, \$3.25.

HERADA. Clear mauve, shaded somewhat deeper in center, large flowers. Each 8c; doz. 50c; 100, \$3.60.

LE MARECHAL FOCH. Flesh pink. Strong, stiff stems bear from 4 to 5 immensely large flowers at a time. Each 5c; doz. 45c; 100, \$3.25.

LOS ANGELES. Beautiful shrimp pink with glowing orange carmine blotch in throat; tall and graceful stems. 8c each. doz. 75c; 100, \$5.00.

MRS. DR. NORTON. Silvery white base tinged with pink, deepening towards the edges of the petals, creamy blotches in throat on lower petals. Tall vigorous grower. Each 8c; doz. 75c; 100, \$5.00.

MRS. FRANCIS KING. Flame red shaded salmon towards center. Very tall erect spike. Each 5c; doz. 45c; 100, \$3.25.

MRS. FRANK PENDLETON. Deep rose pink shading to pale pink in throat, large, bright crimson blotches on lower petals. Tall, vigorous grower. Each 5c; doz. 45c; 100, \$3.25.

MRS. LEON DOUGLAS. Begonia rose, striped with flame scarlet, lower petal pale lemon, speckled ruby; extra large flowers on very tall strong stem. Each 15c; doz. \$1.15; 100, \$9.00.

PEACE. Very large, nearly white, with pale violet feathering on lower petals; tall, graceful spike. Each 6c; doz. 55c; 100, \$3.50.

PRINCE OF WALES. The most delicate salmon pink, very early bloomer. Each 8c; doz. 60c; 100, \$4.00.

PURPLE GLORY. Deepest velvety maroon with almost black blotches. Large, ruffled flowers on very tall sturdy stems. Each 15c; doz. \$1.15; 100, \$9.00.

ROSE ASH. Old rose overlaid and blended with pink, blue and red, giving the color of ashes of roses, hence its name. Large flowers on tall, strong spikes. Each 8c; doz. 60c; 100, \$4.00.

SCARLET WONDER. Purest deep scarlet; mammoth flowers, tall stiff stems. Each 15c; doz. \$1.15; 100, \$9.00.

SCHWABEN. Light lemon yellow with little red stripes on lower petals. Very sturdy stem bears from 5 to 6 large flowers at a time. Each 8c; doz. 65c; 100, \$4.50.

B.-B. GLADIOLUS MIXED. Our B.-B. mixture is composed of all colors and many of the very best varieties. Each 4c; doz. 35c; 100, \$2.80.

PRIMULINUS HYBRIDS

ALICE TIPLADY. Bright saffron-orange; large, open flowers on strong stiff stem. Each 5c; doz. 45c; 100, \$3.25.

CARARA. Creamy white, long wiry stem. Each 8c; doz. 80c; 100, \$6.00.

JEWELL. Light salmon pink with beautiful golden yellow throat; flowers large and wide; open on long, slender stems. Each 5c; doz. 50c; 100, \$3.60.

MAIDENBLUSH. Light pink. Flowers well placed on tall, slender stem. Very early. Often 2 and 3 spikes to the bulb. Each 5c; doz. 45c; 100, \$3.00.

ORANGE QUEEN. Purest apricot of a very warm tint. Large, open flowers on good stems. Each 10c; doz. 95c; 100, \$7.00.

Mrs. Dr. Norton.

Fancy Grass Seeds

For Lawns, Pastures and Meadows

KENTUCKY BLUE GRASS. Kentucky is famous for this native grass which is fine for lawns and pastures. It is one grass that does well in many climates and affords a beautiful green turf the year around. The seed is slow to germinate, but when once started, it will spread and eventually completely cover the ground. It is unequalled for lawns and permanent pastures. B.-B. Grade lb. 60c; 2 lbs. \$1.15; 5 lbs. \$2.50; 10 lbs. \$4.75; 100 lbs. \$45.00; bu. (14 lbs.) \$6.60. Fancy Grade lb. 45c; 2 lbs. 85c; 5 lbs. \$2.00; (bu. 14 lbs.) \$4.50.

RED TOP. A quick growing grass suitable for lawns and pastures; is particularly adapted to moist soil. One pound for 400 square feet. B.-B. Grade lb. 40c; 5 lbs. \$1.90; 50 lbs. and over at 35c. Fancy Grade lb. 35c; 5 lbs. \$1.25; 50 lbs. and over at 22c.

DOMESTIC RYE GRASS. A splendid grass where quick growth is desired or for winter coverage; is deep rooting and holds well on terraces and embankments. Sow 2 lbs. to 300 sq. feet; 50 lbs. to the acre. Lb. 25c; 5 lbs. \$1.00; 50 lbs. and over at 14c.

ROUGH STALK MEADOW. Well adapted for shaded places, under trees, etc. Forms a fine sward where few other grasses can exist. Sow 1 lb. to 300 sq. ft. Lb. 60c; 5 lbs. \$2.75; 10 lbs. \$5.00.

RED OR CHEWING FESCUE. Forms a close and lasting turf, especially adapted for dry sandy soil. It resists extreme drought and

thrives well on poor soils. Sow 2 lbs. to 300 square feet. Lb. 60c; 5 lbs. \$2.25; 10 lbs. \$4.25.

MEADOW FESCUE. A splendid deep rooting grass, well adapted to poor soils for pasture or meadow. Stands close grazing and stays green throughout the year. Lb. 35c; 5 lbs. \$1.50; 10 lbs. and over at 24c per lb.

ITALIAN RYE GRASS. Yields several cuttings a year of splendid hay, well adapted to rich loamy soil and does well on moist lands. Lb. 30c; 5 lbs. \$1.25; 10 lbs. and over at 20c per lb.

PERENNIAL RYE GRASS. A splendid, quick growing pasture grass adapted to most any soil that is not too dry. Sow 25 lbs. to acre. Lb. 30c; 5 lbs. \$1.20; 10 lbs. and over at 18c per lb.

TALL MEADOW OAT GRASS. A heavy yielding grass splendid for both hay and grazing. Stands hot weather well and is best adapted to good loamy uplands. Lb. 35c; 5 lbs. \$1.50; 10 lbs. and over at 23c per lb.

WHITE DUTCH CLOVER. Makes a small, close compact growth, covering the ground like a carpet. It is very hardy and well adapted to most any soil. Very valuable in lawn mixtures and for permanent pasture, sow 5 to 5 lbs. per acre. B.-B. Grade, lb. 60c; 5 lbs. \$2.75; 10 lbs. \$5.00. Choice Grade lb. 50c; 5 lbs. \$2.25; 10 lbs. \$4.00.

CLOVERS Prices Subject to Change

Alfalfa, the One Best Hay.

Alfalfa

60 lbs. to the bu. One bushel will seed four acres.

The feed and soil improving value of Alfalfa is so valuable for the average farm that the acreage is gradually increasing each year. The yield is ordinarily more than twice the amount of hay that Red Clover will afford and the feed is valued at least twice as high. It can be cut from three to five times per year, and will average four to five tons to the acre. It is a great nitrogen-gathering plant and will increase the value of the farm because it enriches the soil.

It makes a wonderful pasture for hogs and assists keeping them in a healthy and growing condition. All kinds of stock are very fond of it and it comes nearer taking the place of grain as a fattener than any other hay. B.-B. Grade lb. 35c; 10 lbs. \$2.75; bu. \$15.50. Choice Grade, lb. 35c; 10 lbs. \$2.50; bu. \$14.50.

GRIMM'S, IN SEALED BAGS. A variety having a spreading or lateral root system, proven to be more hardy and lasts longer than other varieties. It does not pull out of the ground or winter kill during freezing and thawing weather as easily as the straight root variety. The lateral roots, spreading and gathering plant food from the top soil, seem to give quicker and more productive growth. Present prices— $\frac{1}{2}$ bu. \$13.00; bu. \$26.00.

Sweet Clover

60 lbs. scarified seed to the bushel. One bushel will seed four to five acres.

One of the greatest plants for enriching the soil. If given a chance, it will restore fertility within a few years on badly worn and neglected land. The plant seems to be able to live from the air and deposit great quantities of nitrogen in nodule form on the roots; also an excellent hay and pasture, feed value next to Alfalfa; it is a very rapid grower and usually affords the first green feed in the spring and the last in the fall. Also Sweet Clover will inoculate your ground for Alfalfa. The seeds should be sown during early spring or early fall months.

WHITE BLOSSOM (SCARIFIED). Per bu. \$6.00.

YELLOW BLOSSOM (SCARIFIED). Per bu. \$6.00.

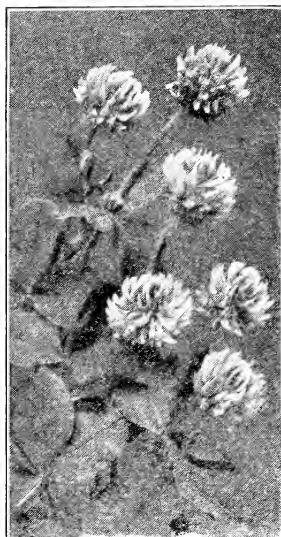

JAPAN CLOVER (LESPEDeza). Will grow on the poorest and driest soils, and a splendid grass crop for restoring fertility in worn-out fields. Stock eat it readily and fatten on it. Price lb. 30c; bu. (24 lbs.), \$4.50.

RED CLOVER. A standard variety and used extensively in crop rotation. It is one of the best nitrogen gathering plants and enriches the soil as well as being a very heavy producer of excellent hay.

All prices on Clovers subject to change.

B.-B. HOME GROWN. Bu. \$13.50; 10 lbs. \$2.50; lb. 35c.

CHOICE HOME GROWN. Bu. \$12.50; 10 lbs. \$2.30; lb. 30c.

Red Clover.

MAMMOTH, or SAPLING CLOVER. The plant of this clover is at least one-third larger than the ordinary Red Clover. Price — Lb. 40c; 10 lbs. \$2.75; bu. \$14.

ALSIKE CLOVER. One of the hardiest of all clovers and succeeds well on a wide variety of soils, makes a very fine quality of hay, and is one of the best clovers for grazing. If you have failed with the other clovers, try alsike. B.-B. Grade, lb. 35; 10 lbs. \$2.50; bu. \$13.50. Choice Grade, lb. 35c; 10 lbs. \$2.25; bu. \$12.00.

CRIMSON CLOVER. An annual clover usually sown in this latitude during months of July, August or September. Prices on application.

KOREAN LESPEDEZIA. A new variety that is rapidly superseding the common variety; it is more vigorous in growth, affording nearly double the amount of pasturage. Seeds should be sown about April 1st. 5 lbs. to the acre is sufficient for a catch crop as it reseeds itself. 20 lbs. to the acre should be sown if a thorough covering is desired the first season. 1 lb. 60c; 10 lbs. at 45c; 50 lbs. and over at 42c.

BUNTON FOR BEST SEED CO

SEEDS of HAY and FORAGE PLANTS

All prices are those in effect at time this Catalog goes to press and are subject to change

Tennessee Golden Millet.

MILLET

A Splendid Annual Hay Crop

TENNESSEE GOLDEN (GERMAN). A very rapid-growing plant and on good soil grows 4 to 5 feet high, producing a very sweet and palatable hay. Prices fluctuate and are subject to change. Bu. \$2.85; 10 bus. and over, at \$2.75.

TIMOTHY

Timothy is recognized most everywhere as a valuable hay crop; thrives well on most any soil, does much better than other grasses on low land. It can be sown either in the fall or spring months. Present prices—Lb. 25c; bu. \$3.90.

ORCHARD GRASS

Orchard Grass is a very valuable grass for pasture or hay; grows very rapidly and will furnish an excellent pasture of green grass very early in the spring and late in the fall. Present prices—Lb. 30c; bu. \$2.75; 10 bus. and over at \$2.60.

SUDAN GRASS

A Heavy Producing Annual Hay Crop

Will grow and do well on most any kind of soil, however grows faster and taller on bottom lands where it can get sufficient moisture. Can be cut three to four times a season, producing from 1 to 2 tons of Hay each cutting. Is very popular with dairymen as a milk-producing green feed during the hot dry summer months. Broadcast 15 lbs. to the acre. Present price—Lb. 25c; 10 lbs. 85c; 100 lbs. \$7.50.

DWARF ESSEX RAPE

Unequaled as a green forage or grazing for sheep, hogs or poultry. Can be planted in rows or broadcasted 6 to 8 lbs. per acre and will be ready for grazing in about 6 to 8 weeks. Price: Lb. 20c; 10 lbs. \$1.25; 100 lbs. \$10.00.

Soy Beans

Recognized as the Standard Annual Hay Crop and Soil Enricher

MAMMOTH YELLOW. Largest and heaviest hay producer of all of the Soy Beans. Bu. \$3.00.

WILSON EARLY BLACK. An early variety, maturing in about 115 days. Highly recommended for hay. Bu. \$3.50.

EARLY HOLLYBROOK. A heavy yielder of both Hay and Beans of high quality. Grows about 3 feet high. Bu. \$3.00.

VIRGINIA BROWN. A splendid variety for hay. Bu. \$3.40.

Cow Peas

Crop short again this year, and quantity available uncertain. We will be pleased to make special quotation when larger quantities are desired.

BRABHAM. A particularly valuable variety for hay. Holds its foliage well, seeds smallest of all cow peas, requiring less to seed an acre than most other varieties. ½ peck 75c; peck \$1.25.

WHIPPOORWILL. A well known favorite, both for hay and soil improving, vines usually about 6 feet long. ½ peck 70c; peck \$1.20.

NEW ERA. In habit of growth is similar to Whippoorwill. However earlier and with smaller seeds. ½ peck 70c; peck \$1.20.

Edible Peas

LARGE BLACK EYE. Dwarf or bushy growth being well filled with long pods. Matures in about 110 days. Generally grown to produce dried peas for winter use. Lb. 20c; 5 lbs. 75c; 10 lbs. \$1.40.

SORGHUM, or CANE SEED

For Forage and Syrup

RED TOP. Most popular for feed and is a very good syrup variety. Price—Lb. 20c; 10 lbs. 60c; bu. \$3.00.

ORANGE. A splendid variety that grows well and produces a light colored and fine flavored syrup. Lb. 20c; 10 lbs. 60c; bu. \$3.00.

AMBER. An early variety grown extensively for forage. Lb. 20c; 10 lbs. 60c; bu. \$2.00.

TEXAS SEEDED RIBBON. Being closely related to sugar cane. It is without doubt the very best for syrup. It matures in about 120 days and is a very heavy yielder of sweet juice that will make into a deliciously flavored molasses. Present price—10 lbs. 85c; bu. \$4.00.

HAIRY VETCH

Great Hay and Fertilizing Plant

A very hardy nitrogen-gathering plant that is used extensively as a winter cover crop. Lb. 20c; 10 lbs. \$1.80; 100 lbs. \$17.00. Prices subject to change.

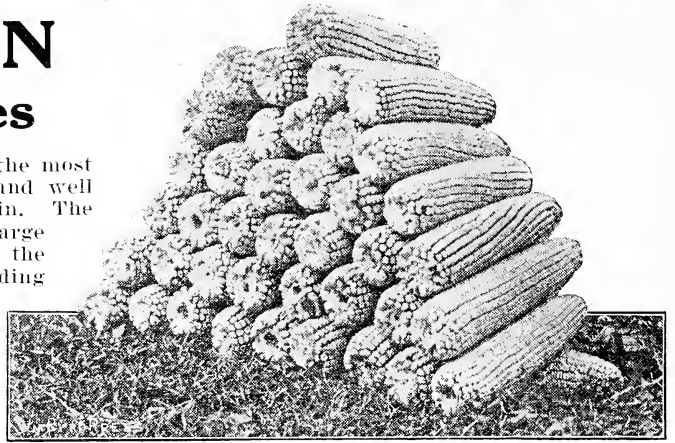

BUNTON

BUNTON FOR BEST

SEED CO.

SEED CORN Field Varieties

BOONE COUNTY WHITE. One of the most popular white corns. The ears large and well filled with 18 to 20 rows of deep grain. The grains are soft and pure white, the cob large and white and is usually well filled over the tip end. It has had unusual care in breeding and selection and is recognized as one of the biggest yielders. The stalks grow 10 to 12 feet high and often have two ears, making it a very desirable variety for silage. Lb. 30c; pk. 90c; bu. \$2.75.

Boone County White.

JOHNSON COUNTY WHITE DENT. Somewhat similar to Boone Co. though slightly larger, grains very deep, soft and pure white, it is an ideal corn for river bottoms and other strong lands, takes 110 to 120 days to mature. Lb. 30c; pk. 80c; bu. \$2.75.

DIAMOND JOE. A very heavy producing early variety of white corn that has rapidly gained in popularity since its introduction; record yields have been made in 95 days from time of planting. Lb. 30c; pk. 80c; bu. \$2.75.

IOWA SILVER MINE. The ears are large, the grains fairly broad and deep, it matures in about 100 days and nearly always two ears to the stalk. Lb. 30c; pk. 90c; bu. \$3.00.

CALICO. An extra large variety grown and preferred by many stock feeders, who claim that it will out yield any other variety, the grains are smooth, broad and deep, and contains a very high percentage of protein. Lb. 30c; pk. 90c; bu. \$2.75.

HICKORY KING. Matures in about 100 days and usually has 2 to 3 fair sized ears to the stalk. The cobs are very small, the grain white and are so broad that it only takes 8 rows to fill the cob. Lb. 30c; pk. \$1.00; bu. \$2.50.

REID'S YELLOW DENT. This is probably one of the most used yellow corns in this part of the country. It is a heavy yielding, dependable corn. The ears average about 10 inches long and well filled with 18 to 20 rows of deep kernels. Matures in about 110 days. Lb. 30c; pk. 90c; bu. \$2.50.

100-DAY LEAMING. A splendid early maturing yellow corn well adapted to soil and climatic conditions of this section. The moderate size stalk generally have two big ears that are well filled, averaging 10 to 11 inches long with 18 to 20 rows of reddish yellow grains. The two largest corn growers in this county have been growing this variety exclusively for the past 4 or 5 years and are highly pleased with the quality and heavy yields. May 10 to June 1 is a good time to plant this variety. Lb. 30c; pk. 90c; bu. \$2.75.

SILAGE CORN

EUREKA ENSILAGE. This is a tall and leafy variety growing 12 to 15 feet high with an enormous growth of fodder. It bears 1 to 2 ears to the stalk, the ears frequently over 12 inches. It should be planted on good soil and not too thick. Lb. 30c; pk. \$1.00; bu. \$3.50.

SOUTHERN PROLIFIC. Takes about 125 days to develop into hard corn. Stalks are large, 8 to 12 feet tall; leaves are large and plentiful, the ears medium size and often 4 to 6 on a stalk. The grains are deep, white and hard. This corn has a record yield of over 200 bushels per acre and not only makes a heavy yield of silage, but is good for roasting ears and stock feeding. Lb. 30c; pk. \$1.00; bu. \$3.50.

Make This Increase Yours

By Treating Seed Corn with SEMESAN JR.

Seed treatment with Semesan Jr. increased the corn yield of W. H. Miller of Illinois, at the rate of 5 bushels per acre. Semesan Jr. is inexpensive disease insurance. Costs only 2½¢ per acre for field corn, slightly more for sweet corn. Destructive diseases such as Diplodia, Gibberella and Basiporium often exist on the seed and cause seed decay, seedling blight, rotted roots and many nubbin-bearing stalks. Semesan Jr. destroys such diseases on the seed without injury. Semesan Jr. seed treatment permits earlier planting of corn by protecting the seed against rotting in cold, wet soil. Generally produces better germination and stands which result in improved quality and large crop yields. Easily and quickly applied as a dust. Does not slow up rate of planter drop. Use 2 ounces per bushel.

BEST

SEED CO.

Bunton's Seed Potatoes

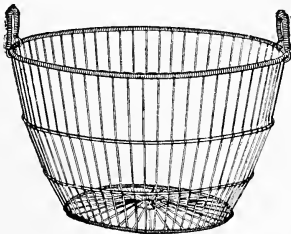

Ky. Second Crop Irish Cobbler.

BUNTON'S KY. 2ND CROP COBBLERS. Grown from Certified Seed. The experience of the largest and best potato growers have proven that it pays to plant only highly bred seed stock. Certified seed must pass several rigid inspections before tag is issued. It is from this certified seed stock that Bunton's Ky. 2nd Crop Cobblers are grown, and the seed treated with Semesan Bel before planting. And in this we offer a high bred and practically disease free seeds that should make the very highest yield of fine potatoes. Pk. 85c; bu. \$2.75; (per bag 150 lbs.) \$7.00.

EARLY ROSE (NORTHERN). An old variety which is still largely planted in some localities. Potatoes are oblong in shape and good eating quality. Pk. 75c; bu. \$2.50; 150-lb. bag \$6.50.

EARLY RED TRIUMPH. The earliest varieties of all. Potatoes are round with pink skin and shallow eyes. Good quality and a fair yielder. Pk. 90c; bu. \$2.75; 150-lb. bag \$7.00.

INDESTRUCTIBLE WIRE BASKETS

Just the thing for use in treating seed potatoes and for general farm or field use in handling potatoes, vegetables, corn in the ear, etc.

½ Bu. size, with Bail Handle, ea.. \$1.00
1 Bu. size, each.. \$1.50 3 for.. 4.25

BURBANK (NORTHERN). This is a late variety and largely used for the main crop in some family gardens. This is a long white potato and very dry and mealy when cooked. Pk. 90c; bu. \$2.50; 150-lb. bag \$6.00.

EARLY OHIO (NORTHERN). An early variety, used by some market gardeners for the early market. This is a white potato with few eyes and a fair yielder. Pk. 90c; bu. \$2.50; 150-lb. bag, \$6.00.

KY. SECOND CROP IRISH COBBLER. Potatoes are preferred to northern potatoes in the vicinity of Louisville, as they go further and usually make a better crop. Seed for the second crop planting is carried in cold storage until July and we can supply Irish Cobbler, Carmen and Bull Moose at that time.

SELECT KY. 2ND CROP COBBLERS. A splendid stock carefully selected and grown from certified seeds for 1 or more years. This seed is above the average and will be found a true stock Cobbler that makes record yields year after year with a table quality possessed only by the Cobbler. Pk. 75c; bu. \$2.50; per bag (150 lbs.) \$6.00.

CERTIFIED KY. 2ND CROP COBBLER. Not only do we offer in this a certified stock of Cobbler (which means true to name and practically free of certain diseases) but one that is highly bred for greatest production. Price per bag \$8.00.

Grow a Larger, More Profitable Potato Crop with SEMESAN BEL —the Instantaneous seed potato dip

At least 50% of all seed potatoes planted in this country carry disease in some form or other. Even the use of certified seed does not insure against disease. Semesan Bel now offers a rapid, effective potato disinfectant which eliminates the disadvantages of old fashioned methods. Just mix Semesan Bel with water, dip your potatoes, drain and plant. No time consuming soaking necessary. Semesan Bel may be used with cold water. Harmless to sprouted potatoes. One man can treat from 200 to 400 bushels of potatoes per day. Generally controls such destructive seed-borne

diseases as scab, rhizoctonia and black leg. By protecting the seed piece against rotting caused by certain soil-borne organisms, it frequently promotes more uniform germination of seed pieces and often improves the stand and vigor of the plants. One pound treats 16 to 22 bushels of seed potatoes. Prices: 4 oz., \$.50; 1 lb., \$1.75; 5 lb., \$8.00; 25 lb., \$31.25.

SEMESAN and NITRAGIN

CONTROL SEED-BORNE DISEASES OF FARM CROPS

Stimulate Germination—Improve Stands
Generally Produce Increased Yields of Higher Quality

SEMESAN

For Flower and Vegetable Seeds

Semesan may be applied in dust or liquid form to the seed before planting. It is harmless to the seed but deadly to disease organisms that may be on the seed. Semesan is such a powerful and effective disinfectant that seed treatment with it is ridiculously low in cost, ranging from ¼ c to 1c per pound of seed. One ounce treats 15 lbs. of seed. Effective in controlling damping off and such devastating gladiolus diseases as hard rot and scab. Du Bay Semesan succeeds the products sold as Du Pont Semesan and Bayer Uspulun.

PROTECT PLANTS FOR PROFIT

GERMACO HOTKAPS can make you extra dollars this season. They protect plants from frost, wind, rain, insects and ground crusting. Thus they produce hardier, quicker crops. You get higher prices! Thousands were used in 48 states last year. They cost so little that growers cannot afford to be without them.

Prices: 1,000 lots, \$11.50; 5,000 lots, \$11; 10,000 lots, \$10.75. 250 trial package, including garden type waterproof setter, \$4.00; Germaco steel HOTKAP setter, \$2.50.

If you need HOTKAPS for your backyard garden, note these prices: 50 with garden setter, \$1.50; 100 with garden setter, \$2.25; garden setter alone, 50c.

BROADCAST SEEDERS

THOMPSON'S WHEELBARROW GRASS SEEDER

No. 6—Single Hopper Seeder sows all small seeds like clover, timothy and alfalfa, with Hopper 14 ft. long. Each \$11.00.

No. 5—Double Hopper Seeder sows all small seeds like clover, timothy and alfalfa, and also chaffy seeds like Red Top, Orchard Grass and Clean Blue Grass, with Hopper 14 feet long. \$13.00.

THE CYCLONE SEED SOWER—Its well known double feed insures a uniform flow of seed. The slope feed board keeps hopper properly filled. Feed adjustment is automatic and starts or stops flow of seed instantly. Price, each, \$2.00.

Twine and Rope

(No. 1) **GARDEN REEL** with 150 feet feet hard twisted cotton line 3/16 inch in diameter. The reel is made of hard wood which rotates on the 1/2-inch iron rod. It is a very convenient and inexpensive method of handling a garden line. Price complete with reel, \$1.25. Line only 60c.

(Nos. 2 and 3) **WHITE COTTON TWINE** used extensively for bunching vegetables by hand in either 3 or 4 ply, packed in cotton bags. 5-lb. each. Price, per bag, \$2.00.

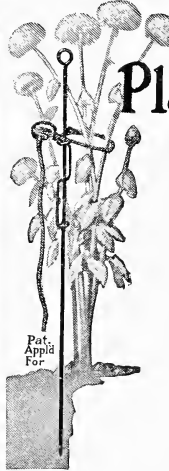

(No. 4) **JUTE TWINE**. This is a 6-ply very soft and strong twine meeting requirements of those who want a twine for tying plants to stakes or trellis, and is suitable for many other purposes. 1/2 lbs. ball, 20c; 2 balls, 35c.

(No. 5) **COTTON TWINE (CONE)**. This is a high grade 4 or 6-ply twine recommended for bunching vegetables when using Felins Tying machine. The 6-ply can also be furnished in 1/2 lb. ball or in tubes of about 2*1/2 lbs. each. Price, per lb., 45c.

THE "HORN" SEED SOWER—The Sectional Tube Style Has Brass Seed Gauge—It is used for sowing clover, timothy, alfalfa and all other small, smooth seeds. Is adjustable to sow any amount. Each, 90c.

(No. 6) **SISAL BINDER TWINE**. Most of this twine is used in harvesting wheat, oats, etc., and is a very economical twine for general purposes on the farm and garden. Each ball contains approximately 2,500 lineal feet. Price, per ball, 85c.

SISAL ROPE (No. 7)—5/8 in., 2 1/2c per ft. (No. 8) —1/2 in., 2c per ft. (No. 9)—3/8 in., 1 1/2c per ft. Nos. 7 and 8 are used extensively by market gardeners for tying their loads on trucks or wagons. The No. 9 can be used for many purposes on the farm or garden.

BUNTON FOR BEST SEED CO.

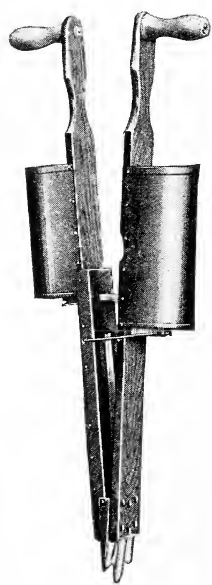

Hand Corn Planter

No. 306 Corn Planter

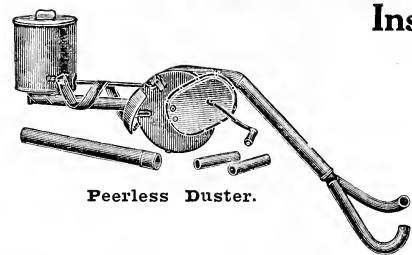

The 306 planter is well constructed of hardwood and pressed steel. No casting to break, no cloth to wear or tear; is light, strong and durable. The smooth steel slide is adjustable to vary the drop. Has steel spring cutoff that does not crack the corn, weighs only 4 pounds. **Price \$1.25.**

No. 307 Corn and Pumpkin Seed Planter. Constructed same as No. 306 except has pumpkin seed apartment underneath Corn Hopper. Both corn and pumpkin are planted at same operation. **Price \$1.75.**

No. 307 Planter.

Insecticide Dusters

Peerless Duster.

FEENEY MODEL BX DUSTER. Reservoir holds about 1 pint, is equipped with long tube and spreader nozzle, adapting it for dusting underneath the leaves of low plants. **Price, each \$1.00.**

Feeney Model D Duster

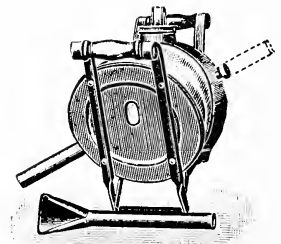

FEENEY MODEL D DUSTER. Holds two quarts, and is the right size for small truck gardens and tobacco growers and anywhere a medium capacity one-row duster can be used successfully. **Each \$3.75.**

LEGGETTS IMPROVED CHAMPION DUSTERS. A well made machine for blowing all kinds of dry Insecticides on plants and trees. Will dust two rows at a time as fast as operator walks. Long tubes carry the poison away from the operator. **Price, each, \$14.00.**

LEGGETTS FOUR-ROW BEETLE DUSTER. This machine will dust four rows at one time. One horse draws it with ease; it is well made and will last a long time if properly cared for. **Price, \$125.00.**

FEERLESS DUSTER. A perfectly balanced machine—load is divided front and rear. The hopper containing the material is in the rear of the operator, the crank is directly in front, allowing a full and free arm movement without straining the shoulder. Will automatically adjust itself to any size man. Has body support attached to universal joint, permitting the operator to direct the gun in a wide range of action; also lets the machine rest in a comfortable position.

This machine will dust at one operation two rows of potatoes, tomatoes, tobacco, etc. Will also dust trees because it has a powerful air blast. Has a special bean-beetle attachment, which distributes the dust under the foliage. **Price \$25.00.**

Bellows Duster.

The bellows duster is equipped with a long tube making it an ideal small hand machine for dusting vine crops, dwarf beans, etc. Reservoir holds 2 lbs., is light and easily operated. **Price, \$6.00.**

Sprayers

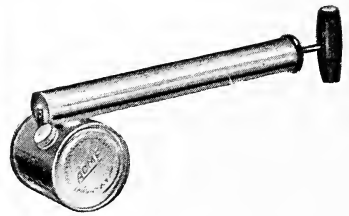

No. 332—Continuous Sprayer

All tin, capacity 1 quart, nozzle adjustable to throw vapor, fine or coarse spray. Ideal for fly spray, insecticide, etc. **Each 65c.**

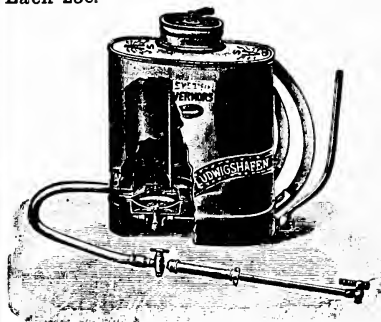

VERNORS KNAPSACK SPRAYER (Imported). This new sprayer has copper tank, with 4 gallon capacity. It works on compressed air principle, which gives constant and uniform pressure at all times. The pressure is easily maintained with the diaphragm style pump, which is located on under side of tank. The 3 foot brass extension is equipped with a very efficient strainer that prevents clogging of nozzle. The nozzle can be constantly set to direct spray at any desired angle. This sprayer is especially adapted for spraying grapes, small fruits, practically all vegetables, flowers, shrubs, etc. If purchaser is not satisfied it may be returned at our expense. **Price \$20.00.**

No. 307 Corn Planter with Fertilizer Attachment. This two-in-one hand machine solves the problem of planting and fertilizing for the grower with small acreage. Both Corn and Fertilizer drop is regulated to suit the operator, the divided jaw prevents Corn being deposited in contact with fertilizer. **Price, \$2.50.**

No. 335 Sprayer.

A small compact 12 ounce capacity sprayer, substantial and efficient. Throws a fine, dense uniform spray. **Each 25c.**

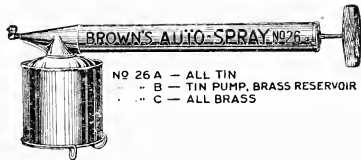

Vernors Knapsack Sprayer.

BUNTON FOR BEST SEED CO.

Sprayers

AUTO SPRAY No. 22-A. Is a strong hand atomizer made of heavy tin. It is of one quart capacity and throws a fine misty spray. Price 50c.

No. 26 A — ALL TIN
 B — TIN PUMP, BRASS RESERVOIR
 C — ALL BRASS

AUTO SPRAY No. 26. Is so designed that the pressure generates on the down stroke of the plunger allowing this sprayer to produce a continuous mist-like spray.

No. 26-A. One quart; all tin. Each, 85c.
 No. 26-C. One quart; all brass. Each, \$1.30.

BROWN'S AUTO SPRAY No. 26-AG. A continuous atomizer with glass tank. It is easily cleaned and does not rust out. The operator can always tell how much liquid is in the sprayer. Having standard mason fruit jar threads, tank can easily be replaced if broken. Price, each \$1.25.

BROWN'S AUTO SPRAY No. 9. Strong, simple, compressed air sprayer. Balanced construction; guaranteed against mechanical defects. Equipped with a clog proof nozzle. Either Brass or Galvanized tank as ordered. We strongly recommend the brass tank because it will not corrode with strong solutions and will last indefinitely. For spraying field crops, shrubs, vines, poultry houses, for removing wall paper, disinfecting, whitewashing, creosoting shingles, applying floor oils and for general purposes.

Specifications—Diameter 7 inches, height 2 feet, capacity 4 gallons, equipped complete for spraying with 2 feet of 1/2 inch 5-ply hose.

Auto-Spray No. 9-D. Galvanized tank with Auto-Pop and 2 feet brass extension, \$6.75.

Auto Spray No. 9-B. Brass tank with Auto-Pop and 2 feet brass extension, \$9.75.

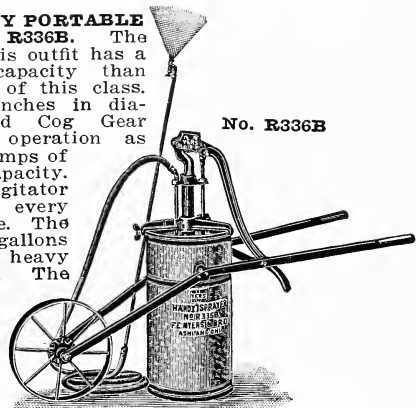

BROWN'S AUTO SPRAY No. 50. Has same general design as No. 9, only smaller, Tank holding 2 1/2 gallons. It is the Ideal compressed air sprayer where spraying is not extensive.

Galvanized Tank, auto pop and 15 inch brass extension, \$5.90.

Brass Tank, auto pop and 15 inch brass extension, \$8.35.

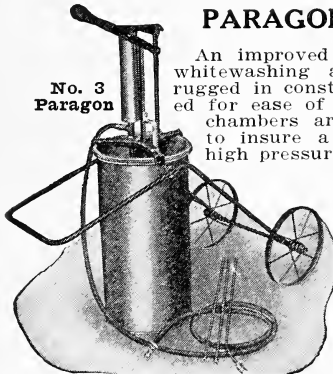

BROWNS BRONCO. 4 gallon capacity compressed air sprayer. Galvanized tank complete with 15 in. extension rod. \$5.50.

MYERS HANDY PORTABLE SPRAYER No. R336B. The pump used in this outfit has a much larger capacity than ordinary pumps of this class. Cylinder is 2 inches in diameter. Patented Cog Gear Handle makes operation as easy as other pumps of much smaller capacity. The dasher agitator operates with every stroke of handle. The tank holds 12 1/2 gallons and is made of heavy galvanized iron. The outfit is suitable for greenhouse work, spraying trees, whitewashing, painting, washing autos, etc. Price, \$23.00.

PARAGON SPRAYERS

No. 3 Paragon

An improved type of pump for whitewashing and spraying, very rugged in construction and designed for ease of operation. The air chambers are of sufficient size to insure a constant spray at high pressure. Strainer is made of brass and automatically cleaned at each stroke of the pump by the all-metal agitator. All working parts are easily removed for cleaning or repairing.

PARAGON SPRAYER No. 0. Is equipped with 4 feet special spray hose, 3 ft. spray pipe, 1 Mist Spray Nozzle, 1 Steel Cap for whitewashing, 1 Straight Spray. Price, \$12.50.

PARAGON SPRAYER No. 1. Equipped with 5 ft. Special Spray Hose, 5 ft. pipe, 1 Mist Nozzle, 1 Steel Cap for whitewashing, 1 Straight Spray Nozzle. Price, \$17.50.

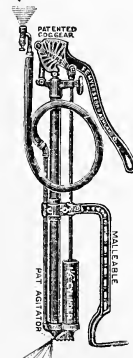

PARAGON SPRAYER No. 3. Equipped with 10 ft. Special Spray Hose, 7 1/2 ft. of Extension Pipe, 1 Mist Nozzle, 1 Steel Cap, 1 Straight Spray. Price, \$25.00.

No. 0 Paragon.

MYERS SPRAY PUMPS

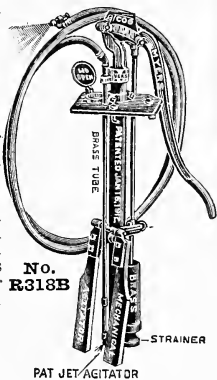

MYERS IMPROVED BRASS BARREL SPRAY PUMP, No. R318B. The construction is such that the entire pump sets inside the barrel containing the liquid, being bolted fast at its upper end to the head of the barrel. Size of hole to cut in barrel 8x8 ins. Price complete as illustration (15-inch hose), \$14.00.

MYERS COG GEAR BRASS BUCKET SPRAY PUMP No. R324.

Myers Bucket Spray Pump with cog gear handle. This pump has 1 1/2 inch diameter brass cylinder with solid plunger, brass ball valves, brass air chamber and discharge tube. The foot rest, head and cog gear handle make this an exceptionally easy-working pump of more than ordinary capacity. Has patented jet agitator which keeps liquids thoroughly mixed. Equipped as illustrated, each \$6.00.

No. R318B

PAT JET AGITATOR

MYERS COG GEAR BARREL SPRAY PUMP No. R305B. For use in open end barrels. Cylinder, valves, valve seats and discharge pipe all brass. All working parts submerged in liquid, hence no priming necessary. Have both Jet and Mechanical Agitators. Cylinder 2 inches in diameter. Price with one lead of 15 ft. of 1/2 inch 5-ply discharge hose graduating vermored nozzle, \$13.00.

INSECTICIDES FUNGICIDES

ACME ALL AROUND SPRAY. Flowers, vines, shrubs, roses, vegetables, need protection same as commercial crops. All Round Spray contains the three leading remedies used by all large growers. Arsenate of Lead, Nicotine Sulphate and Bordeaux Mixture.

Perfect protection for the small user is assured by complete directions in form of spraying guide attached to every package. Prices: $\frac{1}{4}$ lb. 45c; 1 lb. 95c.

ACME TWO-WAY SPRAY. A balanced insecticide and fungicide containing 14 per cent arsenate of lead and 83 per cent Bordeaux Mixture. Two results with one application.

Use wet or dry on: Apple, sour cherry, currant and gooseberry, grape, pear, plum, strawberry, pecan, bean, beet, cucumber, pepper, potato, tomato and many other fruits and vegetables. Prices: $\frac{1}{2}$ lb. 25c; 1 lb. 40c; 4 lbs. \$1.15; 24 lbs. \$6.00.

Antrol The Antrol System exterminates the commonly known "house ant"—the species that infests kitchens and eats food and sweet substances. Unlike ordinary control methods it destroys the entire ant colony at the source. Also Antrol is safe to use around children or pets—no dangerous. Use Antrol for permanent, quick relief!

Small Set (4 containers and 4-oz. bottle syrup)..\$1.00
Cottage Set (9 containers and 6 oz. bottle syrup) 1.90
Antrol Syrup—4-oz. bottle, 50c; 1-pt. bottle, \$1.00.
Cannot Be Mailed.

ARSENATE OF LEAD. It is safest to use on tender foliage and sticks well on the leaves. Recommended for fruit trees, vegetables, bushes and tobacco. Can be used dust or spray. Prices: $\frac{1}{2}$ lb. 25c; 1 lb. 35c; 4 lbs. \$1.00; 24 lbs. \$4.25.

Aphistrogen This Hortogen spray destroys all traces of these pests in two or three applications, for roses, chrysanthemums, golden glow and all others subject to plant lice. Fertilizes through the leaf. Will not discolor the foliage. **A Complete spray.** Also helps to control black spot when used alternately with Fungtrogen. 2 ozs. 50c; $\frac{1}{2}$ lb. \$1.25; 2 lbs. \$3.50.

ATLACIDE. The new improved form of Atlas Non-Poisonous Weed Killer. Is especially adapted for killing weeds in paths, driveways, tennis courts, brick walks, gutters, in fence corners, etc. It kills all weeds and grasses, including Johnson grass, Wild Morning Glory, Quack Grass, Canada Thistle, Poison Ivy, etc. Just simply dust on the plants you wish to kill. Deadly to vegetation but harmless to humans, animals and birds. **1 lb. sifter-top can (sufficient to kill 100 sq. ft. of weeds) postpaid 65c; not postpaid 50c. 3 $\frac{1}{4}$ lb. sifter-top can (kills 300 sq. ft.). Postpaid \$1.75; not postpaid, \$1.50.**

BEAN BEETLE DUST (Acme). A special beetle preparation most effectively used against Mexican bean beetle. Being both stomach and contact poison, it is sure to give quick results.

To be applied only as a dust. For use against: Mexican bean beetle, potato bug, cucumber beetle and many other less common hard shelled beetles. Prices: 1 lb. 25c; 4 lbs. 60c; 24 lbs. \$3.00.

BEAN BEETLE DUST (Crealo). A special beetle preparation of Calcium Arsenate, sulphur and lime. Used only as a dust and should be applied at frequent intervals on underneath side of leaves. 1 lb. 25c; 5 lbs. 75c; 50 lb. drum \$5.50.

"BLACK LEAF 40." A highly concentrated solution of nicotine-sulphate used extensively for killing aphids, commonly known as plant lice. Full directions for use on package. Oz. 35c; $\frac{1}{2}$ lb. tin \$1.25; 2 lbs. \$3.50; 10 lbs. \$13.50. (Not available).

BORDEAUX MIXTURE. Prevents large losses caused by blight, rot, mildew, scab, anthracnose and certain other fungous diseases. It stimulates plant growth and greatly increases the harvests. Almost

every kind of vegetable, fruit and shrub can be greatly improved by the early use of Bordeaux Mixture. 1 lb. 30c; 4 lbs. 75c; 24 lbs. \$4.00.

CALCIUM ARSENATE. The cheapest arsenical insecticide on the market but of great economy and efficiency for certain purposes. Recommended to combat chewing insects on potatoes, vegetables, cotton and certain fruit trees. Prices: 1 lb. 30c; 4 lbs. 65c; 24 lbs. \$3.35.

COW-EASE. A very valuable material for spraying milch cows and other animals to keep off flies and other insects. It saves its cost many times during summer months when most of their time during the day is taken fighting flies when they should be grazing. Consequently it will increase milk production. 1 qt. 40c; $\frac{1}{2}$ gal. 75c; 1 gal. \$1.25; 5 gal. \$5.00.

CYANOGENS—"A" Dust. Forms a gas that will when properly applied destroy ants, rats, ground-hogs, etc. 1 lb. pkg. 75c; 5 lb. pkg. \$3.00.
Non-mailable.

CYNOGAS "G" FUMIGANT. An economical and valuable greenhouse fumigant for the destruction of aphids, white fly, soft scale, thrips, etc. Easily applied. Full directions on each package. 5 lb. pkg. \$3.00; 25 lb. pkg. \$10.00. Non-mailable.

EVER GREEN, Non-Poisonous Insecticide. A sure killer of most plant insects. Ever Green offers no poison danger whatsoever to human beings, live stock, or birds. The active principle of Ever Green is Pyrethrum, or insect flowers. 1 oz. 35c; 6 ozs. \$1.00; 16 ozs. \$2.00; 32 ozs. \$3.50; gallon, \$13.00.

FRAIM'S TREE DRESSING. A resin compound used with splendid results in tree surgery work, when applied to pruning cuts or where injured bark is removed and in cavities, it forms a flexible waterproof coating of new skin that prevents decay and enables the bark to heal more quickly. Quart 60c; gallon \$1.50; 5 gals. \$7.00.

Fungtrogen This highly concentrated fungicide conquers Mildew on roses and other plants practically over night and controls Black Spot. A new and improved form of the famous Rosenbluth formula, combined with a nitrogenous element that fertilizes through the foliage. It also stimulates hollyhocks and geraniums; prevents rot and eliminates rust on carnations and the diseases of Delphiniums. $\frac{1}{2}$ pt. 75c; 1 pt. \$1.25; 1 qt. \$2.00; $\frac{1}{2}$ gal. \$3.50; gal. \$6.00.

Fish Oil Soap (Acme Spray Soap). Effective in destroying many sucking insects and lice on plants, trees, ferns, etc. Also used extensively with cylinder oils in making oil emulsions to reduce the surface tension. Its use with Nicotine greatly increases the value of that spray. Prices: 1 lb. 25c; 5 lbs. \$1.15; 30 lbs. \$6.30.

GARDEN GUARD. A garden insecticide and fungicide for use as a dust. No water, no mixture, no muss.

For use on: Cabbage, cauliflower, tomato plants, melon vines, currants and gooseberries and other vegetables, flowers and shrubs of many kinds. Prices: 1 lb. sifter carton, 20c; 5 lbs. 60c.

Insectrogen A remarkably effective insecticide that rids your roses and plants of leaf-chewing insects, including caterpillars, slug worms, Japanese beetles, etc., and many blights. Also fertilizes the plant through the foliage. Use alternately as a companion spray with Fungtrogen. Both carry their own spreader. Only water is required. $\frac{1}{2}$ pt. \$1.00; 1 pt. \$1.75; 1 qt. \$2.75; $\frac{1}{2}$ gal. \$4.50; gallon \$8.00.

K. R. O. Kills rats and mice without endangering your pets, live stock, poultry, etc. Very easy to bait. Full directions on each package. Postpaid, 1 oz. tin 75c; 4 oz. \$2.00.

Insecticides and Fungicides—Continued

LIME (Hydrated). A very important article having numerous uses around the home, garden, farm and lawn, is used as a reducer and in combination of many insecticides, and for whitewash, deodorizing, sweetening sour soil for lawns, and clovers. 10 lb. bag 35c; 50 lb. bag 75c; 5 bags at 60c.

LIME SULPHUR DRY. A standard 33° Baume lime and sulphur converted into a dry powder but having all the effectiveness of the liquid product when dissolved in water.

For use in dormant spraying against scale, peach blight, leaf curl and twig borer. Summer spraying against scab, soot, blotch, red spider and mite. Prices: 1 lb. 35c; 5 lbs. \$1.25; 10 lbs. \$2.00; 25 lbs. \$4.00; 50 lbs. \$7.00; 100 lbs. \$13.00.

LIME SULPHUR LIQUID. Some fruit growers prefer the Lime Sulphur Liquid, claiming it is more economical than the dry. Prices: Qt. 35c; 2 qts. 45c; 4 qts. 65c; 5 gal. \$1.75; 30 gal. bbl. \$9.50; 50 gal. bbl. \$12.50. A credit of \$2.00 allowed for return of barrel.

MAGNESIUM ARSENATE. One of the best remedies for control of Mexican Bean Beetle. Mostly used as a spray and should be applied to underneath side of leaves. Magnesium Arsenate does not burn like other Arsenate preparations, hence its value as a spray for the tender Bean foliage. Use 1 pound for each 50 gallons of water. 1 lb. 40c; 5 lbs. \$1.50.

MULSOID SULPHUR. A highly recommended preparation for control of Brown Rot of Peaches. Use 3 pounds to each 50 gallons of water. Packed in 4 lb. paper bags. 4 lbs. 60c (1 carton); 24 lbs. \$3.25.

"NICO-FUME" LIQUID. A highly refined solution of "free" nicotine, guaranteed to contain fully 40% of nicotine. Extensively used by leading florists for spraying or vaporizing in green houses to destroy Aphids, Thrips, etc. ¼ lb. can 75c; 1 lb. can \$2.25; 4 lbs. \$8.00; 8 lbs. \$15.00. Postage extra.

"NICO-FUME" TOBACCO PAPER. Consists of sheets of paper impregnated with high strength Nicotine; folded and punched ready to hang up and burn. Contains not less than 20% of Nicotine. 24-sheet can \$1.25 (wt. 1 lb.); 144 sheet \$5.00; (wt. 5 lbs.); 288 sheets \$10 (wt. 8 lbs.). Postage extra.

NICOTINE DUST (F-2). Made from high strength free nicotine and contains not less than 2% of actual (100%) nicotine. Recommended for use against the more resistant insects, such as Pea Aphid, Onion Thrip, Cucumber Beetle, Squash Bug (young), Asparagus Beetle (young), Leaf Hopper and similar pests attacking vegetables, etc. 5 lb. tin \$1.25; 25 lb. drum \$4.50; 50 lb. drum \$8.25; 100 lbs. drum \$15.75.

PARIS GREEN. For use on: Potatoes, cotton, tobacco, also to mix with arsenate of lead for fruit tree spraying where quick results are necessary. Prices: ¼ lb. 15c; 1 lb. 40c; 5 lbs. \$1.75.

POMO GREEN. Most rose growers are familiar with Pomodust. It has been giving splendid results for several years in the control of Black Spot and Mildew. It is now made Green and processed into a better dust, which harmonizes with the color of the foliage. May also be used to control Mildew, Rust and many other fungous diseases of flowering plants and ornamentals. Pomo Green is put up in 5 lb. paper bags—5 bags to a carton. 5 lbs. \$1.50; 25 lbs. \$7.50.

REX OIL EMULSION. An economical self-emulsifying spray oil for dormant spraying of Fruits and Shade Trees and Shrubs. 1 gal. 75c; 5 gals. \$2.50; 30 gals. \$9.00; 50 gals. \$22.50.

SANTOCHLOR (Pure Paradichlorobenzene). Kills the Peach Tree Borer. One ounce required for each tree. Full directions for use on each package. 1 lb. 50c; 5 lbs. \$2.00; 10 lbs. \$3.50.

SCALECIDE—The Complete Dormant Spray. The quality miscible oil. Oldest and best known dormant spray for trees, shrubs and vines—makes them more beautiful, healthful and fruitful. Used by leading fruit growers. Pleasant to use—non-caustic, non-corrosive, non-poisonous. Kills scale, insects, eggs, larvae and disease cankers and fungous spores wintering on the plant. Mixes instantly—dilute 1 to 15. Qt. 75c; gal. \$1.75; 5 gals. \$6.25; 10 gals. \$10.60; 15 gals. \$13.50; 30 gals. \$26; 50 gals. \$38. One gallon equals 3½ gallons lime-sulphur.

SHEPS BARNYARD SPRAY. A guaranteed fly spray for cows and horses. Keeps off flies and mosquitoes. Kills lice, mites, ticks, etc. ½ gal. 75c; 1 gal. \$1.25; 5 gal. \$5.00.

SHEPS HOUSEHOLD SPRAY. Contains a very powerful germicide in quantities sufficient to destroy all the insects, flies, mosquitoes, moths, bed bugs, roaches, ants, etc. The odor of Sheps is inoffensive, it has that pleasant odor of flowers (the rose and lilac). ½ pt. 50c; pt. 75c; qt. \$1.25; gal \$4.00.

SHEPS PLANT SPRAY. Non-poisonous. Controls and kills both sucking and chewing insects, including Aphids, Thrips, Green Flies, White Flies, Mealy Bugs, Worms, Caterpillars and others.

Guaranteed Non-Poisonous.

Absolutely safe for humans, birds, animals and plants. Sure death to insects. Will not injure the most delicate blooms or plants. Benefits soil and foliage. Full directions on each bottle.

SULPHATE OF COPPER (Bluestone or Blue Vitriol). Used in making Bordeaux Mixtures and Copper Solutions. 1 lb. 20c; 5 lbs. 65c; 10 lbs. \$1.25. Ask for prices on larger quantities.

SULPHUR FLOUR. Now being used and recommended for treating Seed Potatoes for scab; is usually dusted on while cutting potatoes for planting. Prices: 1 lb. 10c; 10 lbs. 75c; 100 lbs. \$3.00.

SULPHUR SMOKE. A very finely sifted sulphur used for dusting for control of fungous diseases. 1 lb. 15c; 5 lbs. 50c; 100 lbs. \$5.00.

SUNOCO. A self-emulsifying spray for San Jose scale that is rapidly displacing lime-sulphur in fighting this pest. It mixes readily with hard water, forms no sludge or waste and kills every insect it touches. "How To" booklet free on request. It tells how Sunoco spray controls and how to apply. 1 gal. \$1.25; 5 gals. \$5.00; 15 gals. \$10.50; 30 gals. \$18.00; 50 gals. \$25.00.

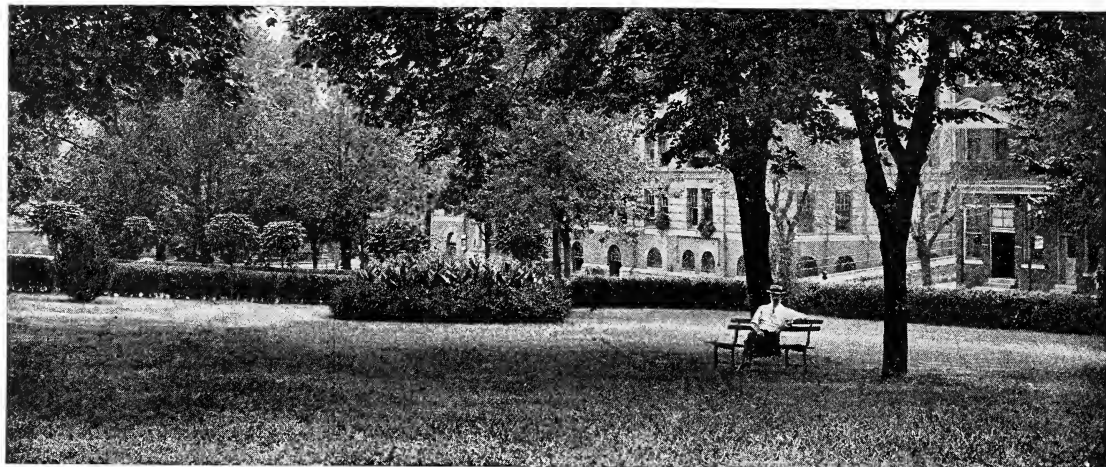

TOBACCO DUST. Very effective for destroying plant lice or aphid, striped bugs on melons, cucumbers and squashes and other insects; also remedy for poultry lice. 1 lb. 10c; 10 lbs. 50c; 25 lbs. \$1.25; 100 lbs. \$4.00. Postage extra.

TREE TANGLEFOOT. For protecting trees against climbing insect pest in a simple, economical and effective way. Put a band of Tree Tanglefoot from 3 to 5 inches wide completely around the tree. 1 lb. 60c; 5 lbs. \$2.75; 10 lbs. \$5.25. By parcel-post, 1 lb. 70c; 5 lbs. \$3.00; 10 lbs. \$5.65.

VOLCK is one of the most powerful insecticides known. Wonderful results have been obtained against red spiders, cyclamen mite, aphid (green fly), scale, mealy bug, thrips and caterpillars. Prevents mildews and rusts. VOLCK is odorless, colorless and non-poisonous. Plants are deep glistening green after using. ½ pt. 50c; pint 75c; quart \$1.00; gallon \$3.00; 5 gals. \$12.50; 14 gals. \$25.00.

Grow Better Lawns and Flowers

B.-B. Lawn and Garden Grower

A Complete Plant Food and Soil enricher for Lawns, Flowers, Vegetables, Shrubs, Trees, Etc.

Plants will grow better, flowers bloom more profusely, lawns be more thrifty and have a healthier green color, Vegetables be earlier and more tender, Season after Season in the same plot if you feed them B.-B. Lawn and Garden Grower.

BECAUSE 50% of ingredients used in B.-B. Lawn and Garden Grower are organic plant food forming materials, such as Pulverized sheep manure, Raw Bone, Pulverized Tobacco stems; they add the much needed humus to most soils, keeping it loose and loamy, thereby improving its condition for growing the same kind of plants if desired in same locations, year after year.

QUICK ACTION B.-B. Lawn and Garden Grower also has sufficient, well balanced Inorganic Substances containing plant food elements in readily soluble form that act quickly, giving an early start and forcing development of early maturing plants, adding crispness to vegetables, color and size to flowers, and that beautiful Green to Lawns.

CONTINUOUS. Throughout season the plants receive food from the organic plant food elements supplied in B.-B. Lawn and Garden Grower. The plant foods in Bone, Sheep Manure and Tobacco gradually become solvent and are released to the plants as they require food during their development throughout a long season. In other words, put on a liberal application in the spring and the food will be solvent when the plants are able and ready to consume it.

SOIL ENRICHER. B.-B. Lawn and Garden Grower is not only a complete, scientifically balanced plant food, but is a soil enricher as well. It enables the small grower to use his plot for growing year after year without the necessity of applying stable manure or turning under green crops for humus. It is absolutely free of weed seeds. It supplies the humus needed in most soils and being dry and finely pulverized is easy to spread. It is economical and contains five to six times as much nutrition for growth as any manure.

LAWNS. It is unequalled for growing beautiful, velvety green lawns. Simply broadcast over old lawns in early spring at the rate of 5 pounds for each 200 square feet and on new lawns work into top soil before sowing seeds.

GARDENS. After spading or plowing, broadcast and work into soil, 10 to 15 pounds for each 400 square feet and drilling small quantity in furrow opened for seeds and lightly mix with soil before dropping seeds. It can be successfully used by working into soil around growing plants as far out as roots spread.

POTTED PLANTS. Your plants will take on new life if frequently given small applications of B.-B. Lawn and Garden Grower, use one to four teaspoonsful to each pot, depending on their size, mix with top soil and add water.

Prices: 5 lb. pkgs. 40c; 10 lb. pkgs. 70c; 25 lb bag \$1.25; 50 lb. bag \$2.00; 100 lb. bag \$3.75; 1,000 lb. bag \$35.00.

B-B
Lawn and Garden
Grower

A Complete
Fertilizer

Bunton's High Grade Fertilizers

Note: Prices on fertilizer are those in effect at time this catalog goes to press. All subject to change.

B.-B. HIGH GRADE VEGETABLE

Analysis Nitrogen, 4%; Phosphate 10%.

This is prepared especially for market growers who require a quick acting fertilizer to assist in bringing their crops to early maturity. It is especially recommended for garden peas, early corn, onions, lettuce, beans, and other such early maturing crops. 125-lb. bag, \$2.75; ton \$36.00.

B.-B. TRUCKERS SPECIAL

Analysis; Nitrogen 2%; Phosphate, 10%; Potash, 4%.

This is a complete fertilizer for vegetables, vine crops, tomatoes and corn and other crops that require a liberal amount of potash. 125-lb. bag, \$2.50; ton, \$33.00.

B.-B. SPECIAL GRAIN GROWER

Analysis: Nitrogen, 2%; Phosphate, 16%; Potash, 2%.

A very high grade well balanced fertilizer for all grain crops, has high percent of Phosphate which is needed to produce and develop the grain, the nitrogen insures a steady and healthy growth and sufficient Potash to give good body and stalk. Apply 300 to 400 lbs. per acre. Bag 125 lbs., \$2.75; ton, \$36.

B.-B. CHAMPION POTATO GROWER

Analysis; Nitrogen, 4%; Phosphate, 10%; Potash, 4%.

As sales on our B.-B. Champion Potato Grower are increasing each year, we are positive that it is giving better returns, and that it pays to buy high grade fertilizer for potatoes. 125-lb. bag, \$3.00; ton, \$40.00.

B.-B. A-1 POTATO GROWER

Analysis; Nitrogen, 3%; Phosphate, 8%; Potash from Sulphate, 6%.

We have combined in our B.-B. A-1 Potato Grower plant food from elements that not only give the plant a quick start but will last, helping to develop the crop through to maturity. It is also a splendid fertilizer for all other root crops. Tomatoes and tobacco. 125-lb. bags \$2.90; ton, \$39.00.

B.-B. TOBACCO BOOSTER

Analysis: 2% Nitrogen; 8% Phosphate; 3% Potash.

A high grade Tobacco Fertilizer adapted to all sections of Kentucky, outside of the Blue Grass region. The proper Fertilizer pays well on Tobacco and it is well to make a second application when plants have about 6 leaves. The very best materials are used in our Tobacco Booster and is always in good mechanical condition. Bag 125 lbs. \$2.10; ton \$29.50.

BURLEY SPECIAL

Analysis: 6% Nitrogen; 8% Phosphate; 3% Potash.

A special tobacco growing fertilizer prepared for soil conditions in the Blue Grass region, which has proven to be one of the best formula's for that section of Kentucky being very high in nitrogen, it gives large growth and quick development of the plant, also excellent for plant beds. Bag 125 lbs. \$3.50; ton \$48.50.

ACID PHOSPHATE 16%

Acid Phosphate is used quite extensively on small grain crops. Cow Peas, Soy Beans, etc. When mixed with stable manure it makes a very complete fertilizer. 125-lb. bag, \$1.85; ton, \$22.75.

RAW BONE

Nitrogen, 3%; Phosphate, 22%.

Packed in 100 lb. bags, an excellent Fertilizer for Trees, Shrubs, Strawberries, as the plant becomes available over a longer period of time than mineral plant foods. 5 lbs. 35c; 10 lbs. 60c; 25 lbs. \$1.25; 50 lbs. \$2.00; 100 lbs. \$3.50.

BONE MEAL

Analysis; Nitrogen 1 1/4%; Bone Phosphate, 30%.

Pure animal bone, finely ground, gives splendid results on grass and small grain crops. Berries, Shrubs, Trees, Perennials, etc. 100-lb. bag, \$3.00; ton, \$50.00.

SULPHATE OF AMMONIA

A highly concentrated nitrogenous top-dressing, quickly available, fine and dry, easily spread by hand or with distributor, excellent for vegetables, lawns and meadows. Apply 100 to 150 lbs. per acre. 5 lbs. 45c; 10 lbs. 75c; 25 lbs. \$1.50; 50 lbs. \$2.50; 100 lbs. \$4.00.

NITRATE OF SODA (Champion Brand)

Much easier to distribute than any other nitrate of soda, as the new process of drying forms it into snow white pellets that does not get lumpy. The paper lined bags prevent it from drawing moisture. It is the most available form of nitrogen. Used extensively for forcing early truck crops. On grass fields after cutting it promotes a healthy strong growth. Apply 100 to 150 lbs. per acre. 5 lbs. 40c; 10 lbs. 60c; 25 lbs. \$1.25; 50 lbs. \$2.25; 100 lbs. \$3.75.

WONDER GROWTH

A Fertilizer Fumigant and Insecticide. Wonder growth is an all Tobacco fertilizer, containing 3% Ammonia, 1/2% Phosphate, 5% Potash. It contains no chemicals. As an insecticide it contains 1% Nicotine in its natural state. Recommended for top dressing of lawns, flower beds, shrubs, evergreens and for working into greenhouse soil. Several applications during season will insure healthy growth. 5 lbs. 50c; 10 lbs. 85c; 25 lbs. \$1.50; 100 lbs. \$4.25; ton, \$76.00.

EASY WAY
TO GROW
BEAUTIFUL
PLANTS

Plant one of the Plantabbs in each pot about every two weeks and you'll have the finest flowers you ever grew.

Plantabbs are small, clean, quickly dissolving tablets without odor. Highly concentrated form of nitrogen, ammonia, phosphoric acid and potash in proper balance. Especially good inside where smelly fertilizer cannot be used, but equally effective on roses and other garden flowers.

Everyone who tries Fulton's Plantabbs praises them. 30 tablets 25c; 75 tablets 50c; 200 tablets \$1.00; 1000 tablets \$3.50.

Lawn Tools and Mowers

Genuine Philadelphia Lawn Mower

The Philadelphia Series "S" Mower Style S-A is the highest grade lawn mower ever built. It is constructed principally of pressed steel, making it practically unbreakable. Equipped with radial ball bearings in the wheels, as well as journals of revolving cutter; gears enclosed in oil-tight dust-proof cases. Ratchets are noiseless, and start the revolving cutter instantly. Five blades on cutting reel—wheels 10 inches high. 15 inch, \$30.00; 18 inch, \$36.00.

Philadelphia Lawn Trimmer is made of high grade material and designed to mow close to trees, fences and around flower beds and edges. Each \$10.50.

Style B.-B. Philadelphia.

The style B.-B. is a new Genuine Philadelphia steel Lawn Mower. The 9-inch wheels and side plates are made of pressed steel and will not break, has 4 crucible steel cutting blades, radial ball bearings. Cuts swath 16 inch wide and will mow from $\frac{1}{2}$ inch to $1\frac{1}{2}$ inch high. For general work on small lawns it is the best lawn mower for the price ever offered. Each \$12.00.

AMERICAN TIMKEN. A very high grade Lawn Mower built for long and satisfactory service, it is equipped throughout with Hyatt and Timken bearings. Aluminium alloy wheel and castings make it light in weight and yet very strong. 16. in. \$22.00; 18 in. \$23.00.

THE SPEEDY. One of the most popular open wheel type of ball bearing Lawn Mowers made. Has high tree rod guard and reinforced rims. 9 inch wheels, 4 cutting blades. 14 in. \$9.25; 16 in. \$9.50.

APEX SPECIAL. A light running, high wheel Lawn Mower with automatic adjusting ball bearings, accurately made and a big value at the price. 10 in. wheels, 4 cutting blades. 14 in. \$8.75; 16 in. \$9.00; 18 in. 9.25.

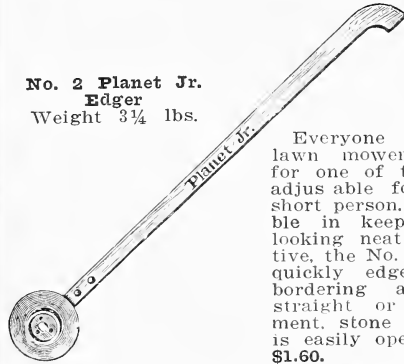

THE KUTZIT. A ball-bearing Lawn Mower with 8 in. raised rim wheels and 4 cutting blades. 12 in. \$7.25; 14 in. \$8.50.

THE FEDERAL. Brass bearing, 8 inch wheel, 4 cutting blades. 12 in. \$7.00; 14 in. \$7.25; 16 in. \$7.75.

THE CLEAN CUT. A well made low priced brass bearing Lawn Mower with 8 in. wheels and 3 cutting blades. 12 in. \$6.00; 14 in. \$6.50.

Planet Jr. Lawn Edger

No. 2 Planet Jr. Edger
Weight $3\frac{3}{4}$ lbs.

Everyone who uses a lawn mower, has work for one of these edgers; adjustable for a tall or short person. Indispensable in keeping grounds looking neat and attractive, the No. 2 Edger will quickly edge the grass bordering all walks, straight or curved, cement, stone or brick. It is easily operated. Price \$1.60.

English Scythe Blades

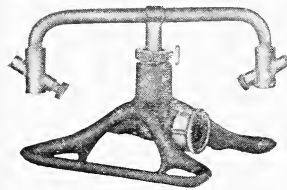

Will hold a fine cutting edge, cutting blade made of high grade tool steel with riveted back. Price, 30-32 or 34-inch, each, \$2.50.

English Grass Hooks

Tool steel with riveted back. Price, each, 85c.

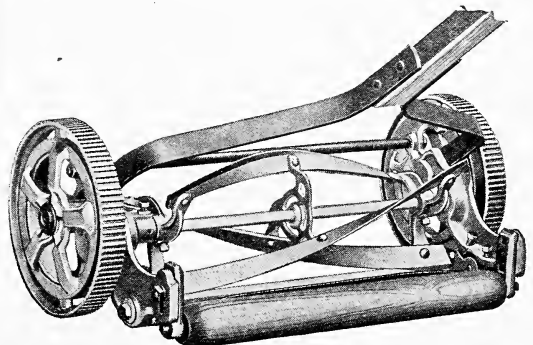

Whirling Showers Lawn Sprinkler

Now you can buy a completely adjustable lawn sprinkler at a reasonable price. Whirling Showers gives every type of spray from fine mist to heavy shower. Sprinkles strip or circle and will cover diameter of 70 feet. A leak proof all metal joint eliminates soft packing and its attendant trouble. Sprinkler will operate for years without attention as it is made entirely of brass excepting base, which is malleable iron. Leak proof drip proof and practical in every respect. Price, \$2.75.

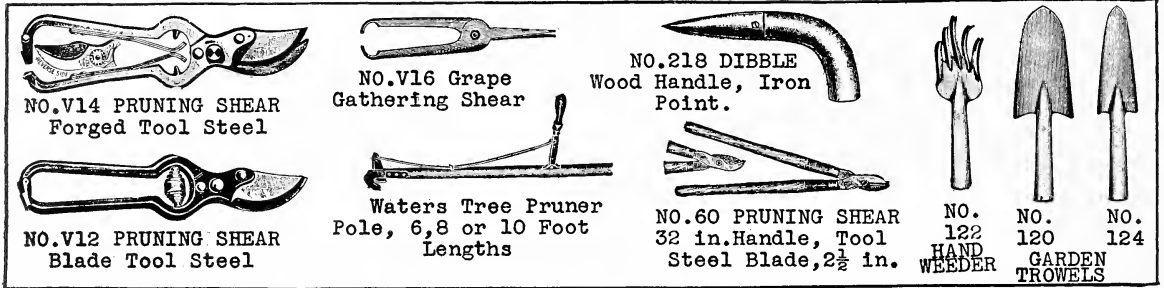

Water Hose

Crack Proof hose has two layers of double twisted, high grade cotton, woven into a seamless tube, impregnated and completely covered inside and out with tough live rubber. It will stand high pressure and rough usage. $\frac{3}{8}$ inch, $12\frac{1}{2}$ c per ft.; $\frac{1}{2}$ inch, 14c per ft. Brass Couplings, 25c per set.

The Clean Cut.

Planet Jr. Garden Tools

No. 3 Hill and Drill Seeder

soil, and marks out the next row. Capacity 3 quarts. Index accurate and easily set; handles adjustable to suit height of operator. **Price, \$17.50.**

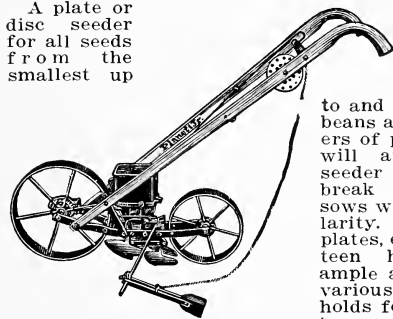

The No. 4 is especially designed for the home gardener and for the small market gardener. More of them in use than any other tool of this kind. Sows in straight drills or drops in hills 4, 6, 8, 12 or 24 inches apart. Capacity of hopper $2\frac{1}{2}$ quarts. A complete seeding and cultivating machine, useful from beginning to end of the gardening season. **Price, \$18.00.**

No. 4 Hill and Drill Seeder and Single Wheel Hoe Combined

No. 4-D Hill and Drill Seeder only. Price, \$14.25.

A plate or disc seeder for all seeds from the smallest up

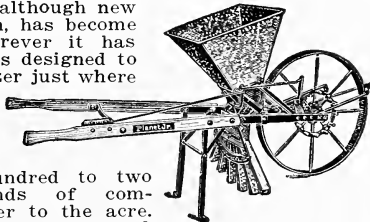

emptying. Net weight 36 pounds. **\$20.00.**

to and including peas, beans and corn. Growers of peas and beans will appreciate this seeder as it does not break the seed and sows with great regularity. Only three plates, each with thirteen holes, making ample adjustment for various seed. Hopper holds four quarts and is removable which makes easy filling and

No. 220 Fertilizer Distributor

The No. 220, although new just last season, has become a favorite wherever it has been used. It is designed to place the fertilizer just where it is wanted and in the right quantity. Sows over a width of from 4 to 30 inches, one hundred to two thousand pounds of commercial fertilizer to the acre. Used in rows as close as 9 inches. Capacity of hopper one bushel. Load placed over wheel which makes it push easy. Spouts easily adjusted; positive, even distribution at every step. No canvas belts, gears or chains to break, rust, tear or stick. **Price, \$27.00.**

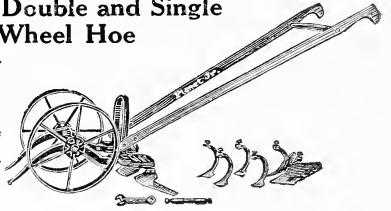

No. 101-D Plain Cultivator (Horse)

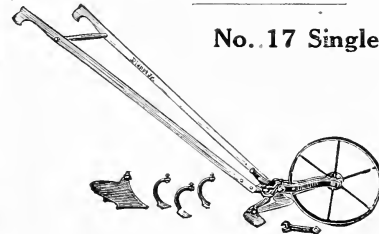

Lever expander. Opens to 26 inches; closes to 15 inches. The No. 101 is especially adapted for light soils, and it is easily handled. Planet Jr. quality in every respect and will give many years of satisfactory service. **Price, \$9.25.**

No. 12 Double and Single Wheel Hoe

A very popular and complete garden tool. Equipment: as illustrated. As a double wheel hoe it cultivates both sides of the row by straddling until plants are 20 ins. high. It is then useful as a single wheel hoe between rows. Cultivating equipment all oil-tempered; will last for many years. **Price, \$10.75.**

No. 13 Double and Single Wheel Hoe. Equipment one pair of 6-inch hoes only. Price, \$8.00.

No. 17 Single Wheel Hoe

The No. 17 is very popular with both the home gardener and the market gardener. It includes just the equipment that is most generally used and with which

you can plow, cultivate, weed, hoe, open furrows for large seed, fertilizer, etc., and cover them, and hill up plants. Handles adjustable to suit height of operator. **Price, \$7.75.**

No. 17½—Same as No. 17, less the plow. **Price, \$6.75.**

No. 18—Equipment one pair of 6-inch hoes only, most useful cultivating attachment. **Price, \$5.75.**

The No. 19 is a very complete and at the same time moderate priced garden plow and cultivator. The equipment includes a 2-inch cultivator tooth a 10-inch sweep, large garden plow, and a 5-tooth cultivating attachment.

With the No. 19 you can plow, cultivate, hoe, rake, weed, open and close furrows and hill up plants. **Price, \$5.90.**

No. 19 Garden Plow and Cultivator

No. 119 Garden Plow and Cultivator

If you buy a high wheel garden plow and cultivator—be sure it is a Planet Jr. The No. 119 is Planet Jr. quality throughout and will give a "Planet Jr. lifetime" of service.

Equipment as illustrated. Depth of cultivation can be regulated; handles adjustable to suit height of operator. Has

24-inch steel wheel. **Price, \$3.75.**

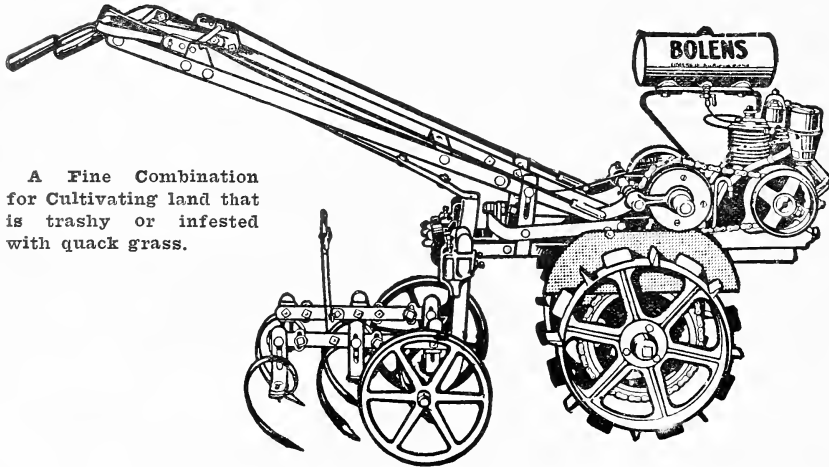

No. 4-D Plain Cultivator (Horse)

This very popular tool is strong, plain, simple and does its work to perfection. Has extra high, round-throated hollow steel standards with patent beveled steel teeth, and expanders which makes it an extra stiff tool, yet allow quick adjustment for width. One side may be closed while the other is left open for special work close to the row. **Price, \$8.50.**
